Highlights for the period

- > During one of the largest pandemics of our time, Sea Harvest Group Limited delivered a credible set of results with HEPS in line with the comparative period in 2019 of 61 cents per share
- As an "essential service" provider, continued to operate through COVID-19, albeit at lower levels:
 - Comprehensive COVID-19 response strategy led by CEO and Executive Task Team
 - Prioritised the health of our employees through stringent safety protocols
 - Protected jobs and hence livelihoods
 - Supported our employees and our communities
 - Market disruption with foodservice / HORECA (hotels, restaurants and catering) markets under pressure globally
 - Diverted significantly more volume to retail markets which were firm, resulting in margin pressure
 - Experienced supply-side interruptions (positive cases, port logistics, etc.) affecting throughputs and productivity
 - Spent R16.7 million on direct COVID-19 related costs in South Africa to ensure the safety of our employees and the sustainability of our business
 - Prioritised working capital management and suspended non-critical capital expenditure
- Benefited from the weaker Rand and lower fuel prices, offset by hedging losses
- Difficult trading conditions in the Aquaculture business due to COVID-19
- > Retention of our Level 1 B-BBEE contributor status
- ➤ The fishing rights allocation process (FRAP 2021) has kicked off and is expected to be completed by 31 December 2021
- ➤ Sea Harvest Fish Fingers was voted the South African Product of the Year 2020* in the Quick Meals Category

^{*}As awarded by Answered Insight

COMMENTARY CONTINUED

Trading and financial performance

During one of the largest pandemics facing the world in recent times, resulting in significant disruptions to markets and supply chains, the Sea Harvest Group has delivered a credible set of results with **headline earnings** for the period ended 30 June 2020 of R170 million, in line with the prior year (2019: R169 million). **Earnings per share** and **headline earnings per share** also remained constant at 61.0 cents per share (2019: 61.1 cents per share).

Group revenue for the period increased 7% to R2.0 billion (2019: R1.87 billion), benefiting from good performances from the South African Fishing segment, the Cape Harvest Foods segment (which includes Ladismith Cheese) and the Australian operations, offset by continued challenges in the Aquaculture segment which was severely impacted by the effects of COVID-19.

Despite being deemed an "essential service" provider and therefore able to continue to trade during the various stages of lockdown albeit to a lesser degree, the Group has not been immune to the effects of the pandemic. While local and international retail markets have benefited as a result of an increase in in-home consumption, local and international foodservice markets have seen a slowdown as a result of various lockdown levels being implemented worldwide.

This has also impacted the Sea Harvest Group product mix with the Group directing efforts, where possible, to products that meet current market demand and thereby minimising stock build-up. This has impacted margins negatively.

Revenue for the period from the South African Fishing segment increased 7% to R1.29 billion (2019: R1.21 billion) while the Cape Harvest Foods segment delivered revenue of R470 million (2019: R441 million), which is 7% higher than the comparative period in 2019. Sea Harvest Australia delivered a 24% increase in revenue to R226 million for the period (2019: R182 million), while revenue in the Aquaculture segment decreased 63% to R15 million (2019: R40 million). The significant decrease in the Aquaculture segment is a direct result of the closure of the Far East markets in early 2020 due to lockdowns in the region, followed by the lockdown in South Africa curtailing air freight from South Africa.

With **cost of sales** increasing 6% on the back of good cost containment and lower fuel prices, **gross profit** for the period increased 9% to R666 million (2019: R611 million), with the gross profit margin remaining constant at 33% (2019: 33%). The gross profit margin of the South African Fishing segment expanded two percentage points to 38%.

Other operating (loss)/income, which includes foreign exchange hedge (losses)/gains, resulted in a loss of R22 million for the period (2019: R37 million gain),

mainly due to the Group's export and fuel hedges being out of the money as a result of the weakening of the Rand against the Euro, the Australian Dollar and the US Dollar, as well as lower fuel prices.

Operating expenses for the period increased 5% to R387 million (2019: R367 million), benefiting from good cost containment across the Group. Operating expenses as a percentage of revenue decreased slightly to 19.3% (2019: 19.6%).

