STATEMENT BY THE CEO AND CFO

Pursuant to the Company's ALT.X listing on the Johannesburg Stock Exchange (JSE) and in compliance with paragraph 3.84(k) of the JSE Listings Requirements each of the directors, whose names are stated below, hereby confirm that:

- a) the annual financial statements set out on pages 12 to 53, fairly present in all material respects the financial position, financial performance and cash flows of Alphamin Resources Corp. in terms of International Financial Reporting Standards (IFRS);
- b) To the best of our knowledge and belief, no facts have been omitted or untrue statements made that would make the annual financial statements false or misleading;
- c) internal financial controls have been put in place to ensure that material information relating to Alphamin Resources Corp. and its consolidated subsidiaries have been provided to effectively prepare the financial statements of the issuer; and
- d) the internal financial controls are adequate and effective and can be relied upon in compiling the annual financial statements, having fulfilled our role and function as executive directors with primary responsibility for implementation and execution of controls. Where we are not satisfied, we have disclosed to the Audit and Risk Committee and the auditors any deficiencies in design and operational effectiveness of the internal financial controls and have taken steps to remedy the deficiencies.
- e) We are not aware of any fraud involving directors.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The following statement, which should be read in conjunction with the auditors' responsibility stated in the auditors' report set out in the Independent Auditor's Report, is made with a view to distinguishing the respective responsibilities of management and those of the auditors in relation to the consolidated financial statements of the Company.

The accompanying consolidated financial statements of Alphamin Resources Corp. (the "Company") were prepared by management in accordance with International Financial Reporting Standards. Management acknowledges responsibility for the preparation and presentation of the consolidated financial statements, including responsibility for significant accounting judgments and estimates and the choice of accounting principles and methods that are appropriate to the Company's circumstances, including the going concern assessment.

Management has established systems of internal control over the financial reporting process, which are designed to provide reasonable assurance that relevant and reliable financial information is produced.

The Board of Directors of the Company is responsible for ensuring that management fulfills its financial reporting responsibilities and for reviewing and approving the consolidated financial statements together with other financial information. An Audit and Risk Committee, whose members are not officers of the Company, assists the Board of Directors in fulfilling this responsibility. The Audit and Risk Committee, on behalf of the Board of Directors, meets with management to review the internal controls over the financial reporting process, the consolidated financial statements together with other financial information of the Company, and the auditor's report. The Audit and Risk Committee reports its findings to the Board of Directors for its consideration in approving the consolidated financial statements for issuance to the shareholders. Management recognises its responsibility for conducting the Company's affairs in compliance with established financial standards and applicable laws and regulations, and for maintaining proper standards of conduct for its activities.

Independent auditor's report

To the Shareholders of Alphamin Resources Corp.

Report on the audit of the consolidated financial statements

Our opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of Alphamin Resources Corp. (the Company) and its subsidiaries (together the Group) as at 31 December 2022, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards.

What we have audited

Alphamin Resources Corp.'s consolidated financial statements set out on pages 12 to 53 comprise:

- the consolidated statement of financial position as at 31 December 2022;
- the consolidated statement of profit/(loss) and comprehensive profit/(loss) for the year then ended;
- the consolidated statement of cash flows for the year then ended;
- the consolidated statement of changes in stockholders' equity for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated and separate financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the Independent Regulatory Board for Auditors' *Code of Professional Conduct for Registered Auditors* (IRBA Code) and other independence requirements applicable to performing audits of financial statements in South Africa. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code and in accordance with other ethical requirements applicable to performing audits in South Africa. The IRBA Code is consistent with the corresponding sections of the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)*.

The Company's principal place of business is at 4 Lisbon Lane, Waterfall City, Jukskei View, where a list of directors' names is available for inspection.
Reg. no. 1998/012055/21, VAT reg.no. 4950174682.

Our audit approach

Overview

	Overall group materiality <ul style="list-style-type: none"> Overall group materiality: \$9.2 million, which represents 5% of consolidated profit before taxes.
	Group audit scope <ul style="list-style-type: none"> The Group consists of 5 components, 2 of which are operating components. Full scope audits were performed on the 2 operating components due to their financial significance to the Group
	Key audit matters <ul style="list-style-type: none"> Provision for closure and reclamation.

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the consolidated financial statements. In particular, we considered where the directors made subjective judgements; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

Materiality

The scope of our audit was influenced by our application of materiality. An audit is designed to obtain reasonable assurance whether the financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the consolidated financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the overall group materiality for the consolidated financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

<i>Overall group materiality</i>	\$ 9.2 million.
<i>How we determined it</i>	5% of consolidated profit before taxation

Rationale for the materiality benchmark applied

We chose consolidated profit before taxation as the benchmark because, in our view, it is the benchmark against which the performance of the Group is most commonly measured by users and is a generally accepted benchmark. We chose 5% which is consistent with quantitative materiality thresholds used for profit-oriented companies in this sector.

How we tailored our group audit scope

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the consolidated financial statements as a whole, taking into account the structure of the Group, the accounting processes and controls, and the industry in which the Group operates.

The Group consists of 5 components, 2 of which are operating components. These 2 operating components are the corporate head office in Mauritius and the Bisie tin mine in the Democratic Republic of the Congo. Full scope audits were performed on the 2 operating components due to their financial significance to the Group.

In establishing the overall audit approach to the group audit, we determined the type of work that needed to be performed by ourselves, as the group engagement team, and the component auditor from another PwC network firm. We communicated group instructions to the component auditor, and comprehensive audit approach and strategy planning meetings were held with them before commencing their audit work. We examined the reporting received from the component auditor and assessed the impact thereof on the consolidated financial statements. We also examined the working papers of the component auditor relating to areas of significant risks in the consolidated financial statements.

Further audit procedures were performed by the group engagement team, including substantive procedures over the consolidation process. The work carried out at the component levels, together with these additional procedures performed at the group level, provided us with sufficient evidence to express an opinion on the consolidated financial statements as a whole.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of our audit of the consolidated and separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

<i>Key audit matter</i>	<i>How our audit addressed the key audit matter</i>
<p><i>Valuation of the provision for closure and reclamation</i></p> <p>Refer to Summary of Significant Accounting policies N (Provision for Environmental Rehabilitation) and note 16 (Provision for</p>	<p>Through our discussions with management and inspection of underlying calculations, we gained an understanding of the methodology and</p>

closure and reclamation) to the consolidated financial statements.

As of 31 December 2022, the Group's provision for closure and reclamation (the "provision") amounted to \$ 10.9 million.

Management reviews the provision on an annual basis, using experts to provide support in its assessment where appropriate.

The current year increase in the financial provision was due to changes in closure costs estimates as well as an increased long term inflation rate.

The determination of the provision for closure and reclamation was considered to be a matter of most significance to the current year audit due to:

- The significant judgement and assumptions relating to the closure costs estimates and discount rates applied by management in determining the provision; and
- The significance of the potential risk of material misstatement inherent in determining the provision.

models applied by management in determining the provision for closure and reclamation.

Making use of our sustainability and environmental expertise, we performed the following procedures:

- We assessed management's model used to calculate the provision and found this to be materially consistent with industry practice.
- We assessed the objectivity, competence and experience of management's external experts through inspection of Curriculum Vitae ("CVs") and membership certificates from professional bodies where applicable. No aspects requiring further consideration were noted.
- We assessed the appropriateness of the underlying cost assumptions by evaluating that costs underpinning the provision represent management's and the experts' best estimate of expenditure. As part of this evaluation, we considered the required rehabilitation activities against the mining activity to date, the costs of those activities against current best estimates of costs relating to those activities, and consistency of the cash flows in the rehabilitation model with the Group's rehabilitation and closure plans. We noted no material aspects in this regard requiring further consideration.
- We assessed whether the closure costs used by management's experts considered the requirements of the relevant laws and regulations, both to assess whether a legal obligation exists to raise the provision, as well as to identify potential environmental liabilities that were not provided for which could be of material significance and noted no material exceptions in this regard.

We independently recalculated management's discount rates applied with reference to relevant third-party sources. Where discount rates determined by us differed from that used by management, the impact of such differences was assessed to be immaterial.

We benchmarked management's LT inflation rate against independent 3rd party data. Where long term inflation rates obtained by us differed from that used by management, the impact of such differences was assessed to be immaterial.

We tested the mathematical accuracy of the model used by management by performing an independent recalculation and comparing the results of our calculation with management's calculations. We noted no material differences.

Emphasis of Matter

We draw attention to Note 1 to these consolidated financial statements, which indicates that the Company prepares consolidated financial statements to comply with the Toronto Stock Exchange's TSX Venture Exchange and the Johannesburg Stock Exchange's Alternative Exchange requirements and also prepares consolidated and company financial statements for Mauritian statutory purposes. We note that the second set of financial statements, prepared to comply with the Mauritian statutory requirements will be subject to a separate audit. Our opinion is not modified in respect of this matter.

Other information

The directors are responsible for the other information. The other information comprises the information included in the document titled "Alphamin Resources Corp. Consolidated Financial Statements (expressed in US Dollars) for the years ended December 31, 2022 and 2021", and the document titled "Alphamin Resources Corp. Management's Discussion and Analysis (All figures expressed in US Dollars unless otherwise indicated) for the years ended December 31, 2022 and 2021" which we obtained prior to the date of this auditor's report, and the document titled "Alphamin Resources Corp. Consolidated and Company Financial Statements (expressed in US Dollars) for the years ended December 31, 2022 and 2021", which is expected to be made available to us after that date. The other information does not include the consolidated or the separate financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the consolidated and separate financial statements

The directors are responsible for the preparation and fair presentation of the consolidated financial statements in accordance with International Financial Reporting Standards and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the consolidated and separate financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our

conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The accompanying notes are an integral part of these consolidated financial statements.

NOTES TO THE FINANCIAL STATEMENTS

1. NATURE AND CONTINUANCE OF OPERATIONS

Alphamin Resources Corp. (the “Company”) is governed by the laws of Mauritius. The Company’s primary business is the production and sale of tin concentrate from the Bisie Tin mine in the Democratic Republic of the Congo (“DRC”). The registered office is located at C/o ADANSONIA MANAGEMENT SERVICES LIMITED, Suite 1, PERRIERI OFFICE SUITES, C2-302, Level 3, Office Block C, La Croisette, Grand Baie 30517, Mauritius. The Company was previously incorporated under the laws of British Columbia, Canada, however it was continued in Mauritius effective on September 30, 2014. The Company’s shares are listed on the Toronto Stock Exchange’s TSX Venture Exchange (primary listing) and the Johannesburg Stock Exchange’s Alternative Exchange (Alt.X) (secondary listing). The Company prepares consolidated financial statements to comply with the Canadian and JSE listing requirements and also prepares consolidated and company financial statements to comply with the Mauritian statutory requirements. In these consolidated financial statements, unless the context otherwise dictates, a reference to the Company refers to Alphamin Resources Corp. and its subsidiaries. These consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes the realisation of assets and satisfaction of liabilities in the normal course of business.

A. DEVELOPMENTS IN THE CURRENT PERIOD

COVID-19 update

The Company continued uninterrupted throughout the Covid-19 pandemic. Management considers it unlikely that Covid-19 will cause significant interruption to the business going forward.

Exploration efforts have yielded strong results with a maiden resource being announced at Mpama South on March 7, 2022. This was subsequently updated on two occasions by end May 2022. A decision to commence with the development of the Mpama South project was announced on March 29, 2022. The Mpama South plant is expected to commission in December 2023.

During Q1, 2022 the Company announced and paid a maiden dividend of CAD 03 cents per share. On July 5, 2022 the Company announced a further dividend of CAD 03 cents per share and post year end announced a final dividend for FY2022 of CAD 03 cents per share.

B. GOING CONCERN

As at December 31, 2022, the Company had an retained earnings of \$38,806,657, stockholders’ equity of \$320,424,942 and net current assets of \$109,210,096. (December 31, 2021: accumulated deficit of (\$433,332), stockholders’ equity of \$274,727,136 and net current assets of \$87,183,449.)

Management have reviewed the working capital position and cashflow forecasts for the year and are comfortable that the going concern is appropriate.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. BASIS OF PREPARATION

These consolidated financial statements, including comparatives, have been prepared using accounting policies consistent with *International Financial Reporting Standards (IFRS)* as issued by the *International*

Accounting Standards Board (IASB) and Interpretations issued by the *International Financial Reporting Interpretations Committee (IFRIC)*. These consolidated financial statements have been prepared on a historical cost basis except for share-based payments and certain financial assets, which have been measured at fair value. In addition, the consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

Application of new and revised standards

The following standards became effective for annual periods beginning on or after January 1, 2022. The Company adopted these standards in the current period, and they did not have a material impact on its consolidated financial statements unless specifically mentioned below.

International Financial Reporting Standards and amendments effective for the first time for <i>December 2022 year-end</i>		
Number	Effective date	Executive summary
IFRS 16, 'Leases' COVID-19-Related Rent Concessions Amendment (Covid-19 related rent concessions extended to 30 June 2022)	Annual periods beginning on or after 1 June 2020 (early adoption is permitted) (Published March 2021)	The IASB has provided lessees (but not lessors) with relief in the form of an optional exemption from assessing whether a rent concession related to COVID-19 is a lease modification, provided that the concession meets certain conditions. On 31 March 2021, the IASB published an additional amendment to extend the date of the practical expedient from 30 June 2021 to 30 June 2022. Lessees can elect to account for such rent concessions in the same way as they would if they were not lease modifications. In many cases, this will result in accounting for the concession as variable lease payments in the period(s) in which the event or condition that triggers the reduced payment occurs. The March 2021 amendment will only be available if an entity chose to apply the May 2020 optional practical expedient.
Annual improvements cycle 2018 -2020	Annual periods beginning on or after 1 January 2022 (Published May 2020)	These amendments include minor changes to: <ul style="list-style-type: none"> IFRS 1, 'First time adoption of IFRS' has been amended for a subsidiary that becomes a first-time adopter after its parent. The subsidiary may elect to measure cumulative translation differences for foreign operations using the amounts reported by the parent at the date of the parent's transition to IFRS. IFRS 9, 'Financial Instruments' has been amended to include only those costs or fees paid between the borrower and the lender in the calculation of "the 10% test" for derecognition of a financial liability. Fees paid to third parties are excluded from this calculation. IFRS 16, 'Leases', amendment to the Illustrative Example 13 that accompanies IFRS 16 to remove

		<p>the illustration of payments from the lessor relating to leasehold improvements. The amendment intends to remove any potential confusion about the treatment of lease incentives.</p> <ul style="list-style-type: none"> IAS 41, 'Agriculture' has been amended to align the requirements for measuring fair value with those of IFRS 13. The amendment removes the requirement for entities to exclude cash flows for taxation when measuring fair value.
Amendments to IAS 37 Onerous Contracts—Cost of Fulfilling a Contract	Annual periods beginning on or after 1 January 2022 (Published May 2020)	The amendment clarifies which costs an entity includes in assessing whether a contract will be loss-making. This assessment is made by considering unavoidable costs, which are the lower of the net cost of exiting the contract and the costs to fulfil the contract. The amendment clarifies the meaning of 'costs to fulfil a contract'. Under the amendment, costs to fulfil a contract include incremental costs and the allocation of other costs that relate directly to fulfilling the contract.
Amendments to IAS 16 Property, Plant and Equipment: Proceeds before Intended Use	Annual periods beginning on or after 1 January 2022 (Published May 2020)	<p>The amendment to IAS 16 prohibits an entity from deducting from the cost of an item of PPE any proceeds received from selling items produced while the entity is preparing the asset for its intended use (for example, the proceeds from selling samples produced when testing a machine to see if it is functioning properly). The proceeds from selling such items, together with the costs of producing them, are recognised in profit or loss.</p> <p>The Group does not deduct the proceeds from selling items produced while bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management from the cost of property, plant and equipment. Therefore the amendment has no impact on the consolidated financial statements.</p>
Amendment to IFRS 3, 'Business combinations' Asset or liability in a business combination clarity	Annual periods beginning on or after 1 January 2022 (Published May 2020)	<p>The Board has updated IFRS 3, 'Business combinations', to refer to the 2018 Conceptual Framework for Financial Reporting, in order to determine what constitutes an asset or a liability in a business combination.</p> <p>In addition, the Board added a new exception in IFRS 3 for liabilities and contingent liabilities. The exception specifies that, for some types of liabilities and contingent liabilities, an entity applying IFRS 3 should instead refer to IAS 37, 'Provisions, Contingent</p>

		<p>Liabilities and Contingent Assets', or IFRIC 21, 'Levies', rather than the 2018 Conceptual Framework.</p> <p>The Board has also clarified that the acquirer should not recognise contingent assets, as defined in IAS 37, at the acquisition date.</p>
--	--	---

Future accounting changes

The following new standards, amendments to standards and interpretations have been issued but are not effective during the year ended December 31, 2022. The Company has not yet adopted these new and amended standards. The Company has considered the amendments and assessed that they will have no material impact on adoption.

International Financial Reporting Standards, interpretations and amendments issued but not effective		
Number	Effective date	Executive summary
IFRS 17, 'Insurance contracts'	<p>Annual periods beginning on or after 1 January 2023</p> <p>Early application is permitted for entities that apply IFRS 9, 'Financial Instruments', and IFRS 15, 'Revenue from Contracts with Customers', at or before the date of initial application of IFRS 17.</p> <p>(Published May 2017)</p>	<p>The IASB issued IFRS 17, 'Insurance contracts', and thereby started a new epoch of accounting for insurers. Whereas the current standard, IFRS 4, allows insurers to use their local GAAP, IFRS 17 defines clear and consistent rules that will significantly increase the comparability of financial statements. For insurers, the transition to IFRS 17 will have an impact on financial statements and on key performance indicators.</p> <p>Under IFRS 17, the general model requires entities to measure an insurance contract at initial recognition at the total of the fulfilment cash flows (comprising the estimated future cash flows, an adjustment to reflect the time value of money and an explicit risk adjustment for non-financial risk) and the contractual service margin. The fulfilment cash flows are remeasured on a current basis each reporting period. The unearned profit (contractual service margin) is recognised over the coverage period.</p> <p>Aside from this general model, the standard provides, as a simplification, the premium allocation approach. This simplified approach is applicable for certain types of contract, including those with a coverage period of one year or less.</p> <p>For insurance contracts with direct participation features, the variable fee approach applies. The variable fee approach is a variation on the general model. When applying the variable fee approach, the entity's share of the fair value changes of the</p>

		underlying items is included in the contractual service margin. As a consequence, the fair value changes are not recognised in profit or loss in the period in which they occur but over the remaining life of the contract.
IFRS 17, Insurance Contracts Amendments	Annual periods beginning on or after 1 January 2023 (Published June 2020)	In response to some of the concerns and challenges raised, the Board developed targeted amendments and a number of proposed clarifications intended to ease implementation of IFRS 17, simplify some requirements of the standard and ease transition. The amendments relate to eight areas of IFRS 17, and they are not intended to change the fundamental principles of the standard or unduly disrupt implementation already underway.
Amendment to IAS 1, 'Presentation of Financial Statements' on Classification of Liabilities as Current or Non-current	Annual periods beginning on or after 1 January 2023 (Published Jan 2020)	The amendment clarifies that liabilities are classified as either current or non-current, depending on the rights that exist at the end of the reporting period. A number of requirements are required to be met in conjunction with this amendment.
Amendments to IAS 12, Income Taxes: Deferred Tax related to Assets and Liabilities arising from a Single Transaction	Annual periods beginning on or after 1 January 2023. Earlier application is permitted. (Published May 2021)	The amendments require companies to recognise deferred tax on transactions that on initial recognition give rise to equal amounts of taxable and deductible temporary differences.
Narrow scope amendments to IAS 1 'Presentation of Financial Statements', Practice statement 2 and IAS 8 'Accounting Policies, Changes in Accounting Estimates and Errors'	Annual periods beginning on or after 1 January 2023. Earlier application is permitted. (Published February 2021)	The amendments aim to improve accounting policy disclosures and to help users of the financial statements to distinguish changes in accounting policies from changes in accounting estimates.

B. BASIS OF CONSOLIDATION

These consolidated financial statements incorporate the financial statements of the Company and its controlled subsidiaries. Control exists when an investor (the Company) has power over an investee (the Subsidiaries) that give it the current ability to direct the relevant activities.

These consolidated financial statements include the accounts of the Company and its controlled subsidiaries, as follows:

NAME OF SUBSIDIARY	COUNTRY OF INCORPORATION	PRINCIPAL ACTIVITY
Alphamin Bisie Mining SA (Formerly called Mining and Processing, Congo, SARL)	Democratic Republic of the Congo	Mining (84.14% owned by Alphamin Resources (BVI) Ltd)
Alphamin South Africa (Pty) Limited	South Africa	Holding Company (100% wholly owned by Parent)
Alphamin Holdings (BVI) Ltd	British Virgin Islands	Holding Company (100% wholly owned by Parent)
Alphamin Resources (BVI) Ltd	British Virgin Islands	Holding Company (100% wholly owned by Alphamin Holdings (BVI) Ltd)

All intercompany transactions and balances have been eliminated.

Following the receipt of mining license number PE13155 and in line with Article 71 of the Mining Code 2002, 5% of the shares of Alphamin Bisie Mining SA (ABM), were issued to the Government of the Democratic Republic of the Congo. The Industrial Development Corporation of South Africa Limited (IDC) has direct ownership of 10.86% of ABM. The Government of the Democratic Republic of the Congo owns a non-diluting 5% resulting in a Company ownership of ABM of 84.14%.

C. MEASUREMENT UNCERTAINTY AND CRITICAL JUDGEMENTS

The preparation of financial statements in accordance with IFRS as issued by the *International Accounting Standards Board (IASB)* and interpretations of the *International Financial Reporting Interpretations Committee (IFRS IC)* requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Such estimates and assumptions, which by their nature are uncertain, affect the carrying value of assets. Other significant estimates made by the Company include factors affecting valuations of share-based compensation and income tax accounts. The Company regularly reviews its estimates and assumptions, however actual results could differ from these estimates and these differences could be material and would not be considered an error. Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

Provision for closure and reclamation

The Company's operations are subject to environmental regulations in the Democratic Republic of Congo. Upon establishment of commercial viability of the Bisie Tin Mine and subsequent commencement of development activity, the Company estimated the cost to restore the site following the completion of commercial activities and depletion of reserves.

