5 Liquidity

LIQ1: Liquidity Coverage Ratio (LCR)

LIQ2: Net Stable Funding Ratio (NSFR)

1. Introduction

The risk and capital management report (Pillar 3 disclosure) provides information regarding the activities of Sasfin Holdings Limited and Sasfin Bank Limited in accordance with:

- The Basel Committee on Banking Supervision's (BCBS) revised Pillar 3 disclosure requirements (Pillar 3 standard), BCBS 309 published in January 2015, and the consolidated and enhanced framework, BCBS 400 published in March 2017; and
- Regulation 43 of the Regulations relating to Banks (Regulations), issued in terms of the Banks Act 94 of 1990, Directive D1/2019 on Matters related to Pillar 3 disclosure requirement framework and all other Pillar 3 disclosure-related directives issued by the Prudential Authority (PA).

The information in this report applies mainly to banking operations, relates to risks directly impacting capital, liquidity and other regulatory ratios and is unaudited. Monetary values are expressed in Rand thousands.

For the reporting period 30 September 2023 (compared to September 2022 – restated), the Board and senior management are satisfied that Sasfin Holdings Limited (Group) and Sasfin Bank Limited's risk and capital management processes are operating effectively, that business activities have been managed within the Enterprise Risk Management Framework and that the Group is adequately capitalised and funded to support the execution of its strategy.

This report has been internally verified through the Group's governance processes, in line with the Group's Public Disclosure Policy, which describes the responsibilities of senior management and the Board in the preparation and review of the Pillar 3 disclosure and aims to ensure that:

- Appropriate internal control processes and procedures relating to qualitative and quantitative information are followed;
- The changing nature of user needs as well as the regulatory environment in terms of qualitative and quantitative information are monitored and understood;
- The relevance, frequency and materiality of public information is constantly assessed; and
- Material risks are identified.

In this regard the board and senior management have ensured that the appropriate procedures were followed in the preparation, review and sign-off of all disclosures. The board is satisfied that the Pillar 3 disclosures have been prepared in line with the Public Disclosure Policy, that appropriate internal control processes and reviews have been applied, and that the Pillar 3 disclosure complies with the relevant disclosure requirements.

The information in this report is unaudited.

2. Risk Management and Risk Weighted Assets (RWA)

The approach to risk management is guided by the Enterprise Risk Management (ERM) Framework and is effected by the Board of Directors, management and other personnel. The ERM Framework is applied in strategy setting and across the enterprise, and is designed to identify potential events that may affect the entity, to manage risk to be within its risk appetite and to provide reasonable assurance regarding the achievement of entity objectives.

3. Capital Risk

The Board is responsible for capital management, and has delegated certain aspects of its role to the GRCMC, including setting of appropriate capital targets and ensuring adequate capitalisation. The capital management function is governed primarily by the GRCMC that oversees the risks associated with capital management, as well as the Asset and Liability Committee (ALCO) and its subcommittee, the Daily Liquidity Committee.

Management and Measurement: The internal capital management approach is embedded in a formal ICAAP consisting of the Group's risk appetite, capital, and risk management framework (including capital planning and stress testing).

The GRCMC and Board reviews the Group's risk profile to ensure that the level of available capital:

- Exceeds the Group's minimum regulatory capital requirements by a predetermined margin;
- Remains sufficient to support the Group's risk profile;
- Remains consistent with the Group's strategic goals; and
- Is sufficient to absorb potential losses under severe stress scenarios.

Stress tests are performed on the Group's capital position to determine the impact on the capital position should a severe economic downturn or other detrimental factor materialise. Stress tests consider changes in the macroeconomic environment, key risks, and vulnerabilities within the Group's business model.

Capital management also includes strategic allocation of capital and capital optimisation.

¹ Restated. Please refer to note 49 of the Annual Financial Statements as at 30 June 2023 for additional for additional information.

3. Capital Risk *continued*

The capital adequacy ratios remain above the minimum regulatory requirements and within the Board approved limits. The increase in available capital amounts is mainly due to a decrease in specified deductions from tier 1 capital amounts.

Total risk weighted assets decreased marginally from R9.125 billion (Jun-23) to R9.119 billion (Sept-23) mainly attributable to a decrease in counterparty credit risk exposures.

The liquidity coverage ratio remains strong, above the regulatory requirements and within the Board Risk Appetite. The QoQ increase is mainly attributable to an increase in high quality liquid assets, coupled with a decrease in net cash outflows.

The net stable funding ratio remains above the regulatory minimum requirement of 100%. The QoQ decrease is due to a decrease in available stable funding, partially offset by a marginal decrease in required stable funding.
