Sibanye-Stillwater prices an oversubscribed US\$500 million 6.25% Senior Notes offering

Johannesburg, 8 May 2026: Sibanye-Stillwater (tickers JSE: SSW and NYSE: SBSW) is pleased to announce that it has priced a new oversubscribed US\$500 million senior notes offering due 2031 (the "2031 Notes") (the "Offering"). The 2031 Notes will be issued through the Group's wholly owned subsidiary, Sibanye-Stillwater UK Financing Plc, as a single tranche of US\$500 million, maturing in five and a half years (non-call two) at a 6.25 per cent per annum coupon. The Offering is subject to customary closing conditions, and settlement is expected to occur on or around 15 May 2026.

The Offering forms part of the Group's previously announced capital management measures to reduce gross debt by repurchasing outstanding debt securities. The net proceeds of the 2031 Notes, together with the Group's cash reserves, will be used to purchase existing notes issued by the Group's wholly owned subsidiary, Stillwater Mining Company. On 6 May 2026, Sibanye-Stillwater commenced, through Stillwater Mining Company, offers to purchase for cash (i) any and all of the outstanding US\$675 million senior notes due November 2026 (the "2026 Notes"), with any remaining amount expected to be settled in cash by the Group, and (ii) up to US\$75 million of the outstanding US\$525 million senior notes due 2029 (the "2029 Notes", and together with the 2026 Notes, the "Existing Notes"). The successful repurchase of the Existing Notes by Stillwater Mining Company could result in an overall reduction in Group gross debt of up to US\$250 million.

CEO Richard Stewart commented: "We are pleased with the strong demand reflected in the more than five times oversubscription for the bond offering, which demonstrates investor confidence in Sibanye-Stillwater, its strategy and the quality and resilience of our portfolio. Today's transaction marks another important step in strengthening our balance sheet, extending our debt maturity profile, and enhancing our financial flexibility. These actions are fully aligned with our disciplined capital allocation framework, which includes, amongst others, a target of reducing gross debt by approximately 50% over the next two to three years. Importantly, strengthening and improving the flexibility of our balance sheet, combined with optimising margins from our operations, strongly positions us to continue delivering on our strategy, including investing in organic value accretive growth and positioning the company to deliver future-facing metals that support the evolving energy landscape."