These future obligations are estimated by taking into consideration closure plans, known environmental impacts, and internal and external studies, which estimate the activities and costs that will be carried out to meet the decommissioning and environmental rehabilitation obligations. The Company records a liability and a corresponding asset for the present value of the estimated costs of legal and constructive obligations for mine rehabilitation, based on environmental disturbances incurred up to the end of each reporting period. During the mine rehabilitation process, there will be a probable outflow of resources required to settle the obligation and a reliable estimate can be made of those obligations. The present value is determined based on current market assessments using the risk-free rate of borrowing which is approximated by the yield of government bonds with a maturity similar to that of the mine life. The discounted liability is adjusted at the end of each reporting period with the passage of time and for the estimated rehabilitation cost related to any new environmental disturbances incurred during that period. The provision represents management's best estimate of the present value of the future mine rehabilitation costs, which may not be incurred for several years or decades, and, as such, actual expenditures may vary from the amount currently estimated. The decommissioning and environmental rehabilitation cost estimates could change due to amendments in laws and regulations in the Democratic Republic of Congo. Additionally, actual estimated costs may differ from those projected as a result of a change over time of actual remediation costs, a change in the timing for utilisation of reserves and the potential for increasingly stringent environmental regulatory requirements.

Exploration and Evaluation Assets and Mine under construction

During December 2017, the Company assessed the technical feasibility and commercial viability of its Bisie Tin Mine Project, together with the availability of project funding and formally approved the commencement of full-scale development activities, resulting in the reclassification of the Exploration and Evaluation Asset to Mine under construction. New exploration following commercial production at Bisie is recorded as a new Exploration and Evaluation asset at cost and refers to the search for other mineral orebodies within the mining and exploration licenses that the Company owns the mineral rights for. Such exploration cost is carried at cost until such time as management determine that the area is economically viable, in which case it will be transferred into mine under construction or written off if not pursued further.

Assumptions are used in estimating the Company's reserves and resources that might be extracted from the Company's properties. Judgement is applied in determining when an Exploration and Evaluation Asset demonstrates technical feasibility and commercial viability and transitions to the development stage, requiring reclassification to mine under construction within non-current assets.

Share-based payments

The share-based payments expense is estimated using the Black-Scholes options-pricing model as measured on the grant date to estimate the fair value of stock options, which requires inputs in calculating the fair value for share-based payments expense, included in profit or loss. This model involves the input of highly subjective assumptions, including the expected price volatility of the Company's common shares and the expected life of the options. The value of the share-based payment expense for the period along with the assumptions and model used for estimating fair value for share-based compensation are disclosed in Note 17.

Impairment

Non-financial assets

An impairment review of property, plant and equipment is carried out by comparing the carrying amount thereof to its recoverable amount when there is an indication that these assets may be impaired. The recoverable amount of property, plant and equipment is determined as the higher of the fair value less cost to sell and its value in use. For mining assets this is determined based on the fair value which is the present

value of the estimated future cash flows arising from the use of the asset. Where the recoverable amount is less than the carrying amount, the impairment charge will reduce the carrying amount of property, plant and equipment to its recoverable amount. The adjusted carrying amount is depreciated over the remaining useful life of property, plant and equipment. When an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised directly in profit or loss.

Estimates are made in determining the recoverable amount of assets which includes the estimation of cash flows and discount rates used. In estimating the cash flows, management bases cash flow projections on reasonable and supportable assumptions that represent management's best estimate of the range of economic conditions that will exist over the remaining useful life of the assets. The discount rates used reflect the current market assessment of the time value of money and the risks specific to the assets for which the future cash flow estimates have not been adjusted. Changes in such estimates could impact the recoverable amount of these assets.

Estimates are reviewed regularly by management.

Useful lives of mineral properties, plant and equipment

The depreciable amounts of assets are allocated on a systematic basis over their useful lives. In determining the depreciable amount, management makes assumptions in respect to the residual value of assets based on the expected estimated amount that the entity would currently obtain from disposal of the asset, after deducting the estimated costs of disposal. If an asset is expected to be abandoned the residual value is estimated at zero. Due to the remote location of the mine as well as the specialised nature of the property, plant and equipment, management has estimated the residual value of property, plant and equipment to be zero.

In determining the useful life of assets, management considers the expected usage of assets, expected physical wear and tear, legal or similar limits of assets such as mineral rights as well as obsolescence.

Estimated mineral resources are used in determining the depreciation of certain assets. This results in a depreciation expense proportional to the depletion of the anticipated remaining life-of-mine production. The estimate of the remaining life of the Company's mineral producing properties is based on a combination of quantitative and qualitative factors including historical production and financial results, mineral resources reported under National Instrument 43-101 reports, and management's intent to operate the property. The estimated remaining life of mineral producing properties are used to calculate amortisation and depletion expenses, assess impairment charges and the carrying value of assets, and for forecasting the timing of the payments of reclamation and remediation costs.

D. CASH AND CASH EQUIVALENTS

Cash consists of cash on hand and of deposits in banks.

E. REVENUE

The Company sells its product on Free-On-Truck (FOT) Incoterms. This means that the Company is not responsible for freight or insurance once control of the goods has passed. The FOT Incoterm consists of one performance obligation, being for the provision of tin concentrate at contractually agreed specifications. The table below illustrates at what point control passes for this performance obligation.

Revenue type	Tin Concentrate
Inco terms	FOT
Performance obligation	Supply of tin concentrate at contractually agreed specifications at delivery point.
Timing of when performance obligation is satisfied	On delivery of the tin concentrate to the customer.
Payment terms	<p>The payment terms are different depending on the delivery point chosen as below;</p> <ul style="list-style-type: none"> • Delivery point Logu: Until February 2021, payment was 80% on delivery, 15% on crossing the DRC border and 5% following receipt of final smelter assays 90-150 days following delivery. Post February 2021 95% payment is made within three days of receipt of a holding certificate confirming the arrival of the goods at Kampala, Uganda and 5% following receipt of final smelter assays 90-150 days following delivery. Post June 2021, the Company can elect pricing of either the 4-month price agreed prior to departure from Logu, or the 3-month price just prior to crossing the DRC border. • Delivery point Kampala: 95% within three days of a holding certificate confirming the arrival of the goods at Kampala, Uganda and 5% following receipt of final smelter assays 60-120 days following delivery. • Delivery point Goma: 95% within three business days of the goods crossing the DRC border and 5% following receipt of final smelter assays 90-150 days following delivery.

Control passes to the customer when product is delivered FOT. Delivery can take place at any of three agreed delivery points, being (1) Logu (mine site), (2) Goma, North Kivu, DRC or (3) Kampala, Uganda. The delivery point is agreed between the customer and the Company from time to time. In the case of the Logu and Goma delivery points title passes upon the lot leaving the DRC and entering into Uganda. For the Kampala delivery point title passes when the lot is delivered at the Kampala delivery point.

From May 2020 until May 2021, where the delivery point was Logu, the price of tin concentrate was fixed just prior to delivery based on the 4-month tin price. The date of invoice is the date when control passes to the customer. Since June 2021, for the Logu delivery point, pricing can be either the four-month price as agreed prior to departure from Logu, or the three-month price just prior to crossing the DRC border, at the election of the Company. A first provisional invoice is raised when the goods leave Logu. A second provisional invoice is raised on arrival at Kampala when the final price is known and title passes to the customer.

Commodity price adjustments during this period are separately disclosed in the revenue note as other revenue (note 19). Invoices are raised on FOT delivery date.

Final assay adjustments are recorded against revenue.

F. INVENTORIES

Inventory consists of tin concentrate which has been produced to contracted specifications. Concentrate inventories are carried at the lower of cost (determined on the weighted average basis) or net realisable value. The Company does not currently value run of mine ore produced from underground due to the low levels and values of such stockpiles.

The weighted average cost of concentrate inventories is determined by dividing the cost of the concentrate available for sale with the concentrate tons available for sale. The cost of concentrate available for sale is calculated as opening inventory plus net purchases, the cost of conversion plus other costs incurred to get the tin inventory from run of mine ore to concentrate. The costs of conversion are calculated based on costs directly related to the production and an allocation of fixed and variable overheads. Net realisable value is the estimated selling price net of any estimated selling costs in the ordinary course of business. Write-downs of mineralized concentrate, resulting from net realizable value impairments, are reported as an expense within cost of sales in the period of write down.

Consumables stores are valued at the lower of cost (determined on the weighted average basis) and net realizable value. Replacement cost is used as the best available measure of net realizable value.

G. FOREIGN CURRENCY TRANSLATION AND TRANSACTIONS

The functional currency of an entity is the currency of the primary economic environment in which the entity operates. Following the change in functional currency of the Company from the Canadian dollar to United States dollar on January 1, 2015, the functional currency of the Company is the United States dollar. The change in functional currency resulted in a permanent foreign currency translation reserve amount of \$1,511,737.

Transactions and balances in currencies other than the United States dollar are recorded at exchange rates prevailing on the dates of the transactions. At the end of each reporting period, monetary assets and liabilities denominated in foreign currencies are translated at the period-end exchange rate, while non-monetary assets and liabilities are translated at historical rates. Revenues and expenses are translated at the exchange rates approximating those in effect on the date of the transactions. Exchange gains and losses arising on translation are included in the statement of profit/(loss) and comprehensive profit/(loss).

The financial results and position of foreign operations, whose functional currency is different from the reporting currency are translated as follows:

- I. assets and liabilities are translated at period-end exchange rates prevailing at that reporting date;
- II. income and expenses are translated at average exchange rates for the period; and
- III. equity items are translated at historical rates.

Exchange gains and losses are included as part of the foreign currency translation reserve on the statement of financial position.

H. LEASES LIABILITIES AND RIGHT-OF USE ASSETS

The Group leases various mining machines and a fuel farm at its operation in DRC. Rental contracts are typically made for fixed periods of 3 to 5 years. The Company's lease Contracts may contain both lease and non-lease components. The Group allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. Lease terms are negotiated on an individual basis and contain a range of different terms and conditions. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor.

Leased assets may not be used as security for borrowing purposes. Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group. Assets and liabilities arising from a lease are initially measured on a present value basis, using the incremental borrowing rate as the discount rate.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability;
- any lease payments made at or before the commencement date less any lease incentives received;

- any initial direct costs; and
- restoration costs.

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Group is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life.

Lease liabilities are initially measured at the present value of the lease payments payable over the term of the lease and are discounted at the incremental borrowing rate. Lease payments are determined in accordance with contracts.

I. EXPLORATION AND EVALUATION ASSETS

Recognition and measurement

Exploration and Evaluation Costs are those costs required to find a mineral property and determine technical feasibility and commercial viability. Exploration and Evaluation costs include costs to establish an initial mineral resource and determine whether inferred mineral resources can be upgraded to measured and indicated mineral resources and whether measured and indicated mineral resources are commercially viable. Costs incurred before the Company has obtained the legal right to explore an area are recognised in the consolidated statement of profit/(loss) and comprehensive profit/(loss).

Exploration and Evaluation Costs relating to the acquisition of, exploration for and development of mineral properties are capitalised and include, but are not restricted to: drilling, trenching, sampling, surveying and gathering exploration data; tunnelling and development, calculation and definition of mineral resource; test work on geology, metallurgy, mining, geotechnical and geophysical; and conducting geological, geophysical, engineering, environmental, marketing and financial studies.

Administration costs that do not relate directly to specific exploration and evaluation activity for capitalised projects are expensed as incurred.

Impairment

All capitalised Exploration and Evaluation Expenditures are monitored for indications of impairment. Indicators of impairment include, but are not limited to:

- I. the period for which the right to explore is less than one year;
- II. further exploration expenditures are not anticipated;
- III. a decision to discontinue activities in a specific area; and
- IV. the existence of enough data indicating that the carrying amount of an Exploration and Evaluation Asset is unlikely to be recovered from the development or sale of the asset.

Where a potential impairment is indicated, assessments are performed for each area of interest. To the extent that Exploration and Evaluation Assets are not expected to be recovered, they are charged to the consolidated statement of profit/(loss) and comprehensive profit/(loss).

J. PLANT AND EQUIPMENT

Plant and equipment is stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Land and assets under construction are stated at cost and are not depreciated. Buildings, including certain non-mining residential buildings, and all other items of property, plant and equipment are reflected at cost less accumulated depreciation and accumulated impairment losses.

Capitalised mine development and infrastructure costs (shown as mining property) are depreciated on a unit-of-production basis. Depreciation is charged on mining assets from the date on which the assets are available for use as intended by management.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

Depreciation is charged on a systematic basis over the estimated useful lives of the assets after taking into account the estimated residual values of the assets. Useful life is either the period of time over which the asset is expected to be used or the number of production or similar units expected to be obtained from the use of the asset.

The estimated useful lives of items of property, plant and equipment are:

Mining property	Units of production
Plant and equipment	2 - 12.5 years
Land	Not depreciated
Buildings	12.5 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss.

K. SHARE-BASED PAYMENTS AND SHARE APPRECIATION RIGHTS EQUIVALENT SHARES

The Company's omnibus incentive plan allows for issue of stock options which in turn allows Company employees and consultants to acquire shares of the Company. The fair value of options granted is recognised as a share-based payment expense with a corresponding increase in equity. An individual is classified as an employee when the individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee. Consideration paid on the exercise of stock options is credited to capital stock.

The fair value is measured at grant date and each tranche is recognised over the period during which the options vest. The fair value of the options granted is measured using the Black-Scholes option pricing model, taking into account the terms and conditions upon which the options were granted.

At each financial position reporting date, the amount recognised as an expense is adjusted to reflect the number of stock options that are expected to vest. Where equity instruments are granted to employees, they are recorded at the fair value of the equity instrument granted at the grant date. The grant date fair value is recognised in the statement of profit/(loss) over the vesting period, described as the period during which all the vesting conditions are to be satisfied. Where equity instruments are granted to non-employees, they are recorded at the fair value of the goods or services received in the statement of profit/(loss). Amounts related to the issuance of shares are recorded as a reduction of capital stock. When the value of goods or services received in exchange for the share-based payment cannot be reliably estimated, the fair value of the shares or equity instruments issued is used.

During the financial year ended December 31, 2022 the Company amended the previous Stock Option plan and replaced it with the Omnibus Incentive Plan. Under the plan the Company can award various other types of long term incentive including Share Appreciation Rights Equivalent Shares. Such shares are a subclass of shares with no voting rights that entitles the holder to be paid dividends on dates determined by the board, based on certain share price criteria to the extent that the 5 day VWAP share price prior to the dividend date is higher than the “Reference price”, or share price on date of issue.

The Company accounts for SARES as a share based payment under IFRS 2. A share based payment liability is raised for the cash settlement expected to fall due at each period end.

L. INCOME TAXES

Current tax

Tax is recognised in the Statement of Comprehensive Income, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the Statement of Financial Position date in the countries where the Group and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

The Company reconciles the tax charge for the year to the parent Company’s tax rate, which in Mauritius is an effective rate of 3%. The Companies earnings are derived from the DRC where the corporate tax rate under the mining code is 30%. An additional “superprofit tax” could raise the effective tax rate depending on a number of factors including the average tin price achieved during any given year.

Deferred tax

The estimation of income taxes, includes evaluating the recognition of deferred tax assets based on an assessment of the Company’s ability to utilise the underlying future tax deductions against future taxable income, prior to expiry of those deductions. Management assesses whether it is probable that some, or all of the recognised or unrecognised deferred income tax assets will not be realised. The ultimate realisation of deferred tax assets is dependent upon the generation of future taxable income, which in turn is dependent upon the successful discovery, extraction, development and commercialisation of mineral reserves. To the extent that management’s assessment of the Company’s ability to utilise future tax deductions changes, the Company would be required to recognise more or fewer deferred tax assets, and deferred income tax provisions or recoveries could be affected. Management believes that future profits will allow realization of the deferred tax asset. Please see note 9.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

Deferred tax is recorded using the liability method, providing for temporary differences, between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Temporary differences are not provided for relating to goodwill not deductible for tax purposes, the initial recognition of assets or liabilities that affect neither accounting nor taxable loss, and differences

relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the reporting date. A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised.

M. BASIC AND DILUTED EARNINGS / (LOSS) PER SHARE

The basic earnings/(loss) per share is computed by dividing the net earnings/(loss) attributable to ordinary shareholders of the parent company by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflects the potential dilution of common share equivalents, such as outstanding stock options and share purchase warrants, in the weighted average number of common shares outstanding during the period, if dilutive. For this purpose, the “treasury stock method” is used for the assumed proceeds upon the exercise of stock options and warrants that are used to purchase common shares at the average market price during the period.

N. PROVISION FOR ENVIRONMENTAL REHABILITATION

The Company recognises liabilities for legal or constructive obligations associated with the retirement of Exploration and Evaluation Assets and plant and equipment. The net present value of future rehabilitation costs is capitalised to the related asset along with a corresponding increase in the rehabilitation provision in the period incurred. Discount rates using a pre-tax rate that reflects the time value of money, are used to calculate the net present value. The Company’s estimates of reclamation costs could change as a result of changes in regulatory requirements, discount rates and assumptions regarding the amount and timing of the future expenditures. These changes are recorded directly to the related assets with a corresponding entry to the rehabilitation provision. Changes in the rehabilitation liability will be added to or deducted from the cost of the related asset and in the event the amount to be deducted exceeds the carrying amount of the asset the excess shall be recognised immediately in profit or loss.

O. CAPITAL STOCK

Common shares are classified as equity. Incremental costs directly attributable to the issue of common shares and stock options are recognised as a deduction from equity. Common shares issued for consideration other than cash, are valued based on their market value at the date the shares are issued. The Company has adopted a residual value method with respect to the measurement of shares and warrants issued as private placement units. The Company first values the warrants at their fair value using option pricing methodologies. The balance is allocated to the common shares.

P. FINANCIAL INSTRUMENTS

Financial assets

Classification

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income (OCI) or through profit or loss), and
- those to be measured at amortised cost.

The classification depends on the Company’s business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will be recorded in profit or loss.

Measurement

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVTPL are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are two measurement categories into which the Company classifies its debt instruments:

Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss. Impairment losses are presented as separate line item in the statements of comprehensive profit/(loss).

FVTPL: Assets that do not meet the criteria for amortised cost or fair value through Other Comprehensive Income (FVOCI) are measured at FVTPL. A gain or loss on a debt investment that is subsequently measured at FVTPL is recognised in profit or loss.

Impairment

The Company assesses on a forward-looking basis the expected credit loss associated with its debt instruments carried at amortised cost and FVOCI. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

Accounts receivable since June 2021, with a provisional tin pricing arrangement, were accounted for as fair value through profit or loss.

From January to May 2021 the Company was fixing tin prices prior to delivery, resulting in recognition of trade receivables at amortised cost as laid out above, when material. From June 2021 provisional pricing was applied and therefore accounted for as fair value through profit or loss. Provisional pricing receivable is recognised when the Company has satisfied its performance obligation relating to delivery of the product and has unconditional right to consideration that is due. All fair value adjustment relating to the movements in this balance are recognised within revenue from fair value adjustments.

The designation determined the method by which the financial assets were measured on the statement of financial position subsequent to inception and how changes in value were recorded.

Financial liabilities

The Company classifies its financial liabilities into one of the following categories:

Fair value through profit or loss – this category comprises derivatives and financial liabilities incurred principally for the purpose of selling or repurchasing in the near term. They are carried at fair value with changes in fair value recognised in profit or loss.

Other financial liabilities – this category consists of liabilities carried at amortised cost using the effective interest method.

Q. DEBT AND BORROWING COSTS

Debt is initially recorded at fair value, less transaction costs and is subsequently measured at amortised cost, calculated using the effective interest rate method.

Borrowing costs are expensed as incurred except where they relate to the financing of construction or development of qualifying assets in which case they are capitalized up to the date when the qualifying asset is ready for its intended use.

R. IMPAIRMENT OF NON-FINANCIAL ASSETS

At the end of each reporting period, the Company's assets are reviewed to determine whether there is any indication that those assets may be impaired. If such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell and value in use.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Fair value less costs to sell (FVLCS) is the amount obtainable from the sale of the asset in an arm's length transaction between knowledgeable and willing parties, less the costs of disposal.

If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognised in profit or loss for the period. For an asset that does not generate largely independent cash flows, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but to an amount that does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

3. INVENTORY

	December 31 2022 USD	December 31 2021 USD
Tin concentrate	2,868,085	4,914,909
Consumable stores	21,946,275	15,759,081
	24,814,360	20,673,990

Tin concentrate consists of final product at the Company's premises. There were no write downs of tin concentrate during the period. An amount of \$2,046,824 (2021: \$4,751,469) was debited to the cost of sales during the year relating to tin concentrate inventory movement.

Consumable stores consist of items such as inventories of diesel, explosives, cement, mine construction materials, fleet maintenance materials, personal protective equipment and other mining and process plant consumables and spares. An amount of \$24,448,097 (2021: \$21,770,966) was debited to cost of sales from consumable stores during the period. No inventory is carried at net realisable value.

Inventory is pledged as security under the Company's credit facility.

4. ACCOUNTS RECEIVABLE

	December 31 2022 USD	December 31 2021 USD
Trade receivables	27,819,491	47,625,872

Accounts receivable are amounts due from the customer for tin concentrate sold in the ordinary course of business. They are generally due for settlement within 30 – 180 days and are therefore classified as current. Accounts receivable are measured at fair value through profit or loss from the date of recognition up to date of settlement, as it fails the IFRS 9 amortised cost requirement of cash flows representing solely payments of principal and interest.

The fair value changes due to non-market variability (that is changes based on quantity and quality of the tin concentrate) is considered to be variable consideration within the scope of IFRS 15 as the Company's right to consideration is contingent upon the physical attributes of the tin concentrate.

The fair value changes due to market variability (that is changes in the commodity prices and exchange rates) are not in the scope of IFRS 15 and are therefore not presented as revenue from contracts with customers. The changes in commodity prices are accounted for as other revenue and disclosed separately from revenue from contracts with customers in note 19. Any negative movement in the tin price subsequent to payments being received will result in a payable to the customer. Subsequent to the quotational price, the selling price is finalised and any amounts that are required to be refunded are accounted for as provisional pricing payable.