Fair value gains of R9 million includes a R12 million gain on the revaluation of biological assets in the Aquaculture segment.

As a result of supply chain disruptions, including lower throughput and lower levels of productivity, and after absorbing R11.2 million of net direct COVID-19 related costs, the Group delivered **operating profit before net finance costs and taxation** of R267 million for the period, 5% lower than the prior period (2019: R281 million), with the operating profit margin contracting to 13% (2019: 15%). The contraction in margin reflects the impact of COVID-19 on the Group's supply chain as well as the markets in which the Group operates.

Net finance costs for the period decreased to R48 million (2019: R51 million) as a result of lower interest rates.

Profit after tax for the period decreased 4% to R155 million (2019: R161 million), while **headline earnings** remained constant at R170 million (2019: R169 million).

Basic headline earnings per share (HEPS) remained constant at 61.0 cents per ordinary share (2019: 61.1 cents).

Segmental review

South African Fishing: In the midst of the COVID-19 pandemic, the South African Fishing operation delivered a credible set of results despite the challenges in both the market and the supply chain sides. Revenue for the period ended 30 June 2020, increased 7% to R1.29 billion (2019: R1.21 billion) benefiting from a weaker exchange rate and increased in-home consumption in both local and international retail markets. These were offset by a lower value product mix and a slowdown in both local and international foodservice markets as a result of various lockdown levels being implemented across the globe. With stringent cost containment and a lower fuel price during the period, gross profit increased 14% to R526 million (2019: R463 million) with the gross profit margin expanding to 38% (2019: 36%). After absorbing R26 million of hedge losses (2019: R21 million hedging gains) and R15 million of direct COVID-19 related expenses, operating profit from the South African Fishing segment was constant at R254 million (2019: R253 million), with the operating profit margin diluting to 20% (2019: 21%).

Export revenue has increased 9%, while the combined export mix has improved to 54% (2019: 53%) of total revenue, with Europe remaining Sea Harvest's largest export market. The export business benefited from a weaker exchange rate over the period.

Locally, revenue through the retail channel increased 31% benefiting from increased in-home consumption, with the retail channel mix increasing to 13% (2019: 11%). Both the local foodservice and wholesale markets have been affected by the lockdowns, with revenue decreasing 2% and 1% respectively, with the combined local foodservice and wholesale channel mix reducing to 33% (2019: 36%).

Aquaculture: The Aquaculture segment has been a major casualty of COVID-19 with companies in the abalone sector facing a "perfect storm" since the beginning of 2019. After the extended period of red tide in early 2019, the business had to contend with political tensions in the Far East for the most part of 2019. Sales started to pick up in late 2019, however, COVID-19 was detected in China and Hong Kong, resulting in a complete lockdown and the closure of all live trade into the region. As China and Hong Kong started to emerge from the crisis, the virus spread to most parts of the world leading to a lockdown in South Africa and a near cancellation of all flights out of South Africa, hampering exports.

Likewise, the oyster and mussel operations which supply almost exclusively into foodservice, have been severely affected by COVID-19.

On the back of the lockdowns, revenue for the period decreased 63% to R15 million (2019: R40 million), resulting in an operating loss before net finance costs and tax of R26 million (2019: R5 million), after accounting for a R12 million fair value gain on the revaluation of biological assets, R6 million of hedge losses and R800 000 of direct COVID-19 related expenses.

As a result of good growth on the farms, biological asset value across the Aquaculture segment has increased 27% to R163 million (2019: R128 million).

Cape Harvest Foods: The Cape Harvest Foods segment, which incorporates Ladismith Cheese as well as Sea Harvest's factory shops, fared well during the period benefiting from increased in-home consumption, offset by a slowdown in the foodservice markets. Revenue for the segment increased 7% to R470 million (2019: R441 million) with operating profit decreasing 2% to R40 million (2019: R41 million) after accounting for R750 000 of direct COVID-19 related expenses. With retail markets benefiting from increased in-home consumption, the retail channel mix increased from 63% to 70% of segment revenue.

Australian operations: Revenue for the period increased 24% to R226 million (2019: R182 million), benefiting from significant growth in the trading division on the back of higher sales of South African hake.

