- Health and safety remains the highest priority, with the goal being to achieve zero harm. The Company recorded one fatality (FY2024 H1: nil) and two lost-time injuries (**LTIs**) were recorded during the Period (FY2024 H1: Nil LTIs).

Uitkomst Colliery

- The operational results for the Uitkomst metallurgical and thermal coal colliery (**Uitkomst** or **Uitkomst Colliery**) compared to the preceding period are detailed below:

	FY2025 H1	FY2024 H1	%△
Production tonnages			
Uitkomst ROM (t)	185,558	268,464	(31%)
Inventory volumes			
High quality duff and peas at site (t)	4,911	14,422	(66%)
Sales tonnages			
Own ROM (t)	108,776	202,340	(46%)
Middlings sales	13,017	375	>100%
	121,793	202,715	40%
Financial metrics			
Net revenue/t (\$)	69	80	(14%)
Production costs/saleable tonnes (\$)^	93	55	68%

^all costs are incurred in South African Rand

- The Uitkomst Colliery produced 185,558 tonnes (t) (FY2024 H1: 268,464t) of run of mine (**ROM**) coal during the six months to 31 December 2024, 31% lower than the previous period;
- 4,678t (FY2024 H1: 14,422t) of high-quality coal was stockpiled at Uitkomst at the end of December 2024;
- Uitkomst sold 121,793t of coal in FY2025 H1 (FY2024 H1: 202,715t) comprising 108,780t (FY2024 H1: 202,340t) of premium duff and sized peas and 13,017t (FY2024 H1: 375t) of high ash, coarse discard coal. Uitkomst generated sales revenue of \$8.4 million (FY2023: \$16.3 million) for the period;

- The Uitkomst net revenue per tonne decreased to \$69/t (FY2024 H1: \$80/t) primarily due to lower production as a result of geological challenges; and
- The lower coal production volumes contributed to the 68% increase in production costs per saleable tonne (FY2025 H1: US\$93/t vs. FY2024 H1: US\$55/t)

Makhado Project

- MC Mining's flagship Makhado steelmaking hard coking coal (**HCC**) project has the required regulatory approvals and surface rights over the mining and processing areas and is 'shovel ready';
- The development of Makhado is expected to deliver positive returns for shareholders and position MC Mining as South Africa's pre-eminent steelmaking HCC producer resulting in obvious advantages for domestic steel producers;
- Select early works continued on site at the Makhado Project, with the erecting of power supply lines ongoing, commencement of construction of a temporary bridge across the Mutamba River to provide access for construction works and the commencement of bulk earthworks related to the coal handling and preparation plant (CHPP) terrace. Environmental and Process Technologies Proprietary Limited (Enprotec), continued with the detailed designing of the CHPP, along with early order placements for long-lead items related to the CHPP.

Vele Aluwani Colliery

- The colliery did not produce saleable thermal coal during the reporting period (FY2024 H1: 119,799t); and
- Operations at Vele remain suspended.

Greater Soutpansberg Projects

- The three GSP is the Group's long-term greenfield development area and contains over 7.0 billion gross tonnes in situ of inferred HCC, SSCC and thermal coal resources. The exploration and development of the GSP is the catalyst for MC Mining's long-term growth and positions the Company to be a potential long-term significant domestic and export steelmaking coal supplier;
- The mining rights for the Mopane, Generaal and Chapudi project areas were legally executed during FY2024. Following this, the studies required for the environmental and water use licences are expected to commence following the construction of the Makhado Project; and
- Exploration and development of the GSP could position the Company to being a significant steelmaking coal supplier for both the domestic and export markets.

- On 13 December 2024, the Competition Commission issued a Merger Clearance Certificate for the proposed transaction with Kinetic Development Group Limited (KDG) with conditions;