5. PREPAIDS AND OTHER RECEIVABLES

Item	December 31 2022 USD	December 31 2021 USD
Current		
Supplier prepayments ¹	19,133,979	631,254
VAT receivable ²	5,613,130	4,320,608
Tax prepayment ³	469,205	469,205
Deferred expenses ⁴	2,274,636	1,980,735
	27,490,950	7,401,802
Non-current		
Environmental deposit in DRC ⁵	972,893	566,744
VAT receivable ²	16,839,389	12,961,824
	17,812,282	13,528,568

¹ Supplier prepayments primarily relate to orders for the Mpama South development project, as well as consumables and equipment ordered for the existing mine.

² VAT receivable was reclassified from mine under construction in 2019 due to increased confidence in recovery resulting from VAT refunds being received in 2019 and the option to off-set against future taxes subject to regulatory approval. Due to slow repayment of the VAT receivable, 75% of the outstanding balance at December 31, 2021 and December 31, 2022 has been assessed as receivable in greater than one year.

CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2022 AND 2021

³The tax prepayment relates to costs incurred by the Company's subsidiary in the DRC on upgrading a public road in the DRC. It has been agreed that this expenditure can be offset against future provincial taxes due by the Company's subsidiary in the DRC.

⁴Deferred expenses relate to royalty and export tax invoices received relating to product not yet recognised as revenue.

⁵The environmental deposit in the DRC relates to funds deposited with the central bank in the DRC. These funds will be utilised towards any future environmental rehabilitation activities. The deposit will be returned to the Company in the event that the funds are not utilised.

6. CASH AND CASH EQUIVALENTS

	December 31 2022 USD	December 31 2021 USD
Cash at bank	44,684,808	90,631,753
Short term deposits	74,700,000	-
Cash on hand	3,879	8,248
	119,388,687	90,640,001

Under the terms of the credit facility (see Note 14) all bank accounts of the Company are pledged as security.

Short term deposits are placed on a 2 to three month basis and earn interest ranging from 1.5% to 2% per annum.

7. PLANT AND EQUIPMENT

Description	Mining Property costs \$	Construction in progress \$	Right of use assets \$	Land & buildings \$	Buildings plant & Equipment \$	Total \$
Cost						
Closing balance December 31, 2020	160,381,967	-	8,037,166	1,034,193	105,007,154	274,460,480
Additions during the year	4,268,237	-	2,543,913	-	8,437,402	15,249,552
Closing balance December 31, 2021	164,650,204	-	10,581,079	1,034,193	113,444,556	289,710,032
Transfer from exploration and evaluation	-	21,049,338	-	-	-	21,049,338
Additions during the year	7,832,748	18,526,031	2,394,097	6,686,058	7,637,664	43,076,598
Closing balance December 31, 2022	172,482,952	39,575,369	12,975,176	7,720,251	121,082,220	353,835,968
Accumulated Depreciation						
Closing balance December 31, 2020	(18,683,060)	-	(1,865,996)	(110,313)	(14,697,740)	(35,357,109)
Depreciation expense during the year	(14,343,721)	-	(1,770,206)	(82,736)	(10,435,802)	(26,632,465)
Closing balance December 31, 2021	(33,026,781)	-	(3,636,202)	(193,049)	(25,133,542)	(61,989,574)
Depreciation expense during the year	(14,659,987)	-	(2,089,329)	(100,434)	(11,955,923)	(28,805,673)
Closing balance December 31, 2022	(47,686,768)	-	(5,725,531)	(293,483)	(37,089,465)	(90,795,247)
Net closing value						
December 31, 2021	131,623,423	-	6,944,877	841,144	88,311,014	227,720,458
December 31, 2022	124,796,184	39,575,369	7,249,645	7,426,768	83,992,755	263,040,721

All of the Company's assets are secured by the lenders of the Company's credit facility. From 2015, the Company focussed exclusively on the development of the Bisie Tin Mine, its principal project in the Democratic Republic of Congo (DRC).

Construction in progress relates to the development of the Mpama South project. The Mpama South development project, which is adjacent to the producing Mpama North mine and comprises a new

underground development portal, processing plant and associated equipment, is expected to produce approximately 7,200 tonnes of contained tin per year effective FY2024 thereby increasing Alphamin's annual tin production to approximately 20,000 tonnes. The project is progressing on schedule for targeted commissioning in December 2023

Right of use assets relate to underground mining equipment and a fuel storage facility.

A. IMPAIRMENT ASSESSMENT

International Financial Reporting Standards (IFRS) require long-lived assets to be assessed for impairment when there is an indication of impairment. The Company considered a combination of factors such as the headroom between the Company's net asset value and its market capitalization on an annual basis, as well as the volatility of commodity prices. During the year ended December 31, 2022, there were no indicators of impairment. No indicators of impairment were recorded for the year ended December 31, 2021.

8. INCOME TAX

The income tax expense differs from the amount that would result from applying the Mauritian income tax rates to earnings before income taxes. These differences result from the following items;

	December 31, 2022 USD	December 31, 2021 USD
Profit/(Loss) before income tax	184,663,746	132,125,567
Mauritian statutory rate	3%	3%
Expected income tax (expense)/credit	(5,539,912)	(3,963,767)
(Increase)/decrease due to:		
Non-deductible expenses	(4,805,595)	(5,370,912)
Taxation rate differential	(52,441,832)	(44,693,398)
Deferred tax not recognised	(145,672)	328,683
Impact of superprofit tax in DRC	-	(14,858,592)
Tax (expense)/credit	(62,933,011)	(68,557,986)
Income tax (expense)/credit consists of the following:		
Current income tax	(66,091,150)	(44,626,758)
Deferred income tax	3,158,139	(23,931,228)

The tax rate differential relates to the difference between the effective tax rate of Mauritius of 3% and that of the operating subsidiary in DRC, which is 30%.

Non-deductible expenses relate to various Income Statement expenses which are not allowable for income tax purposes in the various jurisdictions in which the Company operates and include warrant expenses (at parent company level) and various operating expenditures which are not allowable in terms of DRC tax law such as transport of concentrate.

Superprofit taxes (SPT) in DRC are triggered where the average sales price for the year exceeds the tin price used in the DRC feasibility study by more than 25%. In the case of superprofit tax applying a calculation

using ABM's "Excédent Brut d'Exploitation (EBT)", an OHADA or Francophone Africa accounting term that is loosely equivalent to EBITDA for the year. Where the EBT is greater than 25% higher than that stipulated in the feasibility study then a superprofit tax of an additional 20% applies, taking the effective tax rate on that incremental portion of profit from 30% to 50%.

In 2021 the Company submitted a revised feasibility study as required under Congolese law due to the substantial changes in operation since the original feasibility study. The revised feasibility study assumed a tin price of \$40,000 per ton compared to the original of \$18,000 per ton. Following the approval of the Company's revised feasibility study in Q3, 2022 the incremental effect of SPT was \$Nil for the year ended December 31, 2022 (FY2021: \$14,858,592). Following approval of the previously submitted feasibility study, a further updated feasibility study was submitted to incorporate the Mpama South project with updated tin price forecasts. Under DRC tax law provisional payments of 80% of the prior year's tax bill are due each year. There is no allowance for estimated profits. In 2022, provisional payments are relatively low due to the 2021 tax bill being reduced by losses carried forward and the tax deductibility of the SPT calculated in 2021.

9. DEFERRED TAX

The net deferred tax liabilities as at December 31, 2022 and net deferred tax assets as at December 31, 2021 are presented as follows;

Movement in deferred tax	Balance as at January 2021	Recognised in profit or loss	Balance as at December 31 2021	Recognised in profit or loss	Balance as at December 31 2022
Plant and equipment	(15,511,634)	1,442,873	(14,068,761)	1,440,000	(12,628,761)
Assessed losses	21,378,167	(21,378,167)	-	-	-
Inventory	3,186,718	(1,390,673)	1,796,045	121,846	1,917,891
Accounts receivable	(6,046,358)	(1,800,591)	(7,846,949)	(11,948,234)	(19,795,183)
Accounts payable and accrued liabilities	(693,769)	(804,670)	(1,498,439)	13,544,527	12,046,088
Net deferred tax assets/liabilities	2,313,124	(23,931,228)	(21,618,104)	3,158,139	(18,459,965)
Offsetting of assets and liabilities					
Deferred tax assets	13,346,423	11,218,462	1,796,045	121,846	1,917,891
Deferred tax liabilities	(5,289,797)	(16,961,964)	(23,414,149)	3,036,293	(20,377,856)
Net deferred tax asset/liability	8,056,626	(5,743,502)	(21,618,104)	3,158,139	(18,459,965)

Deferred tax assets and liabilities are only offset when they relate to income taxes levied by the same tax authority and the Company intends to settle its current tax assets and liabilities on a net basis.

Deferred income tax assets are recognised for tax loss carry forwards to the extent that the realisation of the related tax benefit through future taxable profits is probable. Deferred tax assets are expected to realise through profits. Deferred tax is recognised only in respect of the DRC operating subsidiary. Deferred tax assets relating to tax loss carry forwards were fully recovered in 2021.

10. EXPLORATION AND EVALUATION ASSETS

	Mpama South	Mpama North	Regional exploration	Total
Balance as at January 1, 2021	2,201,449	-	-	2,201,449
Additions	9,619,849	1,634,044	103,875	11,357,768
Balance as at December 31, 2021	11,821,298	1,634,044	103,875	13,559,217
Additions	9,228,040	2,439,869	5,557,800	17,225,709
Transfers	(21,049,338)	-	-	(21,049,338)
Balance as at December 31, 2022	-	4,073,913	5,661,675	9,735,588

Exploration costs incurred year to date relate to the Mpama South, Mpama North extension drilling and regional exploration. An extensive drilling campaign at Mpama South, which deposit lies adjacent to the Company's flagship Mpama North asset, has yielded very positive results to date and is being extended. Further drilling has been performed at Mpama North and significant drilling, road building activity and soil samples have been taken further along the Bisie ridge.

11. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

	December 31, 2022 USD	December 31, 2021 USD
Current		
Accounts payable	7,374,972	2,991,466
Accrued liabilities	11,099,193	6,029,287
Payroll accruals	5,350	1,060
Payroll tax liabilities	2,804,496	1,560,613
Corporate and other tax liabilities	60,845,664	44,798,906
	82,129,675	55,381,332

Accounts payable and accrued liabilities is mainly comprised mine consumables, services provided and other operating expenses. The credit term for purchases typically ranges from 30 to 60 days. Other tax liabilities include government royalties and withholding taxes.

12. LEASE LIABILITIES

	December 31, 2022 USD	December 31, 2021 USD
Current	2,394,497	2,167,399
Non-current	3,000,602	2,029,164
	5,395,099	4,196,563

Summary of lease liabilities by period of redemption

Less than one year	2,394,497	2,167,399
Between one and two years	1,974,602	1,142,262
Between two and three years	1,026,000	886,902
Total lease liabilities	5,395,099	4,196,563

Analysis of movement in lease liabilities

At the beginning of the year	4,196,563	3,401,141
New leases	3,761,250	2,480,460
Capital repayments	(2,562,714)	(1,685,038)
- Lease payments	(2,924,110)	(2,029,031)
- Interest charged	361,396	343,993
At the end of the period/year	5,395,099	4,196,563

The lease liabilities relate to the right-of-use assets disclosed in note 7. Interest is based on incremental borrowing rates between 8.95% and 12.6%.

13. RELATED PARTY TRANSACTIONS

KEY MANAGEMENT PERSONNEL

Key management personnel include those persons having authority and responsibility for planning, directing and controlling the activities of the Company as a whole. The Company has determined that the key management personnel consist of executive and non-executive members of the Company's Board of Directors and corporate officers. Remuneration attributed to key management personnel can be summarized as follows:

Item	Relationship	December 31, 2022 USD	December 31, 2021 USD
Director and Officer fees	Directors, officers	1,415,153	1,667,925
Secretarial and administrative fees	Corporate Secretary	36,000	36,000
Management fees	Directors	138,900	138,900
Share based payments	Directors, officers	2,156,503	273,923

Accounts payable related parties of \$1,357,020 (2021: Nil) relates to provisions made for dividend payments relating to Share Appreciation Rights Equivalent Shares (SARES). SARES are marked to market at each period end and adjusted through share-based payments in the profit and loss account.

Debt finance due to related parties of \$2,502,240 (December 31, 2021: \$3,558,637) are due to Tremont Master Holdings. Tremont Master Holdings is the majority shareholder of the Company. See Note 14 for further details relating to the related party debt owed to Tremont Master Holdings. All related party transactions are carried out on an arms'-length basis.

In line with the DRC mining code, the Company's subsidiary Alphamin Bisie Mining SA (ABM) granted 5% of its share capital to the Government of the DRC during the 2015 financial year. To facilitate this, ABM divided their share capital into two classes, "A" shares and "B" shares. The "B" shares are intended to be held solely by the Government of the DRC and are non-dilutable at 5% of total share capital ("A" plus "B") in issue. "B" class shares have normal voting rights on a pro rata basis and the DRC Government has a right to appoint one director to the ABM board. The 5% is a free carry under the terms of the DRC mining code, hence the DRC Government is not required to contribute on granting of their initial holding or further issues to maintain their stake at 5%.

In November 2015, the Company entered into an agreement with the Industrial Development Corporation of South Africa Limited (IDC) pursuant to which the IDC could invest up to \$10,000,000 directly into ABM, in three tranches, subject to the completion of certain milestones. As at the 2016 financial year end the Company had received all tranches, resulting in an ownership in ABM of 14.25% by the IDC. Under the terms of the shareholders' agreement the IDC were granted an "offtake option". Under the offtake option the IDC is entitled, as long as it owns 11% or more of ABM's "A" class shares, to an option to purchase from ABM a portion of its tin concentrate production. The percentage of production that the IDC may acquire under this option, cannot exceed their percentage holding in the "A" class shares of ABM at the date of exercise. The IDC shall only be able to benefit from the "offtake option" if the relevant percentage of the Company's production is not already committed to other buyers in respect to the relevant period. The offtake acquired can only be for a minimum of six months and a maximum of twelve months and must be purchased at the same average price and other terms as ABM is able to, and would otherwise intend to, sell its product to other third-party purchasers. The "offtake option" is not transferrable. The IDC waived this right to allow ABM to enter into an arm's-length offtake agreement with the Gerald Metals group in Q1 2018.

Under the terms of the IDC shareholders' agreement, a qualifying "seller", defined as a shareholder, or two or more shareholders acting together, holding more than 50% of the "A" class shares of ABM, has drag along and tag along rights that are normal in transactions of this nature. The IDC has also granted pre-emption rights to the other "A" class shareholders, entitling them to a right of first refusal on any partial or full sale of their shares. The IDC may propose (but is not obliged) at any time during the "Exit Period" that Alphamin Resources acquire all, but not less than all of its shares in exchange for shares in Alphamin Resources (the Share Swap), which shall be based on the then fair market value of the "A" class shares, and on terms to be mutually agreed to by Alphamin Resources and the IDC. The "Exit Period" originally referred to the earlier of five years from the date of signature, or one year from the date the Bisie Tin Mine Project reached 90% of its intended maximum production, having been fully funded and fully implemented. This expired on February 28, 2023 without any impact on the Company. The agreement may be reimplemented by mutual agreement going forward.

The debt reduction in May 2020 resulted in a new intercompany loan being created between Alphamin Resources Corp. and ABM. This was due to parent Company settling the subsidiary's debt in exchange for an intercompany loan. In Q4, 2020 the parent Company indirectly converted into equity its shareholder loan resulting in an increase in its ownership of ABM from 80.75% to 84.14% (and a consequential dilution in the IDC's proportional shareholding). See note 18 for further disclosures with respect to non-controlling interests.

On December 13, 2021 ABM completed a capital reduction in the amount of \$35,005,980, whereby the nominal value of an ordinary share was reduced from \$200 per share to \$105 per share. Alphamin group companies received 84.14% of the proceeds and non controlling interests received 15.86% for a total of \$5,551,515

On August 26, 2022 ABM completed a capital reduction in the amount of \$36,848,400, whereby the nominal value of an ordinary share was reduced from \$105 per share to \$5 per share. Alphamin group companies received 84.14% of the proceeds and non controlling interests received 15.86% for a total of \$5,843,700.

Balance, December 31, 2022	2,502,240	1,919,960	4,422,200
Due within one year	2,502,240	2,155,642	4,657,882
Unamortised fees	-	(235,682)	(235,682)
	2,502,240	1,919,960	4,422,200

On November 9, 2017 the Company entered into a credit facility of up to \$80 million from a syndicate of lenders, which consists of Tremont Master Holdings, Sprott Private Resource Lending (Collector) LP (settled 2022) and Barak Mikopo Structured Credit Fund, for the construction of the Bisie Tin Mine. As at December 31, 2021 the Company owed \$18,210,125 to the lenders. A payment of \$8.5m was made in January 2022.

During 2022, the Company agreed modified terms including a lower interest rate of 10% plus LIBOR, relaxing of certain covenants including restrictions on dividends, the elimination of the political risk insurance requirement, and a prolonged repayment period.

The key terms of the credit facility (after completion of the 2022 amendment) are:

- Senior secured, non-revolving term credit facility.
- Capital repayments of \$370,206 per month from January 1, 2022. The debt contractually matures on June 30, 2023
- Effective Coupon of 10.00% plus the greater of US dollar 3-month LIBOR and 1 percent per annum from January 1, 2022,.
- A security package typical for a transaction of this nature including a mortgage over the Company's shares in each subsidiary, cash balances, moveable assets, consumable stores and the mining license PE1355 covering the Mpama North Tin Project.
- Material adverse change clauses typical of transactions of this nature.
- Covenants including but not limited to the below effective from commencement of capital repayments:
 - (i) From January 2021, net working capital excluding credit facility amounts due and warrant liabilities, is in excess of \$10,000,000 and the amount of its Unrestricted Cash is greater than \$5,000,000;
 - (ii) the Debt Service Cover Ratio is greater than or equal to 1.5 to 1.00 from July 2021;
 - (iii) the Total Debt to Equity Ratio is less than 60 to 40;
 - (iv) Loan Life Cover Ratio is greater than 2.00 to 1.00; and
 - (v) the Reserve Tail Ratio is greater than 30%.

The Company monitors overall debt levels and proximity to breaching of covenants on a monthly basis. This is formally confirmed with the lenders on a quarterly basis. As a result of the significant reduction in debt, improvement in financial condition, commodity prices and production and sales in 2022 the Company is satisfied that covenants have not been breached, the risk of breach of covenants is low and overall debt levels are low.

Interest Rate Benchmark Reform ("IBOR") – Phase 2 (Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16) – effective date 1 January 2021: The Group's facility has various linked rates including US LIBOR (three month). The facility has various maturity dates. At present, no material impact is anticipated on the Group's financial results when the remaining facility transitions to alternative benchmark rates take place.

NET CASH/(DEBT) RECONCILIATION

	December 31, 2022 USD	December 31, 2021 USD
Current portion of lease liabilities	(2,394,497)	(2,167,399)
Current portion of debt	(4,657,882)	(18,210,125)
Non-current portion of lease liabilities	(3,000,602)	(2,029,164)
Total debt	(10,052,981)	(22,406,688)
Less: cash and cash equivalents	119,388,687	90,640,001
Net cash/(debt)	109,335,706	68,233,313

Net cash/(debt) is cash less interest-bearing debt.

15. WARRANTS

The Company issues warrants from time to time as part of Units offered in private placements. In line with IAS 32, as a result of the currency of the warrants (CAD\$) being different to that of the Company's functional and presentation currency (USD), coupled with the fact that warrants have been issued as part of private placements, rather than rights issues, the warrants are accounted for as a financial liability with fair value through profit and loss.

The Company valued the warrants using the Black-Scholes pricing model with the assumptions below:

As at December 31, 2020	April 8, 2019
Strike price	CAD\$0.30
Risk free interest rate	1.593%
Expected life of options in years	0.25
Annualised volatility	30%
Dividend rate	0.00%

All remaining warrants in issue as at December 31, 2021, were exercised in Q1, 2022.

The table below sets out the movement in warrants during the period:

Warrant liability	December 31, 2022 USD	December 31, 2021 USD
Opening balance	4,574,743	11,934,734
Warrants expired during the year	-	(1,488,821)
Warrant revaluations during the year	482,351	3,380,655
Warrant exercises during the year	-	25,030,581
Warrant amounts transferred to equity	(5,057,094)	(34,282,406)
Closing balance	-	4,574,743

16. PROVISION FOR CLOSURE AND RECLAMATION

The Company recognises a provision related to its constructive and legal obligations in the Democratic Republic of Congo to restore its properties. The cost of this obligation is determined based on the expected future level of activity and costs related to decommissioning the mines and restoring the properties.

A long-term inflation rate of 4.4% (2021:2%) and a discount rate of 4% (2021:3%) has been applied in calculating the present value of the future obligation. The period applied aligns to the estimated life of mine of 11 years, with most rehabilitation activities scheduled within the 3 years post completion of mining activities. The assumptions used are consistent with the prior year. New provision has been made for rehabilitation required relating to the Mpama South development project.

CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2022 AND 2021

	BISIE
Balance, December 31, 2020	6,786,933
Unwind of provision during the year	66,540
Provision raised during the year	757,191
Balance, December 31, 2021	7,610,664
Unwind of provision during the period	228,320
Provision raised during the year	1,913,326
Impact of increased inflation assumption*	1,180,893
Balance, December 31, 2022	10,933,203

*During the year the Company reassessed the inflation and discount assumptions used which increased from 2% to 4.4% and 3% to 4% respectively.

17. CAPITAL STOCK AND RESERVES

A. CAPITAL STOCK

The authorised capital stock of the Company consists of an unlimited number of common shares without par value, of which 1,273,797,231 common shares were issued and outstanding as at December 31, 2022.

B. CHANGES IN ISSUED CAPITAL STOCK AND RESERVES DURING THE YEARS ENDED DECEMBER 31, 2022 AND DECEMBER 31, 2021

The table below sets out the movement in capital stock during the years ended December 31, 2022 and 2021:

	Shares	Price per share	CAD	USD	Warrants	Share issue costs	Equity
Balance as at December 31, 2020	1 180 367 816			226 381 734	(13 307 996)	(1 568 310)	211 505 428

C. STOCK OPTIONS

On July 8, 2022 the shareholders approved the replacement of the previous Stock Option Plan with the Omnibus Equity Incentive Plan (OEIP).