This was offset by lower sales from the fishing division as a result of a delayed start to the prawn fishing season in 2020 and a slowdown in high-end foodservice markets to which the business supplies its high-value prawns, scallops and crabs. The Group also benefited from a 12% depreciation in the Rand to the Australian Dollar. As a result of the higher proportion of traded products in the basket for the period, the gross profit margin has diluted from 25% to 19%.

With R5.5 million of COVID-19 relief in Australia offsetting the slowdown in markets and disruption to operations, the segment delivered operating profit of R2 million (2019: R3 million loss). The business also delivered R4 million of overhead savings for the period as a result of the minority buyout and subsequent de-listing from the ASX in 2019.

Cash flow and financial position

The Group generated cash from operations of R347 million (2019: R385 million) during the period after investing R74 million (2019: R38 million) in working capital, indicating the impact of COVID-19 on the Group and the markets in which it operates. The investment in working capital reflects:

- higher levels of inventory as a result of the slowdown in the foodservice markets, higher levels of abalone inventory and the later start to the Shark Bay fishing season; and
- higher levels of debtors as a result of increased sales in May and June 2020 as lockdowns eased. The debtors' book was well managed during the period.

The Group utilised R189 million (2019: R693 million, including the R558 million acquisition of Ladismith Cheese on 1 January 2019) in investing activities during the period including:

- ➤ R155 million (2019: R107 million) invested in additions to property, plant and equipment; and
- \succ R34 million (2019: R35 million) in biological assets.

During the period the Group utilised R183 million of cash in financing activities after advancing loans of R56 million to related parties, paying a dividend of R147 million (2019: R117 million) and raising a net R36 million of borrowings during the period.

The Group opened the period with cash of R229 million on hand, utilised R116 million of cash during the period, and ended the period with R114 million of cash on hand. With interest-bearing borrowings of R1.294 billion, the Group's net interest-bearing debt position for the period ended 30 June 2020 was R1.180 billion.

COMMENTARY CONTINUED

COVID-19

Stringent measures, aligned to new regulations, were introduced to safeguard the health and well-being of our employees, preserve jobs and hence livelihoods, ensure food security through the continuity of operations and ensure the Group's ability to continue meeting stakeholders' expectations in terms of product demand.

The COVID-19 virus has had an effect on the performance of the Group since early January 2020. Italy, Spain and China are core markets for the Group and these markets were in lockdown from the beginning of the year. This was followed on the supply side with the virus impacting the Saldanha facilities during the months of May, June and July, with August seeing the Saldanha region through the peak. The outbreak of the virus resulted in significant disruption, increased absenteeism and lower throughput.

The Group took a proactive approach to COVID-19, establishing a COVID-19 Executive Task Team early in the pandemic, led by the Group CEO and including the managing directors, senior executives and COVID-19 officers of each business/site, and involved a four-pronged strategy:

- ➤ Communication: Included regular communications and feedback with key stakeholders through multiple communication platforms as well as regular contact with COVID-19 positive employees, close contacts and persons in isolation in order to assist with their needs and ensure their well-being.
- ➤ **Prevention:** These measures included: health screening; hygiene procedures; physical distancing, limited access points and Personal Protective Equipment (PPE); private transport and work from home options to contain the spread of the virus.

> Disruption:

- In order to mitigate the disruption to production and operations, the Group segregated production facilities into smaller units.
- From a demand-side mitigation perspective, the Group looked to prioritise markets and channels that were open and to balance supply with demand.
- From a supply chain disruptions perspective, the Group ensured that supply chains (including access to ports) remained open so that the Group could continue to ship and export.

Lockdown:

- Regular contact maintained with COVID-19 positive employees as well as close contacts and persons in isolation in order to assist with their needs and well-being. This included assisting staff who were ill with the delivery of hygiene and food parcels as well as the completion of TERS/illness benefit applications.
- Conserving cash: Suspending all non-critical capital expenditure with an increased focus on working capital.

The Group has spent in excess of R16.7 million in South Africa on direct COVID-19 related costs.

Driving transformation

Sea Harvest Group is proud to have retained a Level 1 B-BBEE contributor status.

