Lithium Pilot Plant Produces First Lithium Concentrate

Petalite Off-Take Agreement Discussions Advanced

Andrada Mining Limited (AIM: ATM), an African technology metals mining company with a portfolio of mining and exploration assets in Namibia, is pleased to provide an update on the commissioning and first production at its lithium (bulk-sampling) pilot plant ("Pilot Plant") along with an update on the Company's lithium strategy.

Highlights

- Commissioning of the Pilot Plant completed successfully with the production of 10 tonnes on-specification saleable lithium concentrate.
- Production ramp up to 250 tonnes per month planned during first quarter of the 2024 calendar year ("Q1 CY2024" and "CY2024").
- Discussion with glass-ceramics off-taker for supply of high-purity petalite is progressing well.
- On-going metallurgical testwork for production of battery grade lithium hydroxide.
- Metallurgical testwork progressing to optimise production from Uis and preliminary investigations on Spodumene Hill and Lithium Ridge.
- Lithium exploration drilling campaigns for CY2024 have been planned for all mining licence areas.
- Discussions with Strategic Process participants are progressing. Further updates to be provided in due course.