Under the OEIP a number of different equity compensation mechanisms became available, including Options, Restricted Share Units (RSUs), Share Appreciation Rights (SARs), SAR Equivalent Shares (SARES)

The Plan provides that the number of common shares that may be purchased under the Plan is a rolling maximum which shall not exceed 5% of the issued and outstanding shares of the Company at any time, with appropriate substitutions and/or adjustments in accordance with regulatory policies.

If there is a change in the number of issued and outstanding shares resulting from a share split, consolidation, or other capital or corporate reorganisation, the options in issue are adjusted accordingly. Per TSX Venture Exchange (TSX-V) policies, the total amount of shares reserved for issuance to any one optionee within a period of 12 months shall not exceed 1% of the outstanding common shares at the time of grant, the total amount of shares reserved for issuance to any one Consultant (as defined by the Plan) within a period of 12 months shall not exceed 1% of the outstanding common shares at the time of grant, and the total amount of shares reserved for all persons conducting Investor Relations Activities (as defined by the Plan) within a period of 12 months shall not exceed 1% of the outstanding common shares at the time of the grant.

The Plan provides that it is solely within the discretion of the Board of Directors (the "Board") to determine which directors, employees and other service providers may be awarded options under the Plan, and under what terms they will be granted, as well as any amendments or variations to these terms in the event of an

Accelerated Vesting Event (as defined by the Plan). Options granted under the Plan will be for a term not exceeding ten years from the day the option is granted, as in line with TSX-V policies. Subject to such other terms or conditions that may be attached to the particular option granted, an option shall only be exercisable so long as the optionee shall continue to hold office or provide services to the Company and shall, unless terminated earlier, or extended by the Board, terminate immediately if said optionee is terminated for cause, terminate at the close of business on the date which is no later than 90 calendar days after cessation of office or employment, or in the case of the optionee's death, terminate at the close of business on the date which is no later than one year after the date of death, as the case may be. Subject to a minimum price of CAD\$0.10, the options will be exercisable at a price which is not less than the Market Price (as defined in the policies of the TSX-V) of the Company's shares at the time the options are granted.

The instruments are non-assignable. Shares will not be issued pursuant to options granted under the Plan until they have been fully paid for. The Company will not provide financial assistance to option holders to assist them in exercising their options. A summary of stock option activity and information concerning currently outstanding and exercisable options as at December 31, 2022 are as follows:

	Options outstanding		
	Number of options	Weighted average exercise price	Weighted average exercise price
	#	CAD\$	USD\$
Balance, December 31, 2020	22,304,716	0.24	0.19
Options forfeited during the year	(3,990,720)	0.20	0.16
Options exercised during the year	(6,725,311)	0.31	0.24
Options issued during the year	6,000,000	0.76	0.60
Options expired during the year	(97,700)	0.76	0.60
Balance, December 31, 2021	17,490,985	0.39	0.31
Options forfeited during the year	(2,000,000)	0.73	0.54
Options exercised during the year	(1,937,661)	0.24	0.18
Options surrendered during the year	(8,006,742)	0.21	0.16
Options issued during the year	6,100,000	0.68	0.50
Balance, December 31, 2022	11,646,582	0.65	0.48

The following table summarises information concerning outstanding and exercisable options at December 31, 2022:

Number outstanding #	Number Exercisable #	Expiry Date	Weighted average Exercise Price CAD\$	Weighted average Exercise Price USD\$	Remaining life (Years)
1,425,205	246,582	December 3, 2025	0.26	0.19	2.20
1,300,000	866,666	June 11, 2027	0.20	0.15	4.45
2,000,000	-	August 24, 2028	0.73	0.53	5.68
4,000,000	-	September 2, 2028	0.78	0.57	5.93
6,100,000	-	November 10, 2029	0.68	0.50	6.87
8,725,205	1,113,248		0.65	0.48	

All options issued prior to the 2018 financial year vest over a three-year period (15% after one year, 35% after two years and 50% after three years). These options expire five years after the date of issue.

Options issued on June 11, 2020 vest 33% after one year, 33% after two years and 33% after three years.

2,500,000 options issued on September 3, 2021 vest 50% after 16 months and 50% after 22 months. The other options issued in Q3 2021 vest 33% after two years, 33% after three years and 33% after four years.

The Company recorded a share-based payment expense to the statement of profit and comprehensive profit of \$1,064,235 for the year ended December 31, 2022 (\$680,693 for the year ended December 31, 2021). The share-based payments expense related to options granted was determined using the Black-Scholes option pricing model and the following weighted average assumptions:

	November 2022	September 2021	August 2021	June 2020	December 2017
Forfeiture rate	-	-	-	-	-
Risk free interest rate	3.43%	0.32%	0.32%	0.32%	2.07%
Expected life of options in years	2 – 4	16 months – 4	2 – 4	3 – 4	4.00
Volatility	70%	70%	70%	70%	70%
Dividend rate	0.00%	0.00%	0.00%	0.00%	0.00%

**Calculated as standard deviation of the Company's historical share price. From June 2020 the Company applied a cap of 70% on volatility. As the Company enters a more stable phase of its life cycle being that of an operating producer rather than an explorer or developer, management believe that historic volatility is a less suitable indicator for likely volatility going forward.*

D. SHARE PURCHASE WARRANTS

A summary of warrants activity and information concerning outstanding warrants as at December 31, 2022 are as follows:

All warrants issued in private placements were accounted for as a financial liability. See Note 15 for further details.

E. SHARE APPRECIATION RIGHTS EQUIVALENT SHARES

Pursuant to the changes in the Company's equity incentive arrangements approved on July 8, 2022 the Company issued 8,006,742 SARES under and Offer to Exchange made to all Option holders at the time. This qualified as a modification in terms of IFRS 2. The SARES constitutes as cash settled. SARES holders are entitled to cash payments on given dates based on the appreciation of the share price calculated as the

difference between the 5 day VWAP prior to the settlement date and the Reference price on the date of issue. Initial dividend payments of CAD2,268,246 (USD1,655,654) and CAD354,742(USD260,974) were made to holders on October 17, 2022 and December 14, 2022 respectively. A remaining dividend date June 11, 2023 will apply to 1,750,000 SARES.

The exchange of Options for SARES represents a modification in terms of IFRS 2, as the original option scheme is an equity settled share based payment, where SARES represent a cash settled share based payment. The Options were revalued upon the finalisation of the Offer to Exchange, and the balance relating to SARES was reclassified from the Reserve to the Share based payment liability.

On November 11, 2022 a further 3,500,000 SARES were issued with a reference price of CAD0.68 per SARES. Dividends will fall due on 1,416,667, 1,041,667 and 1,041,667 SARES on each of November 11, 2023, November 11, 2024 and November 11, 2025 respectively. As at 31 December 2022, the Company accrued 1,357,020 for this dividend liability on the basis of the year end share price to Reference price differential.

F. TRANSACTIONS WITH NON-CONTROLLING INTEREST

On December 12, 2020 the Company increased its ownership of ABM from 80.75% to 84.14% through a capital raise in ABM in which the minority shareholders did not participate. The transaction was accounted for as a shareholder transaction resulting in a decrease of the non-controlling interest in an amount of \$4,144,121. The full amount was taken to equity in line with IFRS 10. Following the transaction, the IDC and the DRC government own 10.86% (2019: 14.25%) and 5% (2019: 5%) of ABM respectively.

18. SIGNIFICANT OPERATING SUBSIDIARIES WITH NON-CONTROLLING INTEREST

The table below shows details of the non-wholly owned subsidiary of the Company that had material non-controlling interests:

Company	Proportion of ownership and voting rights held by non-controlling interests		Profit allocated to non-controlling interests		Accumulated non-controlling interests	
	December 31, 2022	December 31, 2021	December 31, 2022	December 31, 2021	December 31, 2022	December 31, 2021
	USD	USD	USD	USD	USD	USD
Alphamin Bisie Mining SA	15.86%	15.86%	20,805,687	15,362,491	46,979,975	36,006,624

Summarised financial information in respect of the above subsidiaries is set out below. The summarised financial information below presents amounts before intra-group elimination.

CONSOLIDATED FINANCIAL STATEMENTS
 FOR THE YEARS ENDED DECEMBER 31, 2022 AND 2021

	December 31, 2022	December 31, 2021
Current assets	177,985,859	130,517,612
Non-current assets	221,042,916	181,743,078
Total assets	399,028,775	312,260,690
Current liabilities	89,053,330	75,730,841
Non-current liabilities	13,933,805	9,639,828
Equity	296,041,640	226,890,021
Total liabilities and equity	399,028,775	312,260,690
Revenue	391,052,402	352,883,220
Operating expenses	(196,970,119)	(187,498,925)
Income tax (expense)/credit	(62,888,642)	(68,513,612)
Net profit for the year	131,193,641	96,870,683
Attributable to owners of the Company	110,387,954	81,508,192
Attributable to non-controlling interest	20,805,687	15,362,491

19. REVENUE

	Year ended December 31, 2022 US\$	Year ended December 31, 2021 US\$
REVENUE		
Revenue from contracts with customers	391,571,698	351,717,628
Other revenue	(519,296)	1,165,592
Total Revenue	391,052,402	352,883,220

Other revenue refers to price movements between provisional and final invoices which applied up until May 2020 and again since June 2021 (refer to note 4 for additional background).

20. COST OF SALES

	Year ended December 31, 2022 US\$	Year ended December 31, 2021 US\$
COST OF SALES		
Treatment costs	(24,584,202)	(21,458,592)
Transport and selling costs	(47,770,771)	(44,763,892)
Mine operating costs	(62,117,074)	(57,198,449)
Inventory movement	(2,046,824)	(4,751,469)
Royalties	(10,464,173)	(10,045,006)
Depreciation, depletion and amortization	(28,300,608)	(26,172,874)
Cost of Sales total	(175,283,652)	(164,390,282)

Royalties are payable to various branches of the DRC government in line with the DRC mining code and calculated on 3.5% of revenue, as determined by the DRC government agency's assays results and tin price tables which are published on a weekly basis.

Mine operating costs include the costs of mining and processing material from underground, maintaining the mining fleet and process plant in good order, labour incurred directly related to the production process and storing of tailings from the mine, and are broken down below:

	Year ended December 31, 2022 US\$	Year ended December 31, 2021 US\$
Mine operating costs		
Wages and salaries	(26,300,254)	(24,570,753)
Mining consumables	(8,806,197)	(9,171,306)
Transport and Import duties	(5,904,276)	(5,420,713)
Fuel & Lubricants	(11,989,286)	(8,379,386)
Mineral resources management	(1,470,275)	(1,391,556)
Processing and tsf costs	(1,728,194)	(1,967,232)
Site infrastructure	(5,918,592)	(6,297,503)
Mine operating costs total	(62,117,074)	(57,198,449)

21. GENERAL AND ADMINISTRATIVE

	Year ended December 31, 2022 US\$	Year ended December 31, 2021 US\$
GENERAL AND ADMINISTRATIVE		
Accounting, legal and secretarial	500,663	392,231
Audit fees	149,202	130,223
Political risk insurance	32,300	1,406,904
Administrative	822,905	788,787
Bank charges and interest	1,975,177	1,293,179
Consulting fees	1,581,000	1,205,116
Fines and penalties	650,000	632,716
Taxes and duties	874,035	668,216
Directors fees	302,596	318,118
Depreciation (Note 7)	505,065	459,591
Management fees and salaries	2,227,428	1,581,847
Share-based payments (Note 17)	2,421,255	680,963
Telecommunication costs	687,219	565,760
Insurance	1,754,616	1,198,258
Investor relations, filing and transfer fees	408,252	359,000
Safety, Security & Environment	1,124,700	1,192,399
Medical expenses	3,383,018	2,013,026
Community development	3,119,160	2,986,065
Travel and accommodation	2,783,476	2,341,121
Total General & Administrative costs	25,302,067	20,213,520

General and administrative expenses consist of costs that do not relate directly to production activities such as head office costs, community development expenditures, security and travel costs.

22. FOREIGN EXCHANGE (LOSS)/PROFIT

	December 31, 2022 USD	December 31, 2021 USD
Foreign exchange (loss)/profit	(498,897)	(873,660)

23. FINANCE COST

	December 31, 2022 USD	December 31, 2021 USD
Debt interest payable in cash	868,396	5,310,845
Amortisation of senior debt fees	939,700	1,259,152
Trader finance	2,511,954	1,311,411
Lease interest	361,396	343,993

Unwind of environmental discount	228,320	66,540
Other interest	2,594	67,218
Total Finance cost	4,912,360	8,359,159

24. CAPITAL MANAGEMENT

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern, and to maintain a flexible capital structure which optimises the costs of capital at an acceptable risk. The capital structure of the Company currently consists of common shares, stock options and debt. Changes in the equity accounts of the Company are disclosed in Note 17 and changes in debt is disclosed in Note 14. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, obtain additional 3rd party loan financing or renegotiate/refinance existing debt. In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets, which are approved by the Board of Directors and updated as necessary depending on various factors, including operating conditions and production and general industry conditions. In addition, the Group maintains monthly cashflow forecasts and carries out detailed reviews of management information.

25. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Company's financial instruments are exposed to a number of financial and market risks, including credit, liquidity and foreign exchange risks. The Company has established active policies to manage these risks, as detailed below. The Company places its cash with high credit quality financial institutions.

A. CREDIT RISK

EXPOSURE TO CREDIT RISK

The risk that counterparties or customers will not perform as expected, resulting in a loss to the Group, is defined as credit risk. The Group evaluates customers prior to the granting of credit. Exposure is evaluated by granting credit limits and constant evaluation of credit behaviour and considering credit ratings (where available), financial position and past experience.

Credit risk is the risk that a counterparty to a financial instrument will not discharge its obligations, resulting in a financial loss to the Company. Company management evaluates credit risk on an ongoing basis, including evaluation of counterparty credit rating. The primary source of credit risk for the Company arises from the following financial assets: (1) cash and cash equivalents and (2) trade debtors. The Company has not had any credit losses in the past, nor does it expect to have any credit losses in the future. As at December 31, 2022 and December 31, 2021, the Company has no financial assets that are past due or impaired due to credit risk defaults.

100% of the Company's revenue is derived from a contract with one customer. The credit risk from concentration of revenue is mitigated by receipt of 95% of revenue within between 2 and 30 days of delivery of product to delivery points as agreed with the customer.

Trade receivables are written off (i.e. derecognised) when there is no reasonable expectation of recovery. Failure to make payments within 180 days from the invoice date and failure to engage with the Group on alternative payment arrangement amongst others is considered indicators of no reasonable expectation of recovery. To date, the Company has not experienced any overdue nor unrecoverable trade receivables.

The expected credit loss on environmental deposits was also assessed as immaterial. The majority of the cash and cash equivalents balance was concentrated with Standard Bank group. Standard Bank's average credit rating is B. The Company's DRC cash balances are generally held with Trust Merchant Bank and Standard Bank DRC. These banks do not have external credit agency credit ratings. The Company does not expect any credit losses on cash balances. The Company's maximum exposure to credit risk at the reporting date is as follows:

Item	December 31, 2022 USD	December 31, 2021 USD
Cash and cash equivalents	119,388,687	90,640,001
Accounts receivable	27,819,491	47,625,872
Total	147,208,178	138,265,873

B. LIQUIDITY RISK

Liquidity risk is the risk that the Company will not be able to meet its obligations with respect to financial liabilities as they fall due. The Company's financial liabilities are comprised of debt, accounts payable and accrued liabilities. The Company frequently assesses its liquidity position by reviewing the timing of amounts due and the Company's current cash flow position to meet its obligations. There is no guarantee that the Company will generate enough revenue to meet these obligations.

The Company manages its liquidity risk by maintaining a sufficient cash balance, taking into account ongoing operations cashflow, to meet its anticipated operational needs. When there are not sufficient funds, the Company has the ability to reduce or delay its working capital position through increasing accounts payable and reducing revenue cycle time. The Company's debt was obtained to facilitate the development of the mining properties (refer to Note 7). Refer to Note 14 for additional information on repayment terms. The Company's accounts payable and accrued liabilities arose as a result of development, mine operating expenses, DRC taxes and corporate expenses. Payment terms on these liabilities are typically 30 to 60 days from receipt of invoice. The following table summarises the remaining contractual maturities of the Company's financial liabilities:

	Within 1 Year December 31, 2022 USD	Between 1 and 2 Years December 31, 2022 USD	Between 2 and 5 Years December 31, 2022 USD	Greater than 5 Years December 31, 2022 USD
Long term debt	2,155,643	-	-	-
Long term debt – related parties	2,502,240	-	-	-
Lease payments	2,394,496	1,974,602	1,206,000	-
Accounts payable and accrued liabilities	82,129,675	-	-	-
	Within 1 Year December 31, 2021 USD	Between 1 and 2 Years December 31, 2021 USD	Between 2 and 5 Years December 31, 2021 USD	Greater than 5 Years December 31, 2021 USD
Long term debt	15,348,255	-	-	-
Long term debt – related parties	3,686,985	-	-	-

Lease payments	2,167,399	1,142,262	886,902	-
Accounts payable and accrued liabilities	55,381,332	-	-	-

C. MARKET RISK

Market risk is the risk that the fair value for assets or future cash flows will fluctuate, because of changes in market conditions. The Company evaluates market risk on an ongoing basis.

The fair value movements accounted for warrants (refer Note 15) are non-cash in nature.

Commodity Price Risk

The Company is exposed to commodity price risk on the market price of tin. During the year ended December 31, 2022 a 10% increase or decrease in the average tin price achieved would have resulted in a gain or loss of \$32.1m (2021: \$3m) during the year ended December 31, 2022.

Foreign Exchange Risk

The Company operates on an international basis and therefore, foreign exchange risk exposures arise from transactions denominated in foreign currencies. The Company is exposed to foreign currency risk on fluctuations related to financial instruments that are denominated in Canadian dollars (CAD\$) and South African Rand (ZAR). A 10% strengthening or weakening in the USD against the Canadian dollar or South African Rand would have resulted in a gain or loss of \$1.2m (2021: \$1.6m) or \$1.4m (2021: \$0.1m) respectively.

Interest Rate Risk

As at December 31, 2022 the Company owed US\$4,657,883 towards its credit facility (refer Note 14). These loans are exposed to variable interest rates. A 10% increase or decrease in the interest rate would have resulted in an increased or decreased interest expense of \$0.1m (2021: \$0.2m).

D. FAIR VALUE MEASUREMENT

At December 31, 2022 and December 31, 2021, the carrying values and the fair values of the Company's financial instruments are shown in the following table.

	Fair value Hierarchy Level	December 31, 2022	December 31, 2022	December 31, 2021	December 31, 2021
		Carrying value USD	Fair value USD	Carrying value USD	Fair value USD
Financial assets					
Accounts receivable	2	27,819,491	27,819,491	47,625,872	47,625,872
Financial liabilities					
Debt – related parties	2	2,502,240	2,502,240	3,328,941	3,328,941
Debt	2	2,155,642	2,155,642	13,705,801	13,705,801
Warrants	3	-	-	4,574,743	4,574,743

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2 – inputs other than quoted prices that are observable for the asset or liability either directly or indirectly.
- Level 3 – inputs that are not based on observable market data.

The fair value of the Company's financial assets and financial liabilities approximate their carrying values.

26. BASIC AND DILUTED PROFIT/(LOSS) PER SHARE AS WELL AS HEADLINE AND DILUTED HEADLINE PROFIT/(LOSS) PER SHARE

Profit/(loss) per share is calculated by dividing the profit/(loss) attributable to equity holders of the Company by the weighted average number of common shares issued during the period. Diluted profit/(loss) per share is determined by adjusting the weighted average number of shares for all potential dilutive effects. The following table summarises the components of the calculation of the basic and diluted loss per share:

	December 31, 2022 US\$	December 31, 2021 US\$
Profit attributable to equity shareholders	100,925,048	48,205,090
Weighted average number of shares issued and outstanding	1,271,652,570	1,195,135,996
Profit in US cents per share	7.94	4.03

	December 31, 2022 US\$	December 31, 2021 US\$
Diluted Profit attributable to equity shareholders	100,925,048	48,205,090
Number of shares		
Weighted average number of shares in issue	1,271,652,570	1,195,135,996
Potential dilutive effect of outstanding share options	11,646,583	17,343,558
Potential dilutive effect of outstanding warrants	-	72,936,755
Diluted Weighted average number of shares issued and outstanding	1,283,299,153	1,285,416,309
Diluted Profit/(Loss) in US cents per share	7.86	3.75

The Company's shares are also listed on the Johannesburg Stock Exchange Alt.X which requires the Company to present headline and diluted headline profit per share. Headline profit per share is calculated by dividing headline profit attributable to equity holders of the Company by the weighted average number of common shares issued and outstanding during the year. Diluted headline profit per share is determined by adjusting the weighted average number of shares for all potential dilutive effects.

There were no material adjustments to profit attributable to equity shareholders for the purposes of calculating headline profit attributable to equity shareholders and hence the profit/(loss) per share is the same as the headline profit per share.

27. COMMITMENTS

Significant capital expenditure contracted for at the end of the reporting period but not recognised as liabilities is as follows:

	December 31, 2022	December 31, 2021
Property, plant and equipment	1,185,159	1,543,914
Exploration	1,014,429	6,578,157
Mpama South development project	21,945,462	-
	24,145,050	8,122,071

Included in the commitments above are lease assets committed, but the lease had not commenced at year end, with future cash flows of \$5,632,282.

28. SEGMENTED INFORMATION

The Company considers its business to consist of one reportable operating segment, being the production and sale of tin from its Bisie tin mine. As at reporting date, substantially all of the Company's operations and assets are located in the Democratic Republic of the Congo. In assessing potential operating segments, the Company has considered the information reviewed by the Chief Operating Decision Maker (CODM). The Company has identified the Board of Directors as the CODM and is satisfied that the information as presented in the financial statements is the same as that assessed by the CODM for management reporting purposes. The Company has one asset, in one commodity in one country. The Company sells its product to one customer, Gerald Metals SA.

29. CONTINGENT LIABILITIES

	December 31, 2022	December 31, 2021
Fines & penalties	500,000	500,000

A number of significant fines and penalties have been received from various governmental tax authorities. The Company is disputing these as it believes it to be substantially compliant and does not expect material settlements.

30. SUBSEQUENT EVENTS

On January 30, the Company announced a final dividend of CAD 3 cents per share (USD 2 cents per share).