Driving transformation within Sea Harvest and the fishing industry more broadly is central to Sea Harvest's existence and strategy. Accordingly, the Group invests significant resources in skills development, employment equity, supplier and enterprise development initiatives, as well as projects focused on job creation, the youth and rural development.

Sea Harvest is a co-founding member of the South African Fisheries Development Fund, a joint initiative with Brimstone. The fund was established to empower small-scale businesses in the fishing and allied sectors.

During the period, the Sea Harvest Foundation spent in excess of R3.2 million on community-based projects. This included the Group distributing more than 10 000 food parcels throughout the Western Cape, Southern Cape and Eastern Cape in order to support the vulnerable during the COVID-19 lockdown.

Dividends

In accordance with the Group's dividend policy, no interim dividend is declared or proposed for the six months ended 30 June 2020.

Outlook

The FRAP 2020/21 guidelines have been gazetted, with the timelines indicating that the FRAP process would begin in October 2020 and culminate in December 2021.

While markets are generally more settled since the first outbreaks in December 2019, and living with COVID-19 becomes the norm, it is difficult to estimate the impact of the pandemic on the supply chain and the markets. The situation is fluid as various markets re-establish different lockdowns on the back of second or third COVID-19 outbreaks or indeed, lift lockdowns on the back of recoveries.

The Group will continue to focus on its COVID-19 protocols to ensure the safety and well-being of its employees; continue to match supply with demand and conserve cash through the suspension of non-critical capital expenditure; and continue with its focus on sound working capital management.

Management will also prioritise improving the performance of operations in the second half of the year in order to re-establish efficiency ratios, which have been impacted by the effects of COVID-19.

We wish to thank our employees for their loyalty, dedication, care and professionalism in contributing to the success of the Group in this most trying of times.

Any forward-looking statement included in this Outlook section has not been reviewed or reported on by the auditors.

^{*} The financial results for the period ended 30 June 2019 have been restated for the finalisation of the purchase price allocation of the Ladismith Cheese business combination. Refer to note 3.

¹ Movement in other reserves is largely as a result of the Group's export hedges being out of the money as a result of the Rand weakening against the US Dollar, the Euro and the Australian Dollar, offset by the effects of the foreign currency translation on foreign operations.

² Financial liabilities increased as a result of the Group's export hedges being out of the money due to the Rand weakening against the US Dollar, the Euro and the Australian Dollar.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

for the six months ended 30 June 2020

1. BASIS OF PREPARATION

The condensed consolidated interim financial statements have been prepared in accordance with, and contain the information required by IAS 34: Interim Financial Reporting, the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council, the Listings Requirements of the JSE Limited and the requirements of the Companies Act of South Africa, No 71 of 2008. The condensed financial information has been prepared under the supervision of the Chief Financial Officer, M Brey CA(SA).

The information has not been audited or reviewed by the Group's auditors, Deloitte & Touche.

2. ACCOUNTING POLICIES

The accounting policies applied in the preparation of these condensed consolidated interim financial statements are in terms of International Financial Reporting Standards and are consistent with those applied in the financial statements for the year ended 31 December 2019.

3. RESTATEMENT OF THE FINANCIAL RESULTS FOR THE PERIOD ENDED 30 JUNE 2019

The financial results for the period ended 30 June 2019 have been restated for the finalisation of the purchase price allocation of the Ladismith Cheese business combination. The relevant effects of this adjustment to the statement of financial position are summarised as follows:

	PROVISIONAL Fair Value Reported at 30 June 2019 R'000	MEASUREMENT Period Adjustments R'000	RESTATED Closing Balance R'000
Assets acquired and liabilities assumed			
Intangible assets	_	45 813	45 813
Deferred tax liabilities	(35 983)	(13 695)	(49 678)
Total identifiable assets and liabilities	(35 983)	32 118	(3 865)
Goodwill	262 699	(32 118)	230 581

The intangible asset identified was the Ladismith Cheese brand. The fair value was determined by an external independent valuer with reference to the best estimate of a market participant's ability to generate economic benefits by using the asset in its highest and best use.

