ANNOUNCEMENT

30 April 2026

ACTIVITIES REPORT FOR THE QUARTER ENDED 31 MARCH 2026 (FY2026 Q3)
FOR MC MINING LIMITED (MC Mining or the Company)
AND ITS SUBSIDIARY COMPANIES

HIGHLIGHTS

Operations

- Health and safety performance improvement across the group remains a top priority, with the Company having operated with one lost time injury (“LTI”) for the quarter. The Makhado steelmaking hard coking coal Project (“**Makhado Project**” or “**Makhado**”) had one LTI for the quarter, whilst Uitkomst Colliery (“**Uitkomst Colliery**” or “**Uitkomst**”) had no LTIs for the quarter;
- Key milestones achieved on the development of the Makhado Project:
 - commissioning activities and start-up of the coal handling and preparation plant (“**CHPP**” or “**Coal Plant**”) are scheduled for May 2026;
 - the mining of overburden material from the open cast pit is on track with run-of-mine (ROM) delivery to the CHPP having started and coal faces exposed and ready to continue

Interim Chairman Mathews Senosi **Managing Director and Chief Executive Officer** Y (Christine) He
Non-executive Directors Jianheng (Albert) Deng, Dr S West, B Pavlovski, M Huang, L Wang, Dr H Wang

during commissioning and operation. ROM stockpiles are being built in preparation for the CHPP commissioning;

- construction of the Coal Plant is scheduled for completion in May 2026; and
- commissioning of the 14km overhead power transmission line is scheduled for April 2026;
- The board of directors approved the temporary suspension of mining and processing operations at Uitkomst Colliery, with an effective date of 1 March 2026. During this period, the Company is evaluating strategic options aimed at unlocking value and preserving future optionality. These evaluations may include engagement with interested third parties regarding potential partnerships, joint operations or other strategic arrangements in respect of Uitkomst. No decisions have been taken, and any transaction would be subject to customary approvals. In addition, the Company continues to review its asset base with a view to disposing of redundant or non-core items where appropriate
- Comprehensive evaluations of geological and mine planning information relating to the Company's Vele Aluwani semi-soft coking coal ("**SSCC**") and thermal coal ("**TC**") Colliery ("**Vele Colliery**" or "**Vele**") are still ongoing; and
- TC prices continued with average prices of US\$99/t for the three months, compared to US\$86/t in Q2 FY2026 and US\$96/t in Q3 of FY2025. Premium steelmaking HCC prices have increased, averaging US\$231/t in the quarter compared to US\$186/t in FY2025 Q3.

Corporate

- Available cash and facilities was US\$5.4 million at the period end (FY2026 Q2: US\$2.9 million);
- Kinetic Development Group Limited (**KDG**) made payments amounting to US\$19 million for the purchase of MC Mining shares, as part of the share subscription agreement, during the quarter. US\$3 million payment relates to the sixth Second Closing, US\$10 million payment relates to the seventh Second Closing and US\$6 million payment relates to the eighth Second Closing as per the Share Subscription Agreement;

- The Company made a further repayment of ZAR20 million towards the Industrial Development Corporation (IDC) loan during the quarter;

Events subsequent to the end of the quarter

KDG made payments amounting to US\$6 million for the purchase of MC Mining shares, as part of the share subscription agreement, during April 2026. The US\$6 million payment relates to the final Second Closing as per the Share Subscription Agreement. KDG has a 51% shareholding of MC Mining after the US\$6 million that was paid in April 2026.

DETAILED QUARTERLY OPERATIONS REPORTS

Makhado HCC Project – Soutpansberg Coalfield, Limpopo Province, South Africa (67% owned)

Project Overview. Construction of the Makhado steelmaking hard coking coal Project (“**Makhado Project**” or “**Makhado**”) progressed well, with hot commissioning activities and start-up of the Coal Plant scheduled during May 2026. Project delays were largely attributed to inclement weather and delays in commissioning of the Eskom power supply line. During the quarter, more project development milestones were successfully achieved, whilst maintaining regulatory compliance performance that have become a recognizable feature of the venture to date. The colliery will be South Africa’s largest hard coking coal (**HCC**) producer, designed to produce 800,000 tonnes a year of HCC 64 Mid Vol, once steady-state operation for the foundation phase is reached. The life-of-mine (**LOM**) for the Makhado Colliery is planned to be 28 years. Contiguous to the Makhado Project are the satellite Greater Soutpansberg Projects (**GSP**), that are all at granted Mining Right status, also endowed with steelmaking HCC potential, and scheduled to be the focus of mine planning, once the Makhado Project is commissioned.

Health, Safety, Regulatory Compliance and Environmental Performance. The Makhado Project had one LTI for the quarter. Employee health initiatives focused on raising awareness on mental health,

men's health and chronic conditions management. The workforce onsite peaked at 977 people during the quarter with the host community well-represented in the labour complement and support services.