INTRODUCTION

This Management's discussion and analysis (MD&A) of the financial position and results of operations of Alphamin Resources Corp. ("Alphamin," or the "Company") should be read in conjunction with the audited annual consolidated financial statements of the Company and the notes thereto for the years ended December 31, 2022 and December 31, 2021. In this discussion and analysis, unless the context otherwise dictates, a reference to the Company refers to Alphamin Resources Corp. and its subsidiaries.

This discussion and analysis contains forward-looking statements. Please refer to the cautionary language under Forward-Looking Statements within this report.

DATE OF REPORT

This MD&A is prepared as of March 9, 2023. All amounts in the financial statements and this MD&A are expressed in United States dollars ("\$\$") unless indicated otherwise.

OVERVIEW AND OUTLOOK

FINANCIAL YEAR AND QUARTER ENDED DECEMBER 2022 - OPERATIONAL HIGHLIGHTS

- ✓ **Record FY2022 tin production of 12,493 tonnes, up 14%** from the prior year
- ✓ **Q4 tin production of 3,113 tonnes exceeds market guidance** of 3,000 tonnes
- ✓ **FY2022 EBITDA¹ of US\$222m** at an average tin price of US\$30,636/t
- ✓ **Q4 EBITDA¹ of US\$27.1m** represents a **41% EBITDA margin¹** at a weak average tin price of US\$21,436/t
- ✓ **Mpama South project development advancing well**, targeting commissioning by December 2023
- ✓ **Exploration activities yielded significant new resources at Mpama South and Mpama North**
- ✓ **Final dividend for FY2022 of CAD\$0.03 per share** declared (FY2022 total dividends: CAD\$0.06 per share)

Production and Financial Summary for the quarter and year ended December 2022*

Description	Units	Actual			Actual		
		Year ended December 2022	Year ended December 2021	Change	Quarter ended December 2022	Quarter ended December 2021	Change

* Figures in the table are for 100% of the Bisie Tin project. The Company owns an 84.14% indirect interest in the project.

¹ This is a non-GAAP financial measure, is not standardized and may not be comparable to similar financial measures of other issuers. See "Use of Non-IFRS Financial Performance Measures" below for a further explanation of this performance metric and how it is calculated.

OUR BUSINESS

Alphamin's primary business is the extraction, processing and sale of tin concentrate from the Bisie Tin mine in the Democratic Republic of the Congo ("DRC"). The Company achieved commercial production on September 1, 2019. The Bisie Tin mine occurs within Permis de Exploitation (Mining Permit) PE13155, along with 3 research permits granted to Alphamin's DRC-registered subsidiary, Alphamin Bisie Mining SA ("ABM"). ABM is an 84.14% indirect controlled subsidiary of Alphamin, with the remaining 15.86% owned by the DRC government (5%) and the Industrial Development Corporation of South Africa Ltd ("IDC") (10.86%). All tenements are located within the Walikale District, North Kivu Province of the east-central DRC and lie within one of the world's principal gold and tin metallogenic provinces. The shares of Alphamin are listed on the TSX Venture Exchange ("TSX.V" - symbol AFM) in Canada, and the Johannesburg Stock Exchange AltX (symbol APH) in South Africa. For further details on the Company, readers are referred to the Company's website (www.alphaminresources.com) and to Canadian regulatory filings on SEDAR at www.sedar.com.

OPERATIONAL REVIEW – YEAR AND QUARTER ENDED DECEMBER 2022

Alphamin achieved record tin production of 12,493 tonnes for the year ended December 2022, exceeding market guidance of 12,000 tonnes. Underground mining performed particularly well with both volumes and tin grades exceeding expectations. The processing plant achieved good recoveries at an average of 75%. A highly mineralised area underground, not previously included in the mineral resource or mine plan due to its structurally complex nature, was successfully mined and processed during Q3 and Q4 2022. This area delivered ore at good tin grades but contained high levels of sulphides which impacted processing recoveries.

Contained tin production of 3,113 tonnes for Q4 2022 was in line with the previous quarter and above market guidance of 3,000 tonnes.

Sales volumes for FY2022 and Q4 were in line with production at an average achieved tin price of US\$30,636/t and US\$21,436/t, respectively. We expect contained tin production and sales of approximately 12,000 tonnes for the year ending December 2023.

AISC per tonne of tin sold remained relatively flat year-on-year at US\$14,237/t during FY2022.

EBITDA for FY2022 and Q4 2022 was US\$222m (2021: US\$198.6m) and US\$27m (Q4 2021: US\$74m), respectively. The record FY2022 EBITDA saw an average tin price achieved of US\$30,636/t. The Company remains of the opinion that global tin supply is likely to be constrained during the next five years while demand for tin is expected to increase. In light of these market fundamentals, the development of the Mpama South project and consequent planned production expansion to approximately 20,000 tonnes of contained tin per year bodes well for future cash flow generation. The Mpama South project development remains on track for commissioning in December 2023.

The Alphamin consolidated Net Cash position of US\$109 million at year-end is after dividend payments of US\$71.5m to Alphamin shareholders and minority shareholders of the operating mine, US\$30m cash applied towards the development of the Mpama South project, US\$16.7m spent on exploration activities and DRC taxes paid of US\$49.4m. Capital allocation during FY2023 will be prioritised towards the development of the Mpama South project, DRC income tax payments and shareholder distributions.

Final FY2022 Dividend Declared

On January 30, 2023 the Board declared a final FY2022 cash dividend of CAD\$0.03 per share on the common shares (approximately US\$28.7m in the aggregate) (the “Dividend”). Together with the interim FY2022 dividend of CAD\$0.03 per share declared on 5 July 2022, the total FY2022 dividends declared amount to CAD\$0.06 per share.

GROWTH INITIATIVES – YEAR ENDED DECEMBER 2022

Mpama South project development progress

On 7 March 2022², the Company announced a maiden mineral resource estimate and a positive preliminary economic assessment for Mpama South. On 29 March 2022, the Company announced an updated mineral resource estimate and the decision to develop the Mpama South project. Mpama South is expected to increase the Company’s annual contained tin production from the current 12,000tpa to ~20,000tpa, approximating 6.6%³ of the world’s mined tin.

Development progress to date is as follows:

The underground mine design has been finalised and approximately 677 metres of underground development on 2 levels connecting Mpama North and Mpama South has been completed. Underground development remains ongoing and on schedule.

The Mpama South portal geotechnical investigation has been completed and the design finalised. Surface excavation and adit development infrastructure have been completed with underground portal development having commenced in January 2023 and progressing to plan. The portal adit should reach the Mpama South underground infrastructure by July 2023.

Several units of the underground mechanised fleet have arrived on site with regular deliveries scheduled in the coming months.

Progress on the processing plant is as follows:

- EPCM (engineering, procurement and construction management), bulk earthworks, civils, and SMPPEI (structural, mechanical, piping and platework, electrical and instrumentation) contracts have been awarded;
- Design and engineering is 92% complete;
- Procurement is 99% complete;
- Fabrication of structures and platework is 65% complete;
- Bulk earthworks 90% complete and civils 25% complete; and
- Steel erecting crews are on site with the concentrate drying and product storage building already 49% complete. The main SMPPEI team mobilisation is expected in March 2023.

The Alphamin team has commenced with operational readiness preparation.

A new self-contained 500 room accommodation camp is being commissioned with 144 rooms ready for occupation.

The Mpama South development project is currently forecasted to complete within the budget of US\$116m with commissioning targeted in December 2023.

² See News Announcement 7 March 2022 for Preliminary Economic Assessment and Resources

³ Based on data obtained from International Tin Association Tin Industry Review 2022

Exploration Activities

Mpama South exploration

In just 24 months, Alphamin has:

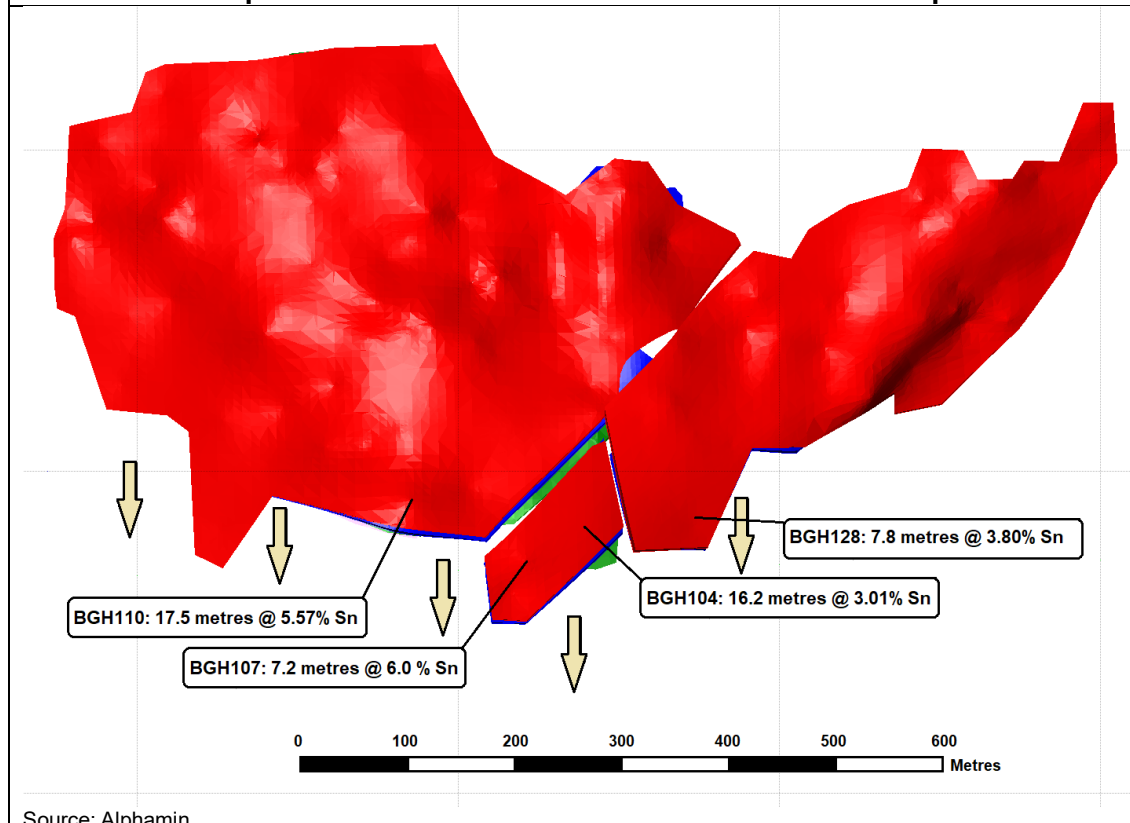

- delivered a top-10 globally significant CRIRSCO³ compliant tin deposit by contained tin at Mpama South;
- grown the resources to ~2.2 times versus the Maiden Mineral Resources and PEA¹ numbers;
- increased resource confidence across the deposit; and
- commenced mine construction through own cashflows.

This brings forward an additional planned ~7,200tpa contained tin production, which will make Alphamin one of the largest tin producers globally and delivers on the Company strategy of organic growth and creating shareholder value.

During the year, the Company drilled almost 25,000 meters at the Mpama South target, resulting in a maiden resource, preliminary economic assessment (PEA) and a decision to commence with project development followed by a technical report and updated Mineral Resource Estimate (MRE) in Q2 2022. This led to a further infill drilling campaign and resulted in an updated MRE announced on February 7, 2023 which increased the majority of the MRE to the “indicated” category.

The updated Mpama South Mineral Resource announced on February 7, 2023 included the results from 187 drillholes completed in 2021 and 2022 as well as 6 drillholes drilled in 2015 in the area between the Mpama South and Mpama North deposits. The MRE was estimated using the Canadian Institute of Mining, Metallurgy and Petroleum (CIM) Best Practice Guidelines (2019) and is reported in accordance with the 2014 CIM Definition Standards.

Figure 1: Updated Mpama South Mineral Resource 07 February 2023 with selected intercepts and direction in which mineralisation is still open

The Mineral Resource is classified into the Indicated and Inferred categories and is reported at a base case tin cut-off grade of 1.0%, which satisfies reasonable prospects for eventual economic extraction. Mpama South Indicated Resources increased by ~286% to 3.26Mt by converting Inferred Resources, while Inferred Resources grew nominally by ~275kt (excluding those tonnes converted to Indicated). The Mineral Resource Estimate, which is effective as of 07 February 2023, is presented in Table 1 below:

Table 1: Updated Mpama South Mineral Resources effective date 07 February 2023

Classification	Tonnes (millions)	Sn %	Sn Tonnes (thousands)
Indicated ⁴	3.26	2.46	80.2
Inferred ⁵	2.84	2.42	68.7

Extensional drilling down-dip and in the shallower northern and southern portions of Mpama South can be conducted at the Company's election in order to investigating the potential for additional mineralisation at Mpama South, which is still open in multiple directions. High grade drillhole intercepts around the peripheries of the currently defined Mineral Resource, highlighting areas where mineralisation remains open, are shown in Figure 1 above, illustrating the remaining prospectivity for Mineral Resource expansion. However, for 2023, the focus will primarily be aimed at the Mpama South Mine construction and commissioning efforts, while exploration drilling will be curtailed, instead, focusing on further field work campaigns to support future programs.

Mpama North Resource and LoM update

During the year, the Company drilled just under 8,000m targeting extensions to the Mpama North deposit. On August 2, 2022 the Company announced updated Mineral Resource and Mineral Reserve estimates along with an updated life of mine schedule (LoM) for the Mpama North Mine.

The updated LoM schedule showed;

- replacement of contained tin depleted over the past 2.5 years
- contained tin inventory over LoM of 154.5kt at 30 June 2022 (31 Dec 2019: 154.2kt);

The updated Resource showed:

- 155.7kt (30 June 2019: 199kt) and 41.2kt (30 June 2019: 21.8kt) tin contained (which includes mineral reserves) at 30 April 2022 in Measured/Indicated and Inferred Resources, respectively, with an 8.0% and a 65.4% increase in grade, respectively.

The updated Reserve showed

- 121.4kt tin contained at 30 June 2022 (31 Dec 2019: 133.4kt) in the Proven and Probable mineral reserve categories with 15.7% increase in grade to 4.64% Sn .

⁴ CIM Definition: An Indicated Mineral Resource is that part of a Mineral Resource for which quantity, grade or quality, densities, shape and physical characteristics are estimated with sufficient confidence to allow the application of Modifying Factors insufficient detail to support mine planning and evaluation of the economic viability of the deposit.

⁵ CIM Definition: An Inferred Mineral Resource is that part of a Mineral Resource for which quantity and grade or quality are estimated on the basis of limited geological evidence and sampling. Geological evidence is sufficient to imply but not verify geological and grade or quality continuity.

Bisie Ridge Regional Exploration Update

The Company drilled over 8,000m on the ridge during 2022. The drilling campaign on the 13km long Bisie Ridge tested highly anomalous soil, geophysical and structural targets identified during 2021.

Anomalous mineralisation was confirmed in drilling on the Ridge but was not of the obvious coarse visual cassiterite type frequently seen in drill core from Mpama North and South. Assay results, when received, will support a fuller investigation into the regional setting, along with data from the on-going geophysical downhole surveys, structural investigations and mapping, thereby enabling a refocused exploration programme. Until then, the key focus at site remains the construction and commissioning of the new Mpama South mine.

CORPORATE DEVELOPMENTS

On March 4, 2022, Mr Boris Kamstra resigned as a non-executive director of the Company.

On December 14, 2022 Mr. Jan Trouw resigned from his role as the on-mine Managing Director of the Company's 84% subsidiary, ABM, and joined the board as a non-executive director of the Company. Mr Trouw will continue with ABM in a part-time consulting role providing oversight and advisory services pertaining to ABM's underground mining and technical services activities. This includes regular visits to the mine. Also on December 14, 2022, Mr. Brendon Jones resigned from the Board.

Mr John Robertson (55), a mining professional with 30 years of experience in countries across Franco and Anglophone Africa, was appointed Managing Director of ABM. He has significant surface and underground mine management experience in both base and precious metals and a strong background in compliant Resource and Reserve exploration techniques, definition, reporting, conversion and extraction. John has experience in the management of sites of up to 3000 people and is fluent in French.

OVERALL PERFORMANCE

Net Profit before taxes for the year ended December 31, 2022 amounted to \$184,663,746 (2021: \$132,125,567).

The increase was largely driven by increased tonnes of tin sold which increased by 11% from 11,521 to 12,764. The tin price was extremely volatile during the year, but the average price achieved was flat year on year.

The tin price volatility has continued into 2023, starting the year at just over \$25,000 per tonne, increasing to over \$31,000 per tonne before dropping back to just under \$24,000 per tonne. The Company does not hedge unsold product and results are therefore highly correlated to the tin price. The Company believes this is the appropriate policy due to its position on the cost curve and low debt balances.

OPERATING ACTIVITIES

During the year ended December 31, 2022 the Company processed 436,400 (2021: 416,173) tonnes of ore, an increase of 5%. Contained tin production increased by 14% from 10,969 in 2021 to 12,493 tonnes in 2022.

Processing recoveries increased from 74% to 75% following the commissioning of the fine tin recovery plant in mid-2021, albeit that processing recoveries were negatively impacted in 2022 from a localized underground area which contained high levels of sulphides.

Contained tin sales during the year of 12,764 tonnes exceeded tin production of 12,493 tonnes as a result of good logistics conditions and improved export documentation times.

SELECTED ANNUAL INFORMATION

The following information has been extracted from the Company's annual financial statements for each of the three most recently completed financial years.

For the Years Ended:	US\$ (unless otherwise noted)	31-Dec-22	31-Dec-21	31-Dec-20
Total revenue	\$'000	391,052	352,883	187,445
Net profit/(loss) attributable to equity holders	\$'000	100,925	48,205	(8,835)
Net profit/(loss) per share, basic	US\$ cents per share	7.94	4.03	(0.83)
Net profit/(loss) per share, diluted	US\$ cents per share	7.86	3.75	(0.83)
Cash and cash equivalents	\$'000	119,389	90,640	6,558
Total assets	\$'000	490,102	421,150	297,721
Total debt including lease liabilities	\$'000	(10,053)	(22,407)	(66,467)
EBITDA	\$'000	222,158	198,592	58,302
Cash dividends declared per share	CAD cents per share	0.06	0.03	-

Operating profit for the year increased by 13% from \$168m in 2021 to \$190m in 2022 due to increased tin sales volumes. The tin price achieved for the year was flat compared to 2021 despite volatility during the year.

Profit before tax of \$185m in 2022 compared to \$132m in 2021, comprised a combination of the increase in sales volumes and lower warrant and interest charges in 2022. Warrant charges reduced in 2022 as all remaining warrants were exercised in January 2022 from which point the Company had no further warrants in issue. The Company benefitted from a reduced interest expense down 41% to \$4.9m from \$8.4m the previous year, as a result of paying down senior debt during the year.

Net income for the year increased from \$64m in 2021 to \$122m in 2022. The effective tax rate decreased in 2022 as a result of super profit tax not triggered in 2022. See note 8 of the financial statements for further details. The 2021 total tax charge of \$68.5m included \$23.9m of deferred tax charges related to utilization of assessed losses for which a deferred tax asset had been raised in the prior years.

The table below sets out the operating profit:

		Q4 2022	Q4 2021	Variance	FY 2022	FY 2021	Variance
Revenue	\$'000	65,526	117,447	-44%	391,052	352,883	11%
Cost of sales	\$'000	(40,212)	(45,191)	-11%	(175,284)	(164,390)	7%
Gross profit	\$'000	25,314	72,256	-65%	215,768	188,493	14%
General and administrative	\$'000	(7,335)	(5,837)	26%	(25,302)	(20,214)	25%
Operating profit	\$'000	17,979	66,419	-73%	190,466	168,279	13%

Figures in the table are for 100% of the Bisie Tin mine. The Company owns an 84.14% indirect interest in the Bisie Tin mine.

SUMMARY OF QUARTERLY RESULTS

The table below sets out the eight most recent quarter results:

		31-Dec 2022	30-Sep 2022	30-Jun 2022	31-Mar 2022	31-Dec 2021	30-Sep 2021	30-Jun 2021	31-Mar 2021
Total revenue	US\$'000	65,526	67,824	111,471	146,231	117,447	91,350	68,054	76,032
Profit/(loss) per share attributable to equity holders	US\$ cents	0.64	1.61	2.35	3.35	1.40	1.76	0.41	0.68
Diluted Profit/(loss) per share attributable to equity holders	US\$ cents	0.64	1.60	2.32	3.28	1.32	1.62	0.18	0.61
Net profit/(loss) attributable to equity holders	US\$'000	8,226	20,444	29,948	42,307	17,022	20,911	2,269	8,002

RESULTS OF OPERATIONS

For the three months ended December 31, 2022 compared to December 31, 2021

Net profit after tax for the three months ended December 31, 2022 was \$10.5m (2021: \$21.9m).

The Company made an operating profit of \$17.9m in Q4 2022 with contained tin sales of 3,119 tonnes and an average tin price achieved of \$21,436/t.

The Company's EBITDA and AISC per tonne of payable tin sold for the quarter and year ended December 2022 are summarized below:

		Q4 2022	Q4 2021	Variance	FY 2022	FY 2021	Variance
Tonnes processed	t	106,087	107,981	-2%	436,400	416,173	5%
Tin grade processed	t	4.0%	3.9%	3%	3.8%	3.6%	7%
Recoveries	%	73%	75%	-1%	75%	74%	1%
Payable tin produced	t	3,113	3,114	0%	12,493	10,969	14%
Payable tin Sold	t	3,119	3,056	2%	12,764	11,521	11%
Average tin price achieved	\$/t	21,436	38,432	-44%	30,636	30,629	0%
Revenue	\$'000	65,526	117,447	-44%	391,053	352,883	11%
Off mine costs	\$'000	(16,432)	(23,322)	-30%	(82,820)	(76,268)	9%
Net on mine revenue	\$'000	49,094	94,125	-48%	308,233	276,615	11%
Operating and administrative costs	\$'000	(21,959)	(19,862)	11%	(84,459)	(74,866)	13%
Concentrate stock movement (excluding depreciation)	\$'000	(87)	84	-204%	(1,616)	(3,157)	-49%
EBITDA ¹	\$'000	27,048	74,347	-64%	222,158	198,592	12%

*EBITDA is shown on a 100% basis for the Bisie Tin mine. The Company owns an 84.14% indirect interest in the Bisie Tin mine.