The Ladismith Cheese brand's useful life was assessed as indefinite, as management has, based on an analysis of relevant factors, concluded that there is no foreseeable limit to the period over which the brand is expected to generate net cash inflows for the Group. As such, the restatement does not have any impact on prior period retained earnings and profit.

AUDITED Year ended 31 december 2019 R'000		UNAUDITED SIX MONTHS ENDED 30 JUNE 2020 R'000	UNAUDITED SIX MONTHS ENDED 30 June 2019 R'000
REVENUE			
	Group revenue for the period can be analysed as follows:		
3 938 116	Revenue recognised at a point in time	1 989 960	1 856 805
28 336	Revenue recognised over time	9 688	13 317
3 966 452		1 999 648	1 870 122
	Revenue from sale of goods comprises:		
2 510 694	Wild-caught fish ¹	1 316 691	1 200 092
267 297	Shellfish ²	118 332	115 721
94 499	Vegetables and meals	45 490	49 875
190 171	Traded	89 275	103 892
903 791	Dairy	429 860	387 225
3 966 452		1 999 648	1 856 805
	Revenue is further split by geographic location as follows:		
2 209 799	South Africa	1 085 449	1 034 570
447 178	Australia	240 127	202 197
1 113 675	Europe	590 916	558 179
195 800	Other markets	83 156	75 176
3 966 452		1 999 648	1 870 122

Revenue from wild-caught fish is disclosed in the South African Fishing and Australian segments. Shellfish revenue is disclosed in the South African Fishing, Australian and Aquaculture segments. Vegetables and meals is disclosed in the Cape Harvest Foods and Australian segments, with dairy revenue disclosed in the Cape Harvest Foods segment. Traded revenue is disclosed in the South African Fishing and Cape Harvest Foods segments.

4.

¹ Cape hake, Horse Mackerel and related bycatch.

² Prawns, scallops, crabs and abalone.

	21 088	Current portion of financial liability	12 881	21 205

¹ CALL OPTION DERIVATIVE

Included in non-current financial assets is a call option to acquire 100% of the shareholding in Vuna Fishing Company Proprietary Limited from Vuna Fishing Group Proprietary Limited. The fair value was independently determined by an expert using the Black-Scholes option pricing model. The call option financial asset has been classified as a non-current asset at 30 June 2020 due to the expected exercising date thereof exceeding 12 months from the reporting date. The call option disclosed in financial assets is regarded as a level 3 financial instrument for fair value measurement purposes. Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The movement in the call option derivative is as follows:

25 912	Opening balance	23 218	25 912
(2 694)	Fair value movement	1 853	(1 235)
23 218	Closing balance	25 071	24 677

Assumption sensitivity analysis

The Group has performed a sensitivity analysis relating to its exposure to a change in the assumptions used in the valuation. The sensitivity analysis demonstrates the increase/(decrease) in the asset held at fair value through profit or loss which could result from a change in these assumptions.

As Vuna Fishing Company Proprietary Limited is unlisted, the volatility was determined using the quadratic mean volatility of peer group companies.

² FINANCIAL DERIVATIVE ASSETS AND LIABILITIES

Financial assets and liabilities arise from hedging contracts entered into by the Group for the purpose of minimising the Group's exposure to foreign currency volatility. Hedging contracts are regarded as level 2 financial instruments for fair value measurement purposes. Level 2 fair value measurements are those derived from inputs that are observable for the asset or liability, either directly, i.e. as prices or indirectly, i.e. derived from prices.

³ INVESTMENT AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME

The Group holds 10% of the ordinary share capital of Desert Diamond Fishing Proprietary Limited, a company involved in the fishing and fish processing industries.

The Group reassesses the valuation of the fair value through other comprehensive income investment annually by using an asset valuation method performed by an independent valuator.

This investment is regarded as a level 3 financial instrument. Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Assumption sensitivity analysis

The Group has performed a sensitivity analysis relating to its exposure to a change in the assumptions used in the valuation. The sensitivity analysis demonstrates the increase/(decrease) on the investment which could result from a change in this assumption.