The mine continued to be built with zero reportable environmental incidents and keen emphasis being placed on environmental protection and management. The Department of Mineral and Petroleum Resources (**DMPR**) undertook a comprehensive and multi-discipline onsite health and safety, environmental, social and labour planning and regulatory compliance audit of the Makhado Project. The Company continues to promote collaborative and constructive relationships with regulatory authorities and host community stakeholders.

Project Development Milestones Achieved. Following the heavy rainfall at the start of the quarter, the Makhado Project has rebounded, with flooding subsiding and construction activities regaining momentum. Flood damage to the temporary bridge was severe and, as such, it has been taken out of use and the main access bridge opened to traffic. Work is continuing well on the Coal Handling and Processing Plant ("CHPP") and the team has begun with cold commissioning of completed areas. Noteworthy features of the project include:

- *Open pit Mining:* – The mining of overburden material from the open cast pit is in progress and on track for run of mine delivery to the CHPP startup. JCI Mining (Pty) Ltd ("JCI"), the principal mining contractor, now has 249 people on site, with a mining fleet consisting of 8 backhoe configured excavators, supported by a team of 33 articulated dump trucks. Mining of overburden material is progressing steadily, with over 1.3 million bench cubic metres (BCM) already mined.
- *Construction of the Coal Plant:* – The CHPP construction works are progressing well with planned completion being Q2 2026. The construction works were largely completed and cold commissioning of the plant is under way. Hot commissioning and plant start-up is scheduled for May 2026. The CHPP will process ROM coal to produce a primary product of HCC 64 Mid Vol and a secondary product of 5,500kcal thermal coal ("TC"). Work is continuing on the

planning of the expansion strategy once the foundation phase is commissioned. Environmental and Process Technologies (**Enprotec**), the lead contractors for building the Coal Plant, peaked at a staff compliment of 450 persons on site, across 16 different sub-contractors, with 140 of these employees having been recruited from the host communities.

- *Construction of permanent access bridge:* - The mine access road bridge across the Mutamba River is commissioned and in service, with works now focused on upgrading the approach roads providing site access.
- *Construction power reticulation:* –The main power supply line construction has progressed well and commissioning of the Eskom point of supply scheduled in April 2026. The installation of the MV Substation and transformers completed marks a significant milestone in the development of the power supply infrastructure. This power line, the Paradise Overhead Line (**OHL**), is a new a 14km long, 22kV bulk power transmission line, to deliver 7.5MVA of power to the site from the national grid, via the nearby Paradise Power Station. This workstream is managed by the EHL Engineering Group (**EHL**) on an EPC-turnkey basis.

Outlook. Construction work and operational readiness activities are ongoing, with hot commissioning activities and start-up of the Coal Plant expected to commence during May 2026.

Uitkomst Colliery – Utrecht Coalfields, KwaZulu Natal Province, South Africa (84% owned)

The board of directors approved the temporary suspension of mining and processing operations at Uitkomst Colliery, with an effective date of 1 March 2026.

The decision follows continued operational underperformance and cash losses experienced at the operation. The suspension is intended to be a care and maintenance measure and does not represent a permanent closure of the mine, a relinquishment of the mining right, nor a decision to place the operation into liquidation or business rescue.

During this period, the Company is evaluating strategic options aimed at unlocking value and preserving future optionality.

These evaluations may include engagement with interested third parties regarding potential partnerships, joint operations or other strategic arrangements in respect of Uitkomst. No decisions have been taken, and any transaction would be subject to customary approvals.

In addition, the Company continues to review its asset base with a view to disposing of redundant or non-core items where appropriate.

Health, Safety and Environmental Performance. Uitkomst Colliery had a quarter free of reportable environmental incidents and no LTI (FY2026 Q2: One LTI).

Vele Aluwani SSCC and TC Colliery – Limpopo (Tuli) Coalfield (100% owned)

Operations at Vele remain suspended, pending the conclusion of a re-engineered business plan. Work continues on investigating a commercially viable logistics solution for the coal products to come from the colliery. Vele recorded no LTIs (FY2026 Q2: nil) during the quarter.

Greater Soutpansberg Projects (GSP) – Soutpansberg Coalfield (74% owned)

The GSP recorded no LTIs (FY2026 Q2: nil) during the quarter. The GSP are a group of mineral tenements, held as Mining Rights and satellite to the Makhado Project. Work has commenced on assessing and prioritising the various tenements, as part of developing the future pipeline of steelmaking HCC prospects to supplement the Makhado Colliery production. Negotiations were progressed with respect to securing surface land access for prioritised deposits. The work required to obtain environmental and water use licences for the Mining Rights are expected to commence during Q4 FY2026.

Appendix 5B – Quarterly Cash Flow Report

The Company's available cash balance and facilities as at 31 March 2026 was US\$5.4 million. The aggregate amount of payments to related parties and their associates, disclosed as item 6.1 of the March 2026 quarter Appendix 5B, was US\$84k, comprising executive and non-executive director remuneration.

Christine He

Managing Director and Chief Executive Officer