AISC per tonne of contained tin sold		Q4 2022	Q4 2021	Variance	FY 2022	FY 2021	Variance
On mine operating costs	\$'000	22,046	19,778	11%	86,075	78,021	10%
Tonnes of contained tin sold	t	3,119	3,056	2%	12,764	11,521	11%
On mine costs per tonne	\$/t	7,067	6,472	9%	6,743	6,772	0%
Off mine costs per tonne	\$/t	5,268	7,632	-31%	6,488	6,620	-2%
Sustaining capex per tonne	\$/t	1,103	1,014	9%	1,005	782	29%
AISC ¹	\$/t	13,438	15,117	-11%	14,237	14,173	0%

Reconciliation of operating profit to EBITDA		Q4 2022	Q4 2021	Variance	FY 2022	FY 2021	Variance
Operating Profit	\$'000	17,979	66,419	-73%	190,467	168,279	13%
Adjustments;							
Depreciation, depletion & amortisation	\$'000	7,236	6,913	5%	28,301	26,173	8%
Depreciation in stock movement	\$'000	23	390	-94%	432	1,594	-73%
Borrowing costs in G&A	\$'000	0	284	N/A	32	1,405	-98%
Share based payments in G&A	\$'000	1,683	217	676%	2,421	681	256%
Depreciation in G&A	\$'000	127	124	2%	505	460	10%
EBITDA ¹	\$'000	27,048	74,347	-64%	222,158	198,592	12%

All in sustaining cost (AISC) per tonne of contained tin sold was \$13,438 in Q4 2022 and \$14,237 for the 2022 year, down 11% and 1% respectively. AISC was lower quarter on quarter as a result of a lower tin price achieved, which impacts off-mine costs. In that regard, the marketing commission on net revenue charged by the Company's offtake partner works on a sliding scale based on the tin price ranging from 2% at \$14,000 per tonne tin ratcheting to 5.25% at tin prices above \$23,000. Similarly, government royalties, export duties and some smelter impurity and payability deductions decreased as a result of the lower tin market price. Marketing commissions, royalties and smelter deductions are included in off-mine costs and AISC per tonne of tin sold.

On-mine costs per tonne increased mainly due to the impact of inflation on diesel and medical and insurance cost increases.

For the year-ended December 31, 2022 compared to December 31, 2021

For the twelve months ended December 31, 2022 the Company incurred a profit after tax attributable to equity holders of \$100.9m (2021: \$48.2m).

EBITDA for the year amounted to \$222m, which was up 12% on 2021 due to higher sales volumes as a result of increases in grade, volumes processed and recoveries.

LIQUIDITY AND CAPITAL RESOURCES

As at December 31, 2022 the Company had a consolidated cash balance of \$119.4m (2021: \$90.6m) and net current assets of \$109.2m (2021: \$87.2m).

Net cash increased by 60% from \$68m to \$109m after distributions to shareholders of \$71.5m including non-controlling interests and corporate tax payments of \$47.9m.

Accounts payable and accrued liabilities have increased to \$82.1m in 2022 from \$55.4m in 2021. This is largely due to a DRC corporate tax liability accrued and due in April 2023.

FY2022 dividends of CAD\$0.06 per share (approximately US\$57m) were declared during and post year end. A final FY2021 payment of CAD\$.03 per share was paid early 2022.

The Company continues to generate excess operational cash and intends to allocate excess cash towards expansion in the form of the development of the Mpama South deposit, DRC tax payments as well as distributions to shareholders, where excess cash permits.

The Company has maintained significant cash balances in anticipation of 2023 taxes payable in the DRC, due to a timing effect whereby the Company will pay both a substantial year-end tax bill relating to the 2022 year and a further 80% provisional tax payments during 2023 based on the 2022 taxable result. This double effect is expected to be a one time occurrence resulting from lower provisional payments in 2021 and 2022 due to the effect of tax loss utilization.

Operating activities

Net cash generated from operating activities for the year ended December 31, 2022 was \$186.6m (year-end December 31, 2021: \$142.2m). The increase is largely a result of the increased sales volumes with a similar tin price achieved year on year. Interest payments were significantly lower in fiscal 2022 due to lower overall debt balances, despite higher interest rates. Tax payments

increased by \$45m year on year and are expected to increase by a similar amount in 2023 due to the higher provisional payments noted above. Cash flows relating to working capital balances on accounts payable and receivable are due to lower tin prices and lower concentrate stock holdings.

Investing activities

Cash used in investing activities for the year ended December 31, 2022 was \$72.8m (2021: \$25.5m). The difference arises partially from a significant increase in exploration activities from \$10.5m in 2021 to \$17.2m in 2022. Exploration success then led to a decision to develop the Mpama South mine where an additional \$30m was spent on its development, including \$15m in prepayments for equipment not yet delivered.

Financing activities

Cash outflows from financing activities for the year ended December 31, 2022 amounted to \$85.1m compared to \$32.6m in 2021. Distributions to shareholders including minority interests amounted to \$71.5m compared to \$5.5m in 2021. Debt repayments were significantly lower in 2022 due to the lower debt balances. Stock options and warrants were exercised resulting in an inflow of \$2.5m in 2022 compared to \$19.8m in 2021, the decrease being due to less warrants remaining in issue in 2022. There were no warrants outstanding at the end of 2022.

Liquidity outlook

The result of the strong tin price and operational performance in 2022 is a robust balance sheet with positive operational cash generation expected in 2023. The Company faces significant capital commitments relating to the development of the Mpama South project and expects cash outflows of around \$100m relating to DRC taxes in 2023. Management continually review cash requirements and will distribute excess cash to shareholders to the extent possible.

DIVIDENDS

The Company declared a maiden dividend of CAD\$0.03 per share in January 2022 which was paid in February 2022. An interim FY2022 dividend of CAD\$0.03 per share was paid in Q3 2022 and a final FY2022 dividend of CAD\$0.03 per share is payable on 10 March, 2023.

ASSET BACKED COMMERCIAL PAPER

The Company has leased various underground mining equipment from Epiroc Financial Solutions. In addition, the Company has entered into a lease agreement with its fuel supplier regarding a fuel farm facility built and operated by the supplier at the Company's mine site. See note 12 of the financial statements – "lease agreements" for further information.

FINANCIAL INSTRUMENTS

Cash, accounts receivable, accounts payable and accrued liabilities are considered to be a reasonable approximation of their fair value due to the short-term nature of these instruments. Cash, accounts payable and long-term debt are designated as financial instruments at amortized cost. Warrants are designated as liabilities at Fair Value Through Profit or Loss. The Company's financial instruments are exposed to a number of financial and market risks, including credit, liquidity and foreign exchange risks. The Company has established active policies to manage these risks. The Company does not currently have in place any active hedging or derivative trading policies to manage these risks since the Company's management does not believe that the current size, scale and pattern of its operations would warrant such hedging activities. The Company places its cash with high credit quality financial institutions. Additional information can be found within the Company's 2022 annual consolidated financial statements.

SHARE CAPITAL

The Company had:

Authorized share capital of an unlimited number of common shares without par value.

	March 9, 2023	December 31, 2022	December 31, 2021
Common shares issued	1,273,797,231	1,273,797,231	1,262,655,970

OUTLOOK

The information below is in addition to the disclosure concerning specific operations included in the Results of Operations section of this MD&A.

GENERAL ECONOMIC CONDITIONS

Global commodity prices have been subject to significant volatility based on macro-economic factors. The tin price has been particularly volatile and has been as low as \$13,000 per tonne and high as over \$50,000 per tonne in the last three years. It is currently trading around \$25,000 per tonne which is 16% above the Q4 2022 average price achieved but 18% below the 2022 and 2021 annual tin prices achieved. Alphamin is well placed to generate positive operational cash flows due to its place on the cost curve resulting from the high grade nature of the Mpama North orebody.

Inflation has had a relatively modest effect on cost of production to date.

Alphamin's short term targets are to produce consistently at Mpama North at 12,000 tonnes of contained tin per year and to complete construction of the Mpama South development project on time.

CAPITAL AND EXPLORATION EXPENDITURES

During FY2022, the Company decided to proceed with the development of the Mpama South Development project which will absorb significant capital in FY2023. As a result, exploration expenditures will be scaled back in 2023.

OFF BALANCE SHEET ARRANGEMENTS

During the fiscal years ended December 31, 2022 and 2021, the Company was not a party to any off-balance-sheet arrangements that have, or are reasonably likely to have, a material current or future effect on the results of operations, financial condition, revenues or expenses, liquidity, capital expenditures or capital resources of the Company.

MARKET RISK DISCLOSURES

Management have been consistent in deciding not to hedge the tin price for unsold product. The Company operates the highest-grade tin mine in the world and with a very small debt balance and low AISC believe this is the appropriate policy.

NEW ACCOUNTING STANDARDS AND INTERPRETATIONS

A. BASIS OF PREPARATION

The Company's financial statements, including comparatives, have been prepared using accounting policies consistent with *International Financial Reporting Standards (IFRS)* as issued by the *International Accounting Standards Board (IASB)* and Interpretations issued by the *International Financial Reporting Interpretations Committee (IFRIC)*. These financial statements have been prepared on a historical cost basis except for share-based payments and certain financial assets, which have been measured at fair value. In addition, the financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

Consolidated statements of profit/(loss) and comprehensive profit/(loss) presentation

During the 2019 financial year, the Company amended its presentation of the Consolidated statements of profit/(loss) and comprehensive profit/(loss). This was due to the entity reaching

commercial production. This was to enhance the readability of the financial statements of the users.

Application of new and revised standards

The following standards became effective for annual periods beginning on or after January 1, 2022. The Company adopted these standards in the current year and they did not have a material impact on its financial statements unless specifically mentioned below.

International Financial Reporting Standards and amendments effective for the first time for <i>December</i> 2022 year-end		
Number	Effective date	Executive summary
IFRS 16, 'Leases' COVID-19-Related Rent Concessions Amendment (Covid-19 related rent concessions extended to 30 June 2022)	Annual periods beginning on or after 1 June 2020 (early adoption is permitted) (Published March 2021)	The IASB has provided lessees (but not lessors) with relief in the form of an optional exemption from assessing whether a rent concession related to COVID-19 is a lease modification, provided that the concession meets certain conditions. On 31 March 2021, the IASB published an additional amendment to extend the date of the practical expedient from 30 June 2021 to 30 June 2022. Lessees can elect to account for such rent concessions in the same way as they would if they were not lease modifications. In many cases, this will result in accounting for the concession as variable lease payments in the period(s) in which the event or condition that triggers the reduced payment occurs. The March 2021 amendment will only be available if an entity chose to apply the May 2020 optional practical expedient.
Annual improvements cycle 2018 -2020	Annual periods beginning on or after 1 January 2022 (Published May 2020)	These amendments include minor changes to: <ul style="list-style-type: none"> • IFRS 1, 'First time adoption of IFRS' has been amended for a subsidiary that becomes a first-time adopter after its parent. The subsidiary may elect to measure cumulative translation differences for foreign operations using the amounts reported by the parent at the date of the parent's transition to IFRS. • IFRS 9, 'Financial Instruments' has been amended to include only those costs or fees paid between the borrower and the lender in the calculation of "the 10% test" for derecognition of a financial liability. Fees paid to third parties are excluded from this calculation. • IFRS 16, 'Leases', amendment to the Illustrative Example 13 that accompanies IFRS 16 to remove the illustration of payments from the lessor relating to leasehold improvements. The amendment intends to remove any potential confusion about the treatment of lease incentives.

International Financial Reporting Standards and amendments effective for the first time for <i>December 2022</i> year-end		
Number	Effective date	Executive summary
		<ul style="list-style-type: none"> IAS 41, 'Agriculture' has been amended to align the requirements for measuring fair value with those of IFRS 13. The amendment removes the requirement for entities to exclude cash flows for taxation when measuring fair value.
Amendments to IAS 37 Onerous Contracts—Cost of Fulfilling a Contract	Annual periods beginning on or after 1 January 2022 (Published May 2020)	The amendment clarifies which costs an entity includes in assessing whether a contract will be loss-making. This assessment is made by considering unavoidable costs, which are the lower of the net cost of exiting the contract and the costs to fulfil the contract. The amendment clarifies the meaning of 'costs to fulfil a contract'. Under the amendment, costs to fulfil a contract include incremental costs and the allocation of other costs that relate directly to fulfilling the contract.
Amendments to IAS 16 Property, Plant and Equipment: Proceeds before Intended Use	Annual periods beginning on or after 1 January 2022 (Published May 2020)	<p>The amendment to IAS 16 prohibits an entity from deducting from the cost of an item of PPE any proceeds received from selling items produced while the entity is preparing the asset for its intended use (for example, the proceeds from selling samples produced when testing a machine to see if it is functioning properly). The proceeds from selling such items, together with the costs of producing them, are recognised in profit or loss.</p> <p>The group does not deduct the proceeds from selling items produced while bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management from the cost of property, plant and equipment. Therefore the amendment has no impact on the consolidated financial statements.</p>
Amendment to IFRS 3, 'Business combinations' Asset or liability in a business combination clarity	Annual periods beginning on or after 1 January 2022 (Published May 2020)	<p>The Board has updated IFRS 3, 'Business combinations', to refer to the 2018 Conceptual Framework for Financial Reporting, in order to determine what constitutes an asset or a liability in a business combination.</p> <p>In addition, the Board added a new exception in IFRS 3 for liabilities and contingent liabilities. The exception specifies that, for some types of liabilities and contingent liabilities, an entity applying IFRS 3 should instead refer to IAS 37, 'Provisions, Contingent Liabilities and Contingent Assets', or IFRIC 21, 'Levies', rather than the 2018 Conceptual Framework.</p> <p>The Board has also clarified that the acquirer should not recognise contingent assets, as defined in IAS 37, at the acquisition date.</p>

Future accounting changes

The following new standards, amendments to standards and interpretations have been issued but are not effective during the year ended December 31, 2022. The Company has not yet adopted these new and amended standards. The Company has considered the amendments and assessed that they will have no material impact on adoption.

International Financial Reporting Standards, interpretations and amendments issued but not effective		
Number	Effective date	Executive summary
IFRS 17, 'Insurance contracts'	<p>Annual periods beginning on or after 1 January 2023</p> <p>Early application is permitted for entities that apply IFRS 9, 'Financial Instruments', and IFRS 15, 'Revenue from Contracts with Customers', at or before the date of initial application of IFRS 17.</p> <p>(Published May 2017)</p>	<p>The IASB issued IFRS 17, 'Insurance contracts', and thereby started a new epoch of accounting for insurers. Whereas the current standard, IFRS 4, allows insurers to use their local GAAP, IFRS 17 defines clear and consistent rules that will significantly increase the comparability of financial statements. For insurers, the transition to IFRS 17 will have an impact on financial statements and on key performance indicators.</p> <p>Under IFRS 17, the general model requires entities to measure an insurance contract at initial recognition at the total of the fulfilment cash flows (comprising the estimated future cash flows, an adjustment to reflect the time value of money and an explicit risk adjustment for non-financial risk) and the contractual service margin. The fulfilment cash flows are remeasured on a current basis each reporting period. The unearned profit (contractual service margin) is recognised over the coverage period.</p> <p>Aside from this general model, the standard provides, as a simplification, the premium allocation approach. This simplified approach is applicable for certain types of contract, including those with a coverage period of one year or less.</p> <p>For insurance contracts with direct participation features, the variable fee approach applies. The variable fee approach is a variation on the general model. When applying the variable fee approach, the entity's share of the fair value changes of the underlying items is included in the contractual service margin. As a consequence, the fair value changes are not recognised in profit or loss in the period in which they occur but over the remaining life of the contract.</p>
IFRS 17, Insurance contracts Amendments	<p>Annual periods beginning on or after 1 January 2023</p>	<p>In response to some of the concerns and challenges raised, the Board developed targeted amendments and a number of proposed clarifications intended to ease implementation of IFRS 17, simplify some requirements of the standard and ease transition. The amendments relate to eight areas of IFRS 17, and they are not intended to change the fundamental principles</p>

International Financial Reporting Standards, interpretations and amendments issued but not effective		
Number	Effective date	Executive summary
	(Published June 2020)	of the standard or unduly disrupt implementation already underway.
Amendment to IAS 1, 'Presentation of Financial Statements' on Classification of Liabilities as Current or Non-current	Annual periods beginning on or after 1 January 2023 (Published Jan 2020)	The amendment clarifies that liabilities are classified as either current or non-current, depending on the rights that exist at the end of the reporting period. A number of requirements are required to be met in conjunction with this amendment.
Amendments to IAS 12, Income Taxes: Deferred Tax related to Assets and Liabilities arising from a Single Transaction	Annual periods beginning on or after 1 January 2023. Earlier application is permitted. (Published May 2021)	The amendments require companies to recognise deferred tax on transactions that, on initial recognition give rise to equal amounts of taxable and deductible temporary differences.
Narrow scope amendments to IAS 1 'Presentation of Financial Statements', Practice statement 2 and IAS 8 'Accounting Policies, Changes in Accounting Estimates and Errors'	Annual periods beginning on or after 1 January 2023. Earlier application is permitted. (Published February 2021)	The amendments aim to improve accounting policy disclosures and to help users of the financial statements to distinguish changes in accounting policies from changes in accounting estimates.

RISKS AND UNCERTAINTIES

The operating results and financial condition of the Company are subject to a number of inherent risks and uncertainties associated with its business activities, which include the operation of the Bisie underground tin mine, its ore processing facilities and concentrate sales activities, and financing activities and further growth and exploration initiatives. The operating results and financial condition are also subject to numerous external factors, which include economic, social, geo-political, regulatory, legal, tax and market risks impacting, among other things, metal prices, operational input prices, concentrate treatment and logistical costs, foreign exchange rates, inflation and the availability and cost of capital to fund the liquidity requirements of the business. Each of these risks could have a material adverse impact on the Company's future business, results of operations and financial condition, and could cause actual results to differ materially from those described in any Forward-Looking Statements contained in this MD&A. The Company endeavors to manage these risks and uncertainties in a balanced manner with a view to mitigating risk while maximizing total shareholder returns. It is the responsibility of senior management to identify and effectively manage the risks of the business. This includes developing appropriate

risk management strategies, policies, processes and systems. There can be no assurance that the Company has been or will be successful in identifying all risks or that any risk-mitigating strategies adopted to reduce or eliminate risk will be successful. A description of the more significant business risks and uncertainties affecting the Company are set out below. These risks, along with other potential risks not specifically discussed in this MD&A, should be considered when evaluating the Company. Additional risks not identified below may affect the Company.

Fluctuations in Commodity Prices and Tin Price Exposure

The price of the common shares of the Company, and the consolidated financial results and exploration, development and mining activities of the Company may in the future be significantly and adversely affected by declines in the price of tin. The price of tin fluctuates widely and is affected by numerous factors beyond the control of the Company such as the sale or purchase of commodities by various central banks and financial institutions, interest rates, exchange rates, inflation or deflation, fluctuation in the value of the United States dollar and foreign currencies, global and regional supply and demand, the political and economic conditions and production costs of major mineral-producing countries throughout the world, and the cost of substitutes, inventory levels and carrying charges. Future serious price declines in the market value of tin could cause continued development of and commercial production from the properties in which the Company holds an interest to be impracticable. Depending on the price of tin, cash flow from any mining operations may not be sufficient and the Company could be forced to discontinue production and may lose its interest in, or may be forced to sell, some of its properties. Any future production from the Company's mining properties is dependent upon the prices of tin being adequate to make these properties economic. In addition to adversely affecting the resource estimates of the Company and its financial condition, declining commodity prices can impact operations by requiring a reassessment of the feasibility of a particular project. Such a reassessment may be the result of a management decision or may be required under financing arrangements related to a particular project. Even if a project is ultimately determined to be economically viable, the need to conduct such a reassessment may cause substantial delays or may interrupt operations until the reassessment can be completed. The Company sells tin concentrate based on the three or four-month average tin price at or close to the date of delivery to the customer, as agreed from time to time. The point of delivery could be any of Logu or Goma, in the North Kivu province of DRC or Kampala, Uganda under the terms of the contract. The Company does not have a hedging policy and is exposed to significant price movements between provisional invoicing and final pricing, which can be significant in a volatile tin price environment.

Uncertainty of Production and Cost Estimates

As a result of the substantial expenditures involved in the development of mineral projects and the fluctuation and increase of costs over time, development projects may be prone to material cost overruns. The Company's actual production and costs may vary from estimates for a variety of reasons, including: increased competition for resources and development inputs; cost inflation affecting the mining industry in general; actual ore mined varying from estimates of grade, tonnage, dilution and metallurgical and other characteristics; short-term operating factors relating to the ore reserves, such as the need for sequential development of ore bodies and the processing of new or different ore grades; revisions to mine plans, changes in the ore processing recoveries to final concentrate, difficulties with supply chain management, including the implementation and management of enterprise resource planning software; risks and hazards associated with mining; natural phenomena, such as inclement weather conditions, outbreaks of illness, water or power availability, floods, and earthquakes, volcanoes; and unexpected labour shortages or strikes. Operating costs may also be affected by a variety of factors, including changing waste-to-ore ratios, ore grades mined and processing recoveries, labour costs, cost of commodities and other inputs, general inflationary pressures and currency exchange rates. Many of these factors are beyond the Company's control. No assurance can be given that the Company's cost estimates will be achieved. Failure to achieve production or cost estimates or material increases in costs could have an adverse impact on Alphamin's future cash flows, profitability, results of operations and financial condition.

Global Financial Conditions

Global financial conditions continue to be characterized as volatile. In recent years, global markets have been adversely impacted by various credit crises and significant fluctuations in fuel, energy, and transportation costs, and metals prices. Many industries, including the mining industry, have been impacted by these market conditions. A slowdown in the financial markets, geopolitical events, or other economic conditions, including, but not limited to, consumer spending, employment rates, business conditions, inflation, fuel, energy and transportation costs, consumer debt levels, lack of available credit, the state of the financial markets, interest rates and tax rates, may adversely affect the Company's growth and profitability. Future crises may be precipitated by any number of causes, including natural disasters, outbreaks of medical endemic or pandemic issues, geopolitical instability, changes to energy prices or sovereign defaults. If increased levels of volatility continue or in the event of a rapid destabilization of global economic conditions, it may result in a material adverse effect on commodity prices, demand for metals, availability of credit, investor confidence, and general financial market liquidity, all of which may adversely affect the Company's business and the market price of its securities. In addition to potentially affecting the price of commodities, general inflationary pressures may also affect the Company's labor, commodity, and other input costs at operations, which could have a materially adverse effect on the Company's financial condition, results of operations and capital expenditures for the development of its projects.