	Desert Diamond vessel valuation		
1 263	+5%	1 263	1 263
(1 263)	-5%	(1 263)	(1 263)

⁴ FISHING LICENCE LIABILITY

The fishing licence liabilities relate to the Shark Bay Prawn Managed Fishery Voluntary Fisheries Adjustment Scheme (VFAS). The VFAS operates from 12 November 2010 until 1 July 2021. Sea Harvest Australia owns 10 fishing licences in the Shark Bay region. The liabilities shown represent present values discounted at the five-year Australian Corporate Bond rate. Fishing licence liabilities are carried at amortised cost.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS CONTINUED

for the six months ended 30 June 2020

8. CONTINGENT CONSIDERATION

The contingent consideration relates to the acquisition of Viking Fishing and Viking Aquaculture in the 2018 financial year and was estimated by an independent valuer based on Viking Fishing and Viking Aquaculture achieving the earn-out targets for the 2018 and 2019 financial years, discounted at the prime lending rate. It is regarded as a level 3 financial instrument for fair value measurement purposes. Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The movement in the contingent consideration is as follows:

AUDITED Year ended 31 december 2019 R'000		UNAUDITED SIX MONTHS ENDED 30 JUNE 2020 R'000	UNAUDITED SIX MONTHS ENDED 30 JUNE 20 19 R'000

Closing balance	294 293 814	14 533 154	279 760 660

11. COVID-19 PANDEMIC ASSESSMENT AND GOING CONCERN

- > The Group is fully committed to the preventative measures implemented by various governments since early 2020 to contain the spread of COVID-19 in the countries in which it operates, with our primary priority being to ensure the health and safety of our employees, preserve jobs and hence livelihoods, to ensure food security through the continuity of operations and to ensure the Group's ability to continue meeting stakeholders' expectations in terms of product demand.
- As an essential food manufacturer, the Group was exempt from lockdown and allowed to continue to operate. The Group benefited from increased demand for retail products as consumers stocked up for lockdown, however this was offset by a slowdown in the Group's foodservice markets. The Aquaculture operation, however, with its main market being China, experienced a significant decline in abalone sales due to lockdowns, first in Hong Kong and then in South Africa. As a result of lower-than-expected financial performance of the aquaculture segment, management performed an assessment of goodwill impairment as at 30 June 2020. The recoverable amount of this cash-generating unit, determined based on a value-in-use calculation, resulted in a surplus over its carrying value. The directors believe that a reasonably possible change in the assumptions would not result in an impairment of the carrying value of goodwill.
- > The calculation uses cash flow projections based on financial budgets approved by the Board, covering a five-year period. The key estimates used in the value-in-use calculation included a pre-tax discount rate of 14.27%, terminal growth rate of 2% and a five-year average revenue growth of 29%. As a result of the pandemic, significant judgment was required in estimating future saleable quantities of abalone.
- > There have been significant fluctuations in the foreign currencies that the Group trades in for the six-month period ended 30 June 2020. The impact of the devaluation of the South African Rand against the US Dollar, the Euro and the Australian Dollar resulted in the hedges on export sales moving to an out of the money position. For foreign sales, the Group continues to apply its hedging strategy where fair value movements on the hedging instruments are deferred in equity until such time as the hedged transaction is recognised.

GOING CONCERN

Management has assessed the going concern assumption taking into account the impact of COVID-19, which took into account cash flow analysis, operational analysis and available funding facilities. The cash flow analysis considered all factors impacting the ability of the Group to generate or preserve cash. Such factors included limitations of COVID-19 on production and the resulting sales, fixed costs, capital expenditure plans that would require funding as well as available facilities. The result of these analyses was that the Group will have sufficient cash resources to sustain operations. An analysis of the potential impact of COVID-19 on funding covenants was also considered and management is of the view that funding covenants will not be breached. Therefore, the directors have no reason to believe that the Group will not be a going concern in the foreseeable future and accordingly, the interim financial statements have been prepared on a going concern basis.

12. EVENTS SUBSEQUENT TO REPORTING DATE

Other than the items outlined in note 11 which the Group continues to assess, there has not arisen in the interval between the reporting date and the date of this report any item, transaction or event of a material and unusual nature likely, in the opinion of the directors of the Company, to affect substantially the operations of the Group, the results of its operations or the state of affairs of the Group.