Political & Legal Framework Stability – Democratic Republic of Congo (DRC)

Alphamin's Bisie tin mining projects are located in the Walikale District of the North Kivu province, east central DRC. In the DRC, the assets and operations of the Company could be subject to the effects of political changes, war and civil conflict, ramifications from the relocation of artisanal miners, changes in government policy, lack of law enforcement, labour unrest and the creation of new laws. These changes (which may include new or modified taxes or other government levies and aggressive policies for their collection, as well as other legislation) may impact the profitability and viability of the Company's mining projects. The DRC is a developing country. It is in transition from a largely state controlled economy to one based on free market principles, and from a non-democratic political system with a centralized ethnic power base to one based on more democratic principles. There can be no assurance that these changes will be effected or that the achievement of these objectives will not have material adverse consequences for Alphamin and its operations. Moreover, the east central region of the DRC has undergone civil unrest and instability that could have an impact on political, social or economic conditions in the DRC generally. The impact of unrest and instability on political, social or economic conditions in the DRC could result in the impairment of the exploration, development and operations at the Company's mineral properties and the movement of funds, goods, people and tin concentrate to and from such properties. Any such changes are beyond the control of Alphamin and may materially adversely affect its business.

Uncertainty of DRC Mining Code

On March 9, 2018, the then DRC President signed into effect the 2018 Mining Code that revised the country's 2002 mining code. The 2018 Mining Code made revisions to a number of provisions included in the previous code including the removal of a 10-year tax stability clause, an increase in royalty rates from 2% to 3.5%, super profit taxes, local content, capital gains tax on indirect transfers or sales of mineral rights situated in the DRC and other matters. In addition, new mining regulations were also implemented alongside the revised DRC Mining Code. In some instances, the revisions are unclear and potentially open to interpretation. While the 2018 Mining Code has been implemented, the DRC Government may, in the future, amend, modify, supplement or repeal the 2018 Mining Code and the mining regulations. Such changes may be with or without notice to the industry and may be materially adverse and/or materially increase the cost of exploring, developing and/or operating a mine in the DRC. Any such future changes could be materially adverse to the Company's financial condition, results of operations, business or prospects, and those of its mineral properties. The Company's tax accrual in the DRC makes certain assumptions around assessed losses brought forward and application of superprofit taxes. It is not uncommon in the DRC for these assumptions to be challenged aggressively which could result in higher taxes being paid than are accrued. The 2018 Mining Code introduced a

capital gains tax (CGT) on indirect transfers of mineral rights situated in the DRC. The wording of this tax is vague and open to interpretation. CGT could become a factor in the price paid of any acquisition of the Company in a potential merger or acquisition transaction.

Risk of Legal and Administrative Proceedings

The nature and location of the Company's business exposes it to various litigation matters, including civil liability claims, environmental matters, health and safety matters, regulatory and administrative proceedings, governmental investigations, tort claims, allegations of discriminatory practices, harassment, unethical behavior, breach of human rights, contract disputes, labor matters and tax matters, among others. In addition, the Company may be subject to proceedings as a result of misconduct by its employees or third-party contractors, such as theft, bribery, sabotage, fraud, insider trading, violation of laws, slander or other illegal actions. All industries, including the mining industry, are subject to legal claims, with and without merit. The Company is currently involved in litigation and may become involved in legal disputes in the future. Defense and settlement costs associated with litigation can be substantial, even with respect to claims that are frivolous or have no merit. Due to the inherent uncertainty of the litigation process, the resolution of any particular legal proceeding may have a material adverse effect on the Company's financial position or results of operations. Securities class action litigation is also becoming more prevalent and is often brought against companies following periods of volatility in the market price of their securities.

Public Health Crises

The Company's business, operations and financial condition could be materially adversely affected by the outbreak of epidemics, pandemics or other health crises, such as Ebola and the outbreak of the coronavirus COVID-19 that was first reported from Wuhan, China in December 2019 and designated as a pandemic by the WHO on March 11, 2020. The international response to the spread of COVID-19 has led to significant restrictions on travel, temporary business closures, quarantines, stay-at-home orders, global stock market volatility, disruptions in supply chains, a reduction in consumer activity and increased volatility of commodity prices, including the price of tin. Such public health crises can result in operating, supply chain and project delays and disruptions, unavailability of parts and supplies, global stock market and financial market volatility, declining trade and market sentiment, reduced movement of people and labour shortages, and travel and shipping disruption and shutdowns, including as a result of government regulation and prevention measures, or a fear of any of the foregoing, all of which could affect commodity prices, interest rates, credit ratings, credit risk and inflation. The Company may experience business interruptions, including suspended or reduced operations at the Company's Bisie tin mine and at third-party processing facilities, expenses and delays, relating to COVID-19 and other such events outside of the Company's control, which could have a material adverse impact on its business, operating results, financial condition and the market for its securities. As at the date of this MD&A, the duration of the business disruptions internationally and related financial impact of COVID-19 cannot be reasonably estimated. It is unknown whether and how the Company may be affected if such an epidemic persists for an extended period of time. In particular, the DRC, in which the Company operates, may not have sufficient public infrastructure to adequately respond or efficiently and quickly recover from such event, which could have a materially adverse effect on the Company's operations. The Company's exposure to such public health crises also includes risks to employee health and safety. The Company's operations are located in a remote and isolated area and represent a concentration of personnel working and residing in close proximity to one another. Should an employee or visitor become infected with a serious illness that has the potential to spread rapidly, this could place our workforce and ongoing operations at risk.

Failure to Achieve Production, Cost or Other Estimates

The Company has made estimates with respect to capital costs, operating costs, tin concentrate production levels and other economic parameters with respect to the Bisie tin mine and the Mpama South deposit. The Company's actual costs, production, returns, payback and other financial and economic performance metrics for the Bisie tin mine and the Mpama South deposit are dependent on a number of factors, including currency exchange rates, the price of tin, the

cost of inputs used in mining development and operations and events that impact cost and production levels that are not in the Company's control. The Company's actual costs may vary from estimates for a variety of reasons, including changing waste-to-ore ratios, ore grade, recoveries, labour and other input costs, commodity prices, costs incurred to transport products and consumables, external tin concentrate treatment charges, governmental charges and taxes and general inflationary pressures and currency exchange rates. Failure to achieve cost estimates or tin production targets or other economic performance metrics or material increases in costs could have a material adverse impact on the Company's future cash flows, profitability, financial condition, results of operations, investor confidence and share price.

Exploration, Development and Operating Risks

Mining operations generally involve a high degree of risk. The Company's operations are subject to all the hazards and risks normally encountered in the exploration, development and production of minerals, including unusual and unexpected geologic formations and weak underground geotechnical conditions, seismic activity, rock bursts, landslides, cave-ins, flooding and other conditions involved in the drilling and removal of material, any of which could result in damage to, or destruction of, mines and other producing facilities, damage to life or property, environmental damage and possible legal liability. Although adequate precautions to minimize risk will be taken, processing operations are subject to hazards such as equipment failure or failure of retaining dams around tailings disposal areas which may result in environmental pollution and consequent liability. The Company's mining operations are located in a remote area and may be affected by adverse climate issues due to climate change or other factors, resulting in technical challenges for conducting both underground mining operations and processing and sales activities on surface. Although Alphamin benefits from modern mining technology, the Company may sometimes be unable to overcome problems related to weather and climate either expeditiously or at a commercially reasonable cost, which could have a material adverse effect on its business, results of operations and financial condition. The exploration for and development of mineral deposits involves significant risks which even a combination of careful evaluation, experience and knowledge may not eliminate. While the discovery of a mineral deposit may result in substantial rewards, few properties which are explored are ultimately developed into producing mines. Major expenses may be required to locate and establish additional mineral reserves, to develop metallurgical processes and to construct mining and processing facilities at a particular site. It is impossible to ensure that the exploration or development programs planned by the Company will result in a profitable commercial mining operation. Whether a mineral deposit will be commercially viable depends on a number of factors, some of which are: the particular attributes of the deposit, such as quantity and quality of minerals and proximity to infrastructure; mineral prices which are highly cyclical; and government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot be accurately predicted, but the combination of these factors may result in the Company not receiving an adequate return on invested capital. There is no certainty that the expenditures made by the Company towards the search and evaluation of mineral resources will result in discoveries of commercial quantities of any minerals. The market prices of precious and base metals are volatile and are affected by numerous factors beyond the Company's control. These factors include international economic and political trends, expectations of inflation, global and regional demand, currency exchange fluctuations, interest rates, global or regional consumption patterns, speculative activities, increased production due to improved mining and production methods and economic events. To the extent that positive cash flow from mining operations is not sufficient to fund the Company's operations, external financing will be required. Actual funding may vary from what is planned due to a number of factors including the progress of exploration, development and production of its current properties. Should changes in equity market conditions prevent the Company from obtaining additional financing, the Company will need to review its properties and prioritize project expenditures based on funding availability.

Mpama South Development Decision

The Company's production decision with respect to the Mpama South deposit was not based on the results of a pre-feasibility study or feasibility study of mineral resources demonstrating economic or technical viability. The production decision was based on a preliminary economic

assessment (PEA) and mineral resources identified to date, including inferred mineral resources. The PEA is preliminary in nature, includes inferred mineral resources and potential grades and quantities of minerals that are considered too speculative geologically to have the economic considerations applied that would enable them to be classified as mineral reserves and there is no certainty that the preliminary economic assessment will be realized. Notwithstanding the very preliminary and conceptual nature of the preliminary economic assessment, based on the Company's experience at Mpama North and knowledge base, including regarding underground conditions, the mining method and processing route, and the proximity and very similar characteristics of the deposits, the Company had a higher level of confidence in proceeding with a production decision for Mpama South at a point in time that was earlier than otherwise might be the case. Among the risks associated with the decision to commence production at Mpama South is the possibility that the deposit will not be economically or technically viable, construction timetables, cost estimates and production forecasts may not be realized or may be delayed.

Financing and Liquidity

The Company expects to rely on cash flows generated from its Bisie tin mining operations to fund its operating, investment, debt service and liquidity needs. The cyclical nature of the Company's business, adverse commodity prices, unexpected costs or delays, the effects of inflation and general economic conditions are such that conditions could change dramatically, affecting the Company's cash flow generating capability, its ability to fund its operations or service indebtedness, all of which could have a material adverse impact on the Company's earnings and cash flows and, in turn, could affect total shareholder returns or its ability to operate. Should additional capital be required, there can be no assurance that the Company will be able to obtain adequate financing or capital in the future or that the terms of such financing or capital will be favourable. Failure to obtain such additional financing could result in a delay or indefinite postponement of operational activities and development or construction project initiatives and could have a material adverse impact on the Company's business, financial condition, results of operations and share price.

Credit Facility

The Company's Credit Facility limits, among other things, the Company's ability to permit the creation of certain liens, make investments, dispose of the Company's material assets or, in certain circumstances, pay dividends or pursue capital intensive growth initiatives. In addition, the Credit Facility limits the Company's ability to incur additional indebtedness and requires the Company to maintain specified financial ratios and meet financial condition covenants. Events beyond the Company's control, including changes in general economic and business conditions and the market price of tin as a result of the COVID-19 pandemic or other factors, may affect the Company's ability to satisfy these covenants or make principal or interest payments, which could result in a default under the Credit Facility. If an event of default under the Credit Facility occurs, the lenders could elect to declare all principal amounts outstanding thereunder at such time, together with accrued interest, to be immediately due. An event of default under the Credit Facility may also give rise to an event of default under existing and future debt agreements and, in such event, the Company may not have sufficient funds to repay amounts owing under such agreements.

State of Siege in Eastern DRC

The state of siege relating to the provinces of North Kivu and Ituri issued by the DRC Government effective 6 May 2021 continues to be in place. The DRC national government's intention in effecting the state of siege is to improve stability in these regions of the eastern DRC. The Company does not expect its operations to be negatively impacted by the state of siege.

Dependence on Key Management and Employees

The success of the operations and activities of Alphamin is dependent to a significant extent on the efforts and abilities of a small number of officers, key employees and outside contractors. Relationships between the Company and its employees may be affected by changes in the

scheme of labour relations that may be introduced by relevant government authorities in the jurisdictions in which the Company operates. Changes in applicable legislation or in the relationship between the Company and its employees or contractors may have a material adverse effect on the Company's business, results of operations and financial condition. The Company's ability to manage its operating, development, exploration and financing activities will depend in large part on the efforts of key management personnel. The loss of the services of one or more of these individuals could adversely affect Alphamin's profitability, results of operations and financial condition. The Company faces significant competition for qualified personnel and there can be no assurance that the Company will be able to attract and retain such personnel. The Company does not hold key person insurance on any of these individuals.

Counterparty Risk

The Company has entered into a concentrate off-take agreement whereby 100% of planned production of tin concentrate produced from the Company's Bisie tin mine is committed to an external party throughout the calendar year. If the counterparty to the off-take agreement does not honour such arrangement, is contractually able to exclude itself from performance, or should the counterparty become insolvent, the Company may incur losses on the production already shipped or be forced to sell a greater volume of production in the spot market, which is subject to market price fluctuations. In addition, there can be no assurance that the Company will be able to renew the off-take arrangement on economic terms upon expiry, or at all, or that the Company's production will meet the qualitative and quantitative requirements under such arrangement.

Foreign Exchange

By virtue of its international operations, the Company incurs costs and expenses in a number of foreign currencies. The revenue from mining operations received by the Company is denominated in U.S. dollars since the price of tin it produces is referenced in U.S. dollars, and the majority of operating and capital expenditures of its mining and other operations are denominated in U.S. dollars but certain operating and capital expenditures are denominated in South African rand and Euro. Fluctuations in these foreign exchange rates give rise to foreign exchange exposures, either favourable or unfavourable, which could have a material impact on the Company's business, financial condition and results of operations.

Foreign Operations

In the DRC, the assets and operations of the Company are subject to various levels of political, economic and other risks and uncertainties associated with operating in a foreign jurisdiction. These risks and uncertainties include, but are not limited to, currency exchange rates; high rates of inflation; labour unrest; renegotiation or nullification of existing concessions, licenses, permits and contracts; changes in taxation policies; restrictions on foreign exchange; changing political conditions; currency controls and foreign governmental regulations that favour or require the awarding of contracts to local contractors or require foreign contractors to employ citizens of, or purchase supplies from, a particular jurisdiction. Changes, if any, in mining or investment policies or shifts in political attitude in the DRC may adversely affect Alphamin's operations and/or profitability. Operations may be affected in varying degrees by government regulations with respect to, but not limited to, restrictions on production, price controls, export controls, currency remittance, income taxes, foreign investment, maintenance of claims, environmental legislation, land use, land claims of local people, water use and mine safety. Failure to comply strictly with applicable laws, regulations and local practices relating to mineral right applications and tenure could result in the loss, reduction or expropriation of entitlements. It is not possible for Alphamin to accurately predict such developments or changes in laws or policy or to what extent any such developments or changes may have a material adverse effect on the Company's operations.

Resource Nationalism

Governments in certain jurisdictions struggle with depressed economies and as a result have targeted mining companies for additional revenue by way of increased economic rent for the exploitation of resources in their countries. Many countries have implemented changes to their respective mining regimes. Future changes could include things such as, but not limited to, law

affecting foreign ownership and take-overs, mandatory government participation, taxation and royalties, working conditions, expropriation, export duties or repatriation of income or return of capital.

Bribery and Corruption

The Company's operations are governed by, and involve interactions with, public officials and many levels of government in the DRC. Its operations take place in a jurisdiction ranked unfavourably under Transparency International's Corruption Perception Index. This jurisdiction may be vulnerable to the possibility of bribery, corruption, collusion, kickbacks, theft, improper commissions, facilitation payments, conflicts of interest and related party transactions. The Company is required to comply with anti-bribery and anti-corruption ("ABC") laws in the countries in which the Company conducts its business. In recent years, there has been a general increase in both the frequency of enforcement and the severity of penalties under such laws, resulting in greater scrutiny and punishment to companies convicted of violating anti-corruption and anti-bribery laws. Furthermore, a company may be found liable for violations by not only its employees, but also by third parties, such as, but not limited to, contractors, suppliers, consultants, agents and customers. Although the Company has adopted a number of steps to mitigate bribery and corruption risks, which include, among others, developing policies and procedures, establishing a third party due diligence process, implementing training programs and performing regular internal monitoring activities and audits, such measures may not always be effective in ensuring the strict compliance with ABC laws of the Company, its employees or third parties. If the Company finds itself subject to an enforcement action or is found to be in violation of such laws, this may result in significant penalties, fines and/or sanctions imposed on the Company resulting in a material adverse impact on the Company's reputation, business, financial condition and results of operations.

Laws, Regulations and Permitting

The activities of the Company are subject to various laws and regulations governing prospecting, exploration, development, production, taxes, labour standards and occupational health, mine safety, toxic substances, land use, water use, land claims of local people, archaeological discovery and other matters. Although the Company currently carries out its operations and business in accordance with all applicable laws, rules and regulations, no assurance can be given that new laws, rules and regulations will not be enacted or that existing laws, rules and regulations will not be changed or be applied in a manner which could limit or curtail production or development. Furthermore, amendments to current laws and regulations governing operations and activities of mining, milling and processing or more stringent implementation thereof could cause costs and delays that could have a material adverse impact on the Company's business, financial condition and results of operations. The Company's current and future operations and development activities are subject to receiving and maintaining permits from appropriate governmental authorities. Although the Company currently has the required permits for its current operations, there can be no assurance that delays will not occur in connection with obtaining all necessary renewals of such permits for the existing operations or additional permits for planned new operations or changes to existing operations that could have a material adverse impact on the Company's business, financial condition and results of operations. Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions. Parties engaged in mining and processing operations or in the exploration or development of mineral properties may be required to compensate those suffering loss or damage by reason of the mining and processing activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations.

Market Access Restrictions or Tariffs

The Company could experience market access interruptions or trade barriers due to policies or tariffs of individual countries, or the actions of certain interest groups to restrict the import of certain commodities. Restrictions or interruptions in refining tin or the Company's ability to transport concentrate across country borders could materially affect its business operations.

The Company's exported tin concentrate, or the supplies it imports may also be subject to tariffs, which may impair the competitiveness of its business.

Conflict Minerals

There have been a number of international initiatives to reduce trade in natural resources extracted in conflict zones, the sale of which are used to further fund conflict. For example, initiatives contained in Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act in the United States and OECD Due Diligence Guidelines for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas require supply chain managers to verify purchased goods as "conflict-free" or implement measures to address any inability to do so. Similar legislative requirements have been adopted by the EU. Due to the geographic origin of the tin concentrate from the Bisie tin mine, under applicable laws and guidelines, the Company is required to certify to processing smelters and refiners that the concentrate produced at the Bisie tin mine is "conflict-free". This certification must be obtained from independent third party auditors, and should the Company not be able to maintain the "conflict-free" status of its tin concentrate in future, this could materially negatively affect sales of tin concentrate to refiners and could have a material adverse effect on the Company's business, operating results and financial position.

Enforcement of Legal Rights

In the event of a dispute arising at its foreign operations, the Company may be subject to the exclusive jurisdiction of foreign courts or may not be successful in subjecting foreign persons to the jurisdiction of courts in preferred jurisdictions or in arbitration. The Company may also be hindered or prevented from enforcing its rights with respect to a governmental entity or instrumentality because of the doctrine of sovereign immunity.

Stakeholder Relations and License to Operate

The Company's relationships with local communities and other stakeholders are critical to ensure the future success of its existing operations and the construction and development of its projects. There is an increasing level of public concern relating to the perceived effect of mining and smelter activities on the environment and on communities impacted by such activities. NGOs and civil society groups, some of which oppose globalization and resource development, are often vocal critics of the mining industry and its practices, including the use of hazardous substances and the handling, transportation and storage of various waste, including hazardous waste. Adverse publicity generated by such NGOs and civil society groups or others related to the extractive industries generally, or the Company's operations specifically, could have a material adverse impact on, including but not limited to, the laws under which the Company operates, its ability to secure new permits and its reputation. Reputation loss may result in decreased investor confidence, increased challenges in developing and maintaining community relations and an impediment to the Company's overall ability to advance its projects, obtain permits and licenses and/or continue its operations, which could have a material adverse impact on the Company's business, results of operations and financial condition. While the Company is committed to operating in a socially responsible manner, there is no guarantee that its efforts in this regard will mitigate this potential risk. The inability of the Company to maintain positive relationships with local communities may also result in additional obstacles to permitting, increased legal challenges, or other disruptive operational issues at its operating mines, and could have a significant adverse impact on the Company's ability to generate cash flow, with a corresponding adverse impact to the Company's share price and financial condition.

Estimates of Mineral Resources and Mineral Reserves

The mineral resources and mineral reserves disclosed by the Company are estimates and no assurance can be given that the anticipated tonnages and grades will be achieved or that the indicated level of recovery will be realized. There are numerous uncertainties inherent in estimating mineral resources and mineral reserves, including many factors beyond the Company's control. Such estimation is a subjective process and the accuracy of any resource estimate is a function of the quantity and quality of available data and of the assumptions made

and judgments used in engineering and geological interpretation. Short-term operating factors, such as the need for orderly development of the ore bodies or the processing of new or different ore grades, may cause the mining operation to be unprofitable in any particular accounting period. In addition, there can be no assurance that tin recoveries in small scale laboratory tests will be duplicated in larger scale tests under on-site conditions or during production. Fluctuations in tin prices, results of drilling, change in cut-off grades, metallurgical testing, production and the evaluation of mine plans subsequent to the date of any estimates may require revision of such estimates. The volume and grade of mineral reserves mined and processed, and the recovery rates achieved may not be the same as currently anticipated. Any material reduction in the estimated mineral resources and mineral reserves could have a material adverse impact on the Company's business, financial condition and results of operations. A significant decrease in the mineral resource and/or mineral reserve estimates could have a material adverse impact on the carrying value of exploration and evaluation assets, mine properties, property, plant and equipment, depletion and depreciation charges, and rehabilitation provisions, and could result in an impairment of the carrying value.

Need for Mineral Reserves

As mines have limited lives based on proven and probable mineral reserves, the Company must continually develop, replace and expand its mineral reserves as its mine produces tin. The Company's ability to maintain or increase its annual production of tin and its aggregate mineral reserves will be significantly dependent on its ability to expand mineral reserves both at existing mines and new mines it intends to bring into production in the future.

Environmental Matters

All phases of the Company's operations are subject to environmental regulations in the DRC and other jurisdictions in which it may operate. Environmental legislation is evolving in a manner which will require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and a heightened degree of responsibility for companies and their officers, directors and employees. There is no assurance that future changes in environmental regulation, if any, will not adversely affect the Company's operations. Environmental hazards may exist on the properties in which the Company holds interests which are presently unknown to the Company and which have been caused by previous or existing owners or operators of the properties or by illegal mining activities.

Climate Change Legislation Risks

Many governments are moving to enact climate change legislation and treaties at the international, national, state, provincial and local levels. Where legislation already exists, regulations relating to emission levels and energy efficiency are becoming more stringent. Some of the cost associated with meeting more stringent regulations can be offset by increased energy efficiency and technological innovation. However, if the current regulatory trend continues, meeting more stringent regulations is anticipated to result in increased costs, which could have a material adverse impact on the Company's business, results of operations and financial condition.

Insurance and Uninsured Risks

The business of the Company is subject to a number of risks and hazards generally, including adverse environmental conditions, industrial accidents, labour disputes, unusual or unexpected geological conditions, ground or slope failures underground or on surface, cave-ins, changes in the regulatory environment and natural phenomena such as inclement weather conditions, floods and earthquakes. Such occurrences could result in damage to mineral properties or production facilities, personal injury or death, environmental damage to properties of the Company or others, delays in mining, monetary losses and possible legal liability. Although the Company may maintain insurance to protect against certain risks in such amounts as it considers to be reasonable, its insurance will not cover all the potential risks and related loss of profit associated with a mining company's operations. The Company may also be unable to maintain insurance to cover these risks at economically feasible premiums. Insurance coverage may not be available or may not be adequate to cover any resulting liability. Moreover, insurance against risks such as

environmental pollution or other hazards as a result of exploration and production is not generally available to the Company or to other companies in the mining industry on acceptable terms. The Company might also become subject to liability for pollution or other hazards which it may not be insured against or which the Company may elect not to insure against because of premium costs or other reasons. Losses from these events may cause the Company to incur significant costs that could have a material adverse effect upon its financial performance, results of operations and liquidity position.

Land Title

Although the nature and extent of the interests of the Company in the properties in which it holds an interest has been reviewed by or on behalf of the Company and title opinions have been obtained by the Company with regard to certain of such properties, there may still be undetected title defects affecting such properties. Title insurance generally is not available, and the ability of the Company to ensure that it has obtained secure claim to individual mineral properties or mining concessions may be severely constrained. Furthermore, in certain cases, the Company has not conducted surveys of the claims in which it holds direct or indirect interests and, therefore, the precise area and location of such claims may be in doubt. Accordingly, the properties in which the Company holds an interest may be subject to prior unregistered liens, agreements, transfers or claims, and title may be affected by, among other things, undetected defects which could have a material adverse impact on the Company's operations. In addition, the Company may be unable to operate its properties as permitted or to enforce its rights with respect to its properties.

Costs of Land Reclamation

It is difficult to determine the exact amounts which will be required to complete all land reclamation activities in connection with the properties in which the Company holds an interest. Reclamation bonds and other forms of financial assurance represent only a portion of the total amount of money that will be spent on reclamation activities over the life of a mine. Accordingly, it may be necessary to revise planned expenditures and operating plans in order to fund reclamation activities. Such costs may have a material adverse impact upon the financial condition and results of operations of the Company.

Infrastructure and supplies

Mining, processing, development and exploration activities depend, to one degree or another, on adequate infrastructure. Reliable roads, bridges, power sources and water supply are important determinants, which affect capital and operating costs. Unusual or infrequent weather phenomena, sabotage, government or other interference in the maintenance or provision or continued availability of such infrastructure could adversely affect the operations, financial condition and results of operations of the Company. Alphamin's mineral interests are located in a remote area of the DRC, which lacks basic infrastructure, including sources of power, water, housing, food and transport. In order to develop and operate any of its mineral interests, Alphamin will need to maintain the facilities and materials necessary to support operations in the remote location in which it is situated. The remoteness of the mineral interests affects the viability of mining operations, as Alphamin will need to maintain and upgrade sources of power, water, physical plant and transport infrastructure that have been developed as part of the construction of the Bisie tin mine. The lack of availability of such sources may adversely affect mining feasibility and will, in any event, require Alphamin to apply significant funds, locate adequate supplies and obtain necessary approvals from national, provincial and regional governments, none of which can be assured.

Power Supply

The Company's operations depend upon the reliable and continuous delivery of sufficient quantities of power to its mine and processing facilities. As a result of the Bisie tin mine's remote location, diesel generators are relied upon for the generation of power for the project. Although measures to keep power outages and shortages to a minimum have been implemented, there may nonetheless be power outages or shortages as a result of insufficient capacity, breakdown

of equipment, unavailability of parts or diesel fuel and other causes, which if they occur, may have a material adverse effect on the Company's business, operating results and financial position.

Effect of Inflation on Results of Operations

The Bisie tin mine, which represents the Company's main asset, is located in the DRC which has historically experienced relatively high rates of inflation and increases in such rate of inflation may have a material adverse impact upon the financial condition and results of operations of the Company.

Reliance on a Single Property

The only material property interest of the Company is the Bisie tin project. Unless the Company acquires additional property interests, any adverse developments affecting the Bisie tin project could have a material adverse effect upon the Company and would materially and adversely affect the potential mineral resource production, profitability, financial performance and results of operations of the Company. The Company also anticipates using revenue generated by its operations at the Bisie tin mine in the future to finance other growth and value add initiatives, exploration and development on its properties. Further, there can be no assurance that the Company's exploration and development programs at its properties will result in any new economically viable mining operations or yield new mineral resources to replace and expand current mineral resources.

Dividends

The Company paid an initial dividend in February 2022, paid dividends again in August 2022 and recently declared a dividend payable in March 2023. Payment of any future dividends will be at the discretion of the Board after taking into account many factors, including the Company's operating results, financial condition, and current and anticipated cash needs. There can be no assurance that dividends will be paid in the future.

Information Technology

The Company is growing more reliant on the continuous and uninterrupted operations of its information technology ("IT") systems. User access and security of all IT systems are important elements to the operations of the Company. Protection against cyber security incidents and cloud security, and security of all of the Company's IT systems, are critical to the operations of the Company. Any IT failure pertaining to availability, access or system security could result in disruption for personnel and could adversely affect the reputation, operations or financial performance of the Company. The Company stores a significant amount of its proprietary data on servers including, but not limited to, financial records, drilling databases, technical information, legal information, licences and human resource records. The Company utilizes standard protocols and procedures in protecting and backing up electronic records; however, there is no assurance that third parties will not illegally access these records which could have a material adverse effect on the Company.

Foreign Subsidiaries

The Company conducts its operations through foreign subsidiaries and substantially all of its assets are held in such entities. Accordingly, any limitation on the transfer of cash or other assets between or among the Company and such entities, could restrict or impact the Company's ability to fund or receive cash from its operations. Any such limitations, or the perception that such limitations may exist now or in the future, could have a material adverse impact on the Company's business, financial condition and results of operations. In addition, the Company is incorporated under the laws of Mauritius and the corporate law and other laws governing the Company and its foreign subsidiaries differ materially from Canadian corporate and other laws. Challenges to the Company's ownership or title to the shares of such subsidiaries or the subsidiaries' title or ownership of their assets may occur based on alleged formalistic defects or other grounds that are based on form rather than in substance. Any such challenges may cost time and resources for the Company or cause other adverse effects.

Risks with Respect to Inadequate Controls over Financial Reporting

Any failure of the Company to implement adequate controls over financial reporting, or difficulties encountered in their implementation, could have a material adverse impact on the Company's business, financial condition, results of operations and share price. No evaluation can provide absolute assurance that the Company's internal control over financial reporting will detect or uncover all material information required to be reported. Furthermore, there can be no certainty that the Company's internal control over financial reporting will prevent or detect all errors and fraud. In addition, with ever increasing regulations and changes in the Company's business it is expected that the Company's internal control over financial reporting will continue to evolve and improve over time.

Health and Safety Risk

Mining, like many other extractive natural resource industries, is subject to potential risks and liabilities due to accidents that could result in serious injury or death. The impact of such accidents could affect the profitability of the operations, cause an interruption to operations, lead to a loss of licenses, affect the reputation of the Company and its ability to obtain further licenses, damage community relations and reduce the perceived appeal of the Company as an employer. The Company has procedures in place to manage health and safety protocols in order to reduce the risk of occurrence and the severity of any accident and is continually investing time and resources to enhance health and safety at all operations.

DRC Specific Health Care Challenges

The Company faces certain risks in dealing with HIV/AIDS, malaria, tuberculosis and from time to time other infectious diseases such as Ebola. HIV/AIDS, malaria, tuberculosis, Ebola and associated diseases remain the major health care challenge faced by the DRC mining industry. Employee-related costs in the DRC are affected by HIV/AIDS, malaria and tuberculosis in the form of increased absenteeism, lower morale, reduced productivity, increased recruitment and replacement costs, higher insurance premiums and increased benefit payments and other costs of providing treatment and this could have a material adverse impact on the Bisie tin project and on the Company's business, financial condition, results of operations or prospects.

Significant Shareholder

Tremont owns approximately 57.2% of the common shares of the Company. As a result, Tremont has the ability to influence the outcome of corporate actions requiring shareholder approval, including the election of directors of the Company and the approval of certain corporate transactions.

Public Company Obligations

The Company's business is subject to evolving corporate governance and public disclosure regulations that have increased both the Company's compliance costs and the risk of non-compliance, which could have a material adverse impact on the Company's share price. The Company is subject to changing rules and regulations promulgated by a number of governmental and self-regulated organizations, including the Canadian Securities Administrators, the TSX Venture Exchange, JSE and the International Accounting Standards Board. These rules and regulations continue to evolve in scope and complexity creating many new requirements. The Company's efforts to comply with rules and obligations could result in increased general and administration expenses and a diversion of management time and attention from revenue-generating activities.

Conflicts of interest

The Company's proposed business raises potential conflicts of interests between certain of its officers and directors and the Company. Certain directors of the Company are directors of other mineral resource companies and advisors and, to the extent that such other companies may

participate or advise in ventures in which the Company may participate, these directors may have a conflict of interest in negotiating and concluding terms regarding the extent of such participation. In the event that such a conflict of interest arises at a meeting of the Company's directors, a director who has such a conflict will abstain from voting for or against the approval of such participation or such terms. In appropriate cases, the Company will establish a special committee of independent directors to review a matter in which several directors, or management, may have a conflict. From time to time, several companies may participate in the acquisition, exploration and development of natural resource properties thereby allowing for their participation in larger programs, involvement in a greater number of programs and reduction of the financial exposure with respect to any one program. It may also occur that a particular company will assign all or a portion of its interest in a particular program to another of these companies due to the financial position of the company making the assignment. In determining whether the Company will participate in a particular program and the interest therein to be acquired by it, the directors will primarily consider the potential benefits to the Company, the degree of risk to which the Company may be exposed and its financial position at that time. Other than as indicated, the Company has no other procedures or mechanisms to deal with conflicts of interest. The Company is not aware of the existence of any conflict of interest as described herein.

Market Price of Common Shares

The common shares are listed on the TSX Venture Exchange and JSE AltX. The price of these and other shares making up the mining sector have historically experienced substantial volatility, often based on factors unrelated to the financial performance or prospects of the companies involved. These factors include macroeconomic developments in North America and globally, including those impacting the price of commodities, interest rates, market perceptions concerning equity securities generally and the precious and base metal sectors in particular, and factors that may be specific to the Company, including daily traded volumes of the common shares. As a result of any of these factors, the market price of the common shares at any given point in time may not accurately reflect the Company's long-term value, which in turn could impact the ability of the Company to raise equity or raise equity on terms considered to be acceptable. Securities class action litigation often has been brought against companies following periods of volatility in the market price of their securities. The Company may in the future be the target of similar litigation. Securities litigation could result in substantial costs and damages and divert management's attention and resources and have a material adverse impact on the Company's business, financial condition and results of operations.

Dilution to Common Shares

From time to time the Company may issue warrants or other convertible securities to investors or grant stock options to service providers under its share-based compensation plans. The holders of these securities are given an opportunity to profit from an increase in the market price of the Company's common shares with a resulting dilution in the interest of shareholders. The holders of warrants, stock options or other convertible securities may exercise such securities at a time when the Company may have been able to obtain any needed capital by a new offering of securities on terms more favourable than those provided by the outstanding rights. The increase in the number of common shares in the market, if all or part of these outstanding rights were exercised, and the possibility of sales of these additional shares may have a negative effect on the price of the Company's common shares. The Company may need to raise additional financing in the future through the issuance of additional equity securities. If the Company raises additional funding by issuing additional equity securities, such financings may substantially dilute the interests of shareholders of the Company and reduce the value of their investment in the Company's securities.

The above list of risk factors ought not to be taken as exhaustive of the risks faced by Alphamin or by investors in Alphamin. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of Alphamin and the value of the common shares.

RELATED PARTY TRANSACTIONS

KEY MANAGEMENT PERSONNEL

Key management personnel include those persons having authority and responsibility for planning, directing and controlling the activities of the Company as a whole. The Company has determined that key management personnel consist of executive and non-executive members of the Company's Board of Directors and corporate officers. Remuneration attributed to key management personnel can be summarised as follows:

		December 31 2022	December 31 2021
Item	Relationship		
Director and Officer fees	Directors, officers	1,415,153	1,667,925
Secretarial and administrative fees	Corporate Secretary	36,000	36,000
Management fees	Directors	138,900	138,900
Share based payments	Directors, officers	2,156,503	273,923

Debt due to related parties of \$2,502,240 (December 31, 2021 – \$3,558,637) are due to Tremont Master Holdings, the Company's major shareholder. See Note 13 of the audited consolidated financial statements for further details.

Accounts payable due to related parties was \$1,357,020 in 2022 (2021: Nil). The amount relates to accruals for possible future dividend payments relating to SARES (SAR Equivalent Shares) for executives of the Company.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

In accordance with National Instrument 52-109, Certification of Disclosure in Issuers' Annual and Interim Filings ("NI 52-109"), the Chief Executive Officer and Chief Financial Officer of the Company will file a Venture Issuer Basic Certificate with respect to the financial information contained in the consolidated financial statements and the audited annual financial statements and respective accompanying Management's Discussion and Analysis.

In contrast to the full certificate under NI 52-109, the Venture Issuer Basic Certification does not include representations relating to the establishment and maintenance of disclosure controls and procedures and internal control over financial reporting, as defined in NI 52-109.

USE OF NON-IFRS FINANCIAL PERFORMANCE MEASURES

This MD&A refers to the following non-IFRS financial performance measures: Earnings before interest, taxes, depreciation and amortization ("EBITDA"), and All-In Sustaining Cost ("AISC").

These measures are not recognized under IFRS as they do not have any standardized meaning prescribed by IFRS and are therefore unlikely to be comparable to similar measures presented by other issuers. We use these measures internally to evaluate the underlying operating performance of the Company for the reporting periods presented. The use of these measures enables us to assess performance trends and to evaluate the results of the underlying business of the Company. We understand that certain investors, and others who follow the Company's performance, also assess performance in this way.

We believe that these measures reflect our performance and are useful indicators of our expected performance in future periods. This data is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS.

EBITDA

EBITDA provides insight into our overall business performance (a combination of cost management and growth) and is the corresponding flow drivers towards the objective of achieving industry-leading returns. This measure assists readers in understanding the ongoing cash generating potential of the business including liquidity to fund working capital, servicing debt, and funding capital expenditures and investment opportunities. EBITDA is profit before net finance expense, income taxes and depreciation, depletion, and amortization. (See "Results of Operations" above for a reconciliation of operating profit to EBITDA).

NET CASH/(DEBT)

Net debt demonstrates how our debt is being managed and is defined as total current and non-current portions of debt and lease liabilities less cash and cash equivalents.

	December 31, 2022 USD	December 31, 2021 USD
Current portion of lease liabilities	(2,394,497)	(2,167,399)
Current portion of debt	(4,657,882)	(18,210,125)
Non-current portion of lease liabilities	(3,000,602)	(2,029,164)
Total debt	(10,052,981)	(22,406,688)
Less: cash and cash equivalents	119,388,687	90,640,001
Net cash/(debt)	109,335,706	68,233,313

CASH COSTS

This measures the cash costs to produce a tonne of contained tin. This measure includes mine operating production expenses such as mining, processing, administration, indirect charges (including surface maintenance and camp and tailings dam construction costs), corporate costs, smelting costs and deductions, refining and freight, distribution, royalties and product marketing fees. Cash Costs do not include depreciation, depletion, and amortization, reclamation expenses, capital sustaining, borrowing costs and exploration expenses.

EBITDA MARGIN

EBITDA margin is EBITDA divided by gross revenue.

AISC

AISC is the cash cost to produce a tonne of contained tin plus the capital sustaining costs to maintain the mine, processing plant and infrastructure. This measure includes the Cash Cost per tonne and capital sustaining costs less concentrate stock movement divided by tonnes of contained tin sold. All-In Sustaining Cost per tonne does not include depreciation, depletion, and amortization, reclamation, borrowing costs and exploration expenses.

Sustaining capital expenditures are defined as those expenditures which do not increase payable mineral production at a mine site and excludes all expenditures at the Company's projects and certain expenditures at the Company's operating sites which are deemed expansionary in nature. The following table reconciles sustaining capital expenditures to the Company's total capital expenditures:

		Q4 2022	Q4 2021	Variance	FY 2022	FY 2021	Variance
Additions to plant and equipment	\$'000	25,414	4,175	509%	43,077	15,427	179%
Expansion capital expenditures	\$'000	21,973	1,077	1940%	30,248	6,856	341%
Sustaining capital expenditures	\$'000	3,441	3,098	11%	12,829	8,572	50%

Expansion capex related to the Mpama South development project as well as camp construction and fuel storage increases in anticipation of expanded output.

FORWARD LOOKING STATEMENTS

This MD&A contains certain forward-looking statements and information relating to the Company that are based on the beliefs of its management as well as assumptions made by and information currently available to the Company. When used in this document, the words "anticipate", "believe", "estimate", "expect" and similar expressions, as they relate to the Company or its management, are intended to identify forward-looking statements. This MD&A may contain forward-looking statements relating to, among other things, guidance for tin production and sales for fiscal 2023; expected future tin prices; estimates for production and capital costs for the Mpama South development project and the expected timing for completion of various elements of the project; anticipated allocation of capital in 2023; estimated DRC tax liability for 2023; total cash costs and all-in sustaining costs, and the factors contributing to those expected results, as well as expected capital expenditures; the Company's liquidity outlook; grades expected to be mined at the Company's operations; planned activities for the Company's operations and projects, as well as planned exploration activities and expected outcomes; and the sufficiency of current working capital. Such statements reflect the current views of the Company with respect to future events and are subject to certain risks, uncertainties and assumptions. Many factors could cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. Such factors include, without limitation: price volatility in the spot and forward markets for tin and other commodities; the economic and other effects of the COVID-19 pandemic; significant capital requirements and the availability and management of capital resources; additional funding requirements; fluctuations in the international currency markets and in the rates of exchange of the currencies of the Democratic Republic of Congo (DRC) and the United States of America (US); discrepancies between actual and estimated production and the costs thereof; between actual and estimated reserves and resources and between actual and estimated metallurgical recoveries; changes in national and local government legislation in the DRC or any other country in which Alphamin currently or may in the future conduct business; taxation; controls, regulations and political or economic developments in the countries in which Alphamin does or may conduct business; the speculative nature of mineral exploration and development, including the risks of obtaining and maintaining the validity and enforceability of the necessary licenses and permits and complying with the permitting requirements of each jurisdiction in which Alphamin operates, including, but not limited to: obtaining the necessary permits for the Bisie Project; the lack of certainty with respect to foreign legal systems, which may not be immune from the influence of political pressure, corruption or other factors that are inconsistent with the rule of law; the uncertainties inherent to current and future legal challenges Alphamin is or may become a party to; diminishing quantities or grades of reserves and resources; competition; loss of key employees; inclement weather conditions; availability of power, water, transportation routes and other required infrastructure for the Bisie tin project; general economic conditions and inflation and rising costs of labour, supplies, fuel and equipment; actual results of current exploration or reclamation activities; uncertainties inherent to mining economic studies; changes in project parameters as plans continue to be refined; accidents; labour disputes; defective title to mineral claims or property or contests over claims to mineral properties; risks, uncertainties and unanticipated delays associated with obtaining and maintaining necessary licenses, permits and authorisations and complying with permitting requirements, including those associated with the environment. In addition, there are risks and hazards associated with the business of mineral exploration, development and mining, including environmental events and hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins, flooding and losses of processed tin (and the risk of inadequate insurance or inability to obtain insurance to cover these risks), as well as "Risk Factors" included elsewhere in this MD&A and Alphamin's public disclosure documents filed on and available at www.sedar.com.

QUALIFIED PERSON

Mr. Clive Brown, Pr. Eng., B.Sc. Engineering (Mining), is a qualified person (QP) as defined in National Instrument 43-101 and has reviewed and approved the scientific and technical information contained in this news release. He is a Principal Consultant and Director of Bara Consulting Pty Limited, an independent technical consultant to the Company.

Mr Jeremy Witley, Pr. Sci. Nat., B.Sc. (Hons.) Mining Geology, M.Sc. (Eng.), is a qualified person (QP) as defined in National Instrument 43-101 and has reviewed and approved the scientific and technical information pertaining to Mineral Resources and Exploration contained in this news release. He is a Principal Mineral Resource Consultant of The MSA Group (Pty.) Ltd., an independent technical consultant to the Company.

APPROVAL

The Board of Directors of Alphamin Resources Corp. has approved the disclosure contained in this MD&A. A copy of this MD&A will be provided to shareholders upon request.
